About Champion

Champion has been working on the development of iron ore deposits in the Labrador Trough for more than 10 years through acquisition of tenements, geological evaluation and development of a Feasibility study (Fire Lake North deposit). The management team has a vast experience from geotechnical work to green

field development, brown field management including logistics development and financing of all stages in the mining industry.

Prior to the acquisition of Bloom Lake, the main focus of Champion's activities, holding over 3 billion tons of high quality iron ore resources, was concentrated on the effort to achieve an economical long term access from mine to ship.

Following the acquisition of Bloom Lake the Company's main focus is to implement upgrades to the mine and processing infrastructure it now owns whilst advancing projects associated with improving access to global markets. This includes progressing rail and port infrastructure initiatives with government and other key industry and community stakeholders.

The Government of Québec has granted CAD \$20 million for the feasibility study of a new rail linking Fire Lake / Bloom Lake area to the port of Sept-Îles. This study is being managed by Champion, and is expected to be finalised in March 2017.
