Bloom Lake In Production

2018

Disclaimer

This presentation contains certain forward-looking information and statements within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "may", "will", "project", "should", "believe", "plans", "intends", "forecast" and similar expressions are intended to identify forward-looking information or statements. In particular, but without limiting the foregoing, this presentation contains forward-looking information and statements pertaining to Champion Iron Limited including: future development, exploration, acquisition and development activities, infrastructure build out and related capital expenditures and the timing thereof; the amount and timing of capital projects; operating costs; the total future capital associated with development of reserves and resources. In this presentation reference is made to the Company's Bloom Lake Iron Mine growth scenario and economic analysis. All information derived therefrom are not estimates or forecasts of metrics that may actually be achieved. Such information reflects internal projections used by management for the purposes of making capital investment decisions and for internal long range planning and budget preparation. Accordingly, undue reliance should not be placed on same. The recovery, reserve and resources estimates of Champion Iron's reserves and resources provided herein are estimates only and there is no guarantee that the estimated reserves or resources will be recovered. In addition, forward-looking statements or information are based on a number of material factors, expectations or assumptions of Champion Iron which have been used to develop such statements and information but which may prove to be incorrect. Although Champion Iron believes that the expectations reflected in such forward-looking statements or information are reasonable, undue reliance should not be placed on forward-looking statements because Champion Iron can give no assurance that such expectations will prove to be correct. In addition to other factors and assumptions which may be identified herein, assumptions have been made regarding, among other things: the impact of increasing competition; the general stability of the economic and political environment in which Champion Iron operates; the timely receipt of any required regulatory approvals; the ability of Champion Iron to obtain qualified staff, equipment and services in a timely and cost efficient manner; drilling results; the ability of the operator of the projects in which Champion Iron has an interest in to operate the field in a safe, efficient and effective manner; the ability of Champion Iron to obtain financing on acceptable terms; field production rates and decline rates; the ability to replace and expand oil and natural gas reserves through acquisition, development and exploration; risks associated with the degree of certainty in resource assessments; future commodity prices; currency, exchange and interest rates; and the regulatory framework regarding royalties, taxes and environmental matters in the jurisdictions in which Champion Iron operates. Our objective will be to proactively manage our capital program as it relates to operational success and fluctuating commodity prices with a priority to maintain financial flexibility and achieve our production guidance. Champion Iron will closely monitor the budget and financial situation throughout the year to assess market conditions and will quickly adjust budget levels or pace of development in accordance with commodity prices and available funds from operations. The forward-looking information and statements included in this presentation are not guarantees of future performance and should not be unduly relied upon. Such information and statements; including the assumptions made in respect thereof, involve known and unknown risks, uncertainties and other factors that may cause actual results or events to defer materially from those anticipated in such forward-looking information or statements including, without limitation: changes in commodity prices; the potential for variation in the quality of the Bloom Lake formation; changes in the demand for or supply of Champion Iron's products; unanticipated operating results or production declines; changes in tax or environmental laws, royalty rates or other regulatory matters; changes in development plans of Champion Iron or by third party operators of Champion Iron's properties, increased debt levels or debt service requirements; limited, unfavourable or a lack of access to capital markets; increased costs; a lack of adequate insurance coverage; the impact of competitors; and certain other risks detailed from time-to-time in Champion Iron's public disclosure documents, (including, without limitation, those risks identified in this presentation and Champion Iron's Annual Information Form). The forward-looking information and statements contained in this presentation speak only as of the date of this presentation, and Champion Iron does not assume any obligation to publicly update or revise any of the included forward-looking statements or information, whether as a result of new information, future events or otherwise, except as may be required by applicable securities laws.

Except as required by law, Champion Iron Limited, expressly disclaims any intention and undertakes no obligation to update any forward looking statements or information as conditions change.

The historical mineral resources mentioned are strictly historical in nature and are non-compliant to National Instrument 43-101 mineral resources and mineral reserves standards, and should therefore not be relied upon. A qualified person has not done sufficient work to upgrade or classify the historical mineral resources as current National Instrument NI-43-101 compliant.

History of Bloom Lake

A series of unique events allowed Champion, with the support of the Quebec Government, to acquire the Bloom Lake mine and associated infrastructure from Cliffs Natural Resources (“Cliffs”) under the Companies’ Creditors Arrangement Act (“CCAA”)

2008 -’10

- Consolidated Thompson (“CLM”), a junior iron ore developer, financed and built the Bloom Lake mine during the iron ore boom for total capital of ~US\$1.2bn and commenced initial production in 2010
 - The average iron ore price during 2009-2010 was US\$112/t (62% CFR China)

2011

- In May 2011, Cliffs acquired CLM for C\$4.9B (for 75% ownership) with the intent to increase iron ore capacity from 8Mt to 14Mt through a Phase 2 expansion plan
 - Phase 2 expansion involved an additional ~\$1.5bn+ capex and included adding a second concentrate plant, an in-pit crusher, 3.45km conveyor system, among other improvements

2014

- Throughout the next 3 years Cliffs advanced the Phase 2 expansion, which was required to service its debt and contractual obligations
- Due to the quantum of liabilities (>C\$1.0bn), including debt and take-or-pay commitments, Cliffs pursued a restructuring process for the Bloom Lake assets

2015

- In January 2015, Cliffs sought creditor protection under CCAA for the Bloom Lake mine and associated assets, resulting in the mine being then put on a strict care and maintenance program

2016

- December 2015, QIO announced that it had entered into an asset purchase agreement to acquire the Bloom Lake property out of creditor protection; the iron ore price was ~US\$39/t (62% CFR China) on day of announcement

2017

- In March 2017, released a positive feasibility study for a restart of the mine. In July 2017, QIO announced that it had obtained conditional commitments of US\$180 million to fund a portion of the restart of Bloom Lake
- In October 2017, Champion announced the closing of financing arrangements and confirmed all prior partnership agreements

2018

- In February of 2018, operations restarted at Bloom Lake
- In April of 2018, first capsize vessel sailed from Sept-Iles deep sea port transporting 200,000wmt of 66% iron ore to China
- To date, Bloom Lake produced over 1.7M wmt of high quality concentrate of which over 1.6M wmt have been shipped from the port of Sept-Iles

Investment Highlights

1

**In-Demand Product
with a Low Cash Cost**

- In-demand, high quality 66.2% iron ore product with a low cash cost of C\$42.9/dmt

2

**High Quality
Infrastructure**

- ~US\$3bn spent to date on mine, rail and port by previous owners

3

**Ramping up to
7.4mtpa**

- Commercial production achieved during first quarter of production
- Cash flow positive with \$72M cash on hand (June 30th 2018)

4

**Major Capex for
Phase 2 Expansion Sunk**

- ~US\$1.2bn already invested by previous owners on Phase 2 expansion to 15Mtpy

5

**Long life and Tier 1
Jurisdiction**

- More than 20 years production on reserves (412Mt) and significant extension potential from resource (4bt) in Canada's premier, mining friendly iron ore district

6

Attractive Valuation

- Champion Iron trades at an attractive valuation across several metrics when compared to other iron ore producers

7

**High Quality
Team**

- Management team and Board has a track record of success and delivering on promises

Regional Drivers

Bloom Lake Drivers

- With almost all operating costs in C\$, Bloom Lake benefits from depreciation of Canadian dollar relative to US dollar

All cost reduction initiatives have been completed

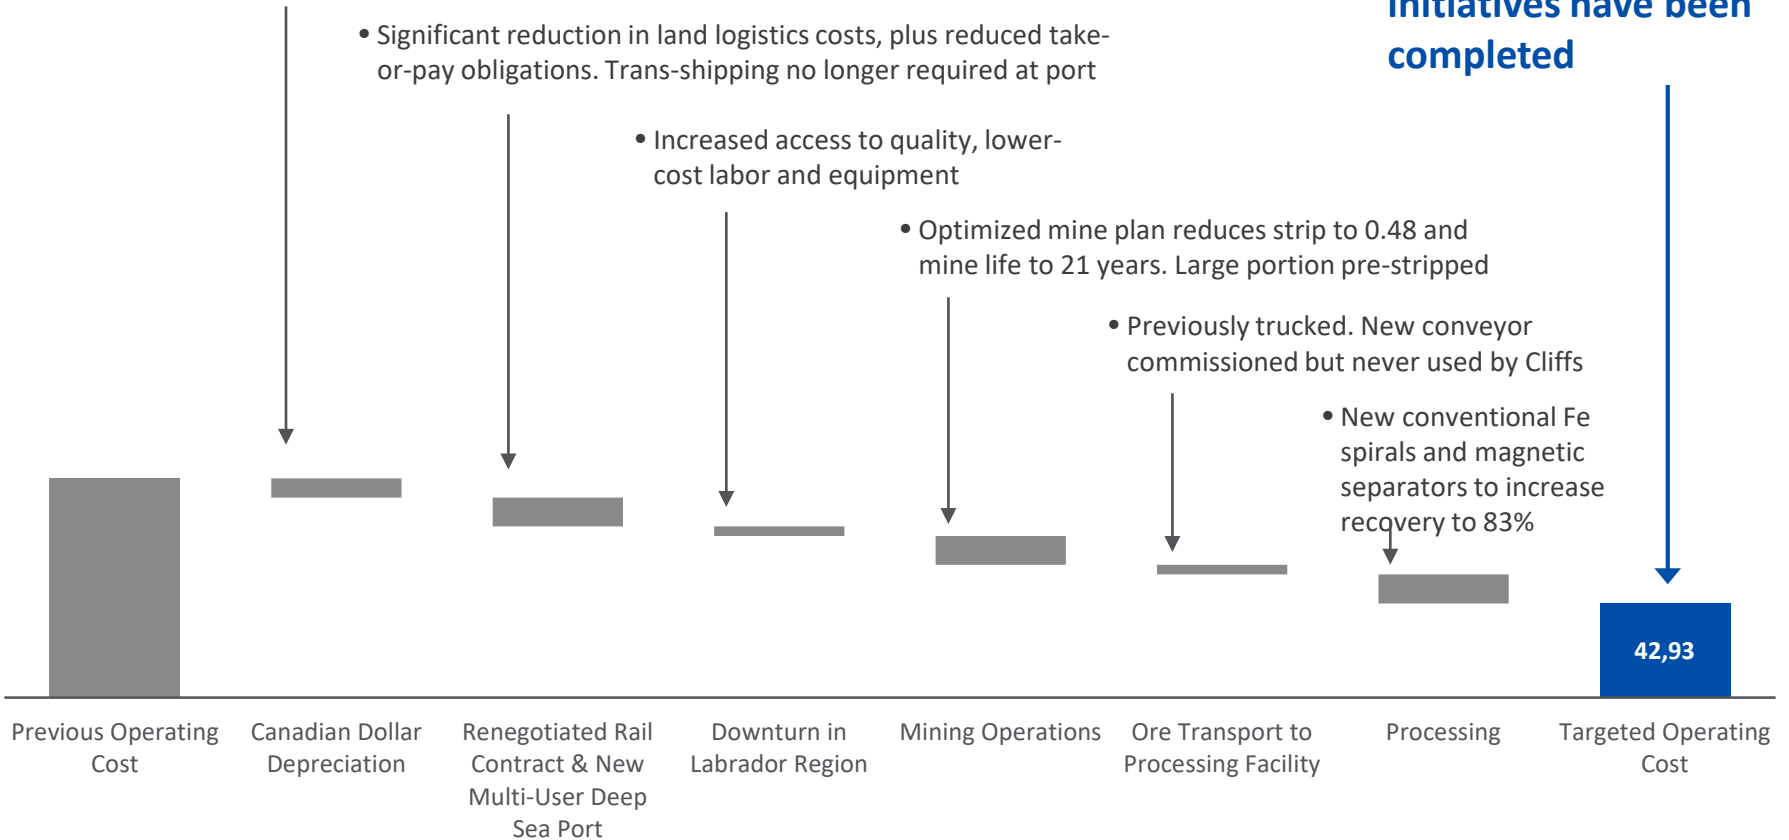

- Significant reduction in land logistics costs, plus reduced take-or-pay obligations. Trans-shipping no longer required at port

- Increased access to quality, lower-cost labor and equipment

- Optimized mine plan reduces strip to 0.48 and mine life to 21 years. Large portion pre-stripped

- Previously trucked. New conveyor commissioned but never used by Cliffs

- New conventional Fe spirals and magnetic separators to increase recovery to 83%

Labrador Trough cost environment has structurally changed

2 High Quality Infrastructure

2 High Quality Infrastructure

2 High Quality Infrastructure

2 High Quality Infrastructure

2 High Quality Infrastructure

2 High Quality Infrastructure

Rail

- Transported by rail from loading station at Bloom Lake to Port of Sept-Îles
- Rail agreement in place with IOC
- 735 rail cars acquired for US\$30M

Port

- Shipped from Port of Sept-Îles to end buyers
- Port of Sept-Îles is one of North America's largest ore-handling ports, with 50Mtpy capacity
- 23m draught deep water berth commissioned in 2018

Year-round market access

3 Ramping up to 7.4Mtpa

- Restarted production February 16th 2018 – 1 year after feasibility study
- Shipped first capesize vessel with 200,000 wmt of 66.2% iron ore to China
- Reached commercial production
- Ramping up to full production and 10 capesize vessels already shipped to China, Europe and Japan
- As of June 30th, Bloom Lake has produced more than 2.1M wmt of high quality concentrate of which more than 1.7M wmt have been shipped

Targeting 7.4Mtpy run-rate production in Q3 FY 2019

Ore Volumes Milled (WMT, quarterly)

Tonnes Produced (WMT, quarterly)

Attractive Phase 2 Expansion Potential

Expansion to 15Mtpy substantially derisked

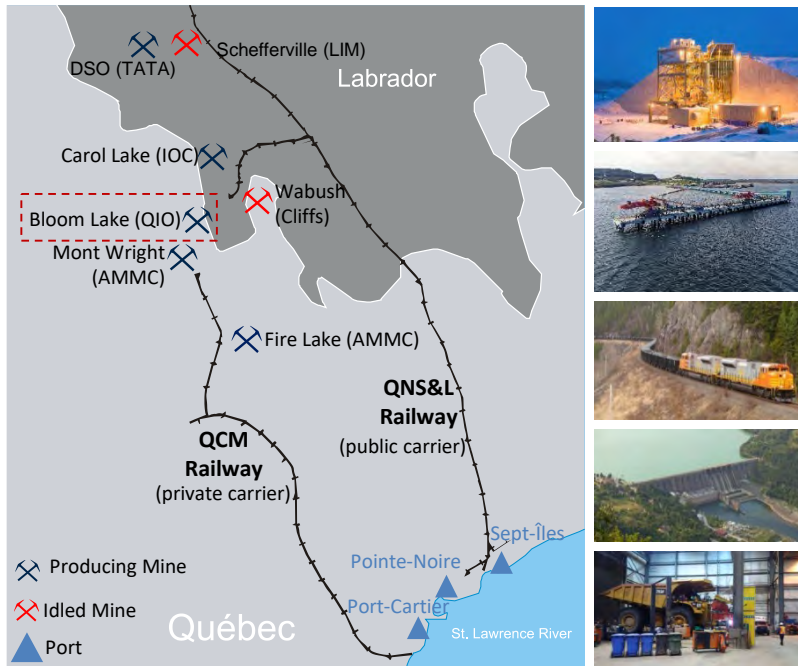

- Cliffs spent ~US\$1.2 billion on plant upgrades and expansion plans to increase capacity to ~15Mtpy
- Significant investments were made to support Phase 2 expansion (75% complete) which are fully available to Champion Iron:
 - Conveyor system
 - Near-pit crusher
 - 2nd Concentrator plant
- High voltage power lines previously upgraded to handle a further 30MW

Phase 2 Plant

- 412Mt reserves and 912Mt resource @ 30% Fe
 - Reserves support mine life of 21 years @7.4Mtpy concentrate production per feasibility study results
- Established Tier 1 mining district with two adjacent mines operating since the 1950s
 - Politically stable, mining-friendly iron ore basin with fully-developed infrastructure network
 - New multi-user port at Sept-Îles
 - Access to skilled workforce and low-cost electricity

Summary of Economic Parameters and Feasibility Results

Mining	Reserve	Mt	411.7

Attractive Pure-Play Iron Ore Producer

Champion Iron is attractively valued compared to other iron ore producing companies

- On a reserves, resource and production basis Champion Iron is attractively valued compared to other iron ore producers and developers
- Continued premium pricing coupled with a Phase 2 expansion has the potential to create material additional value

EV / Production (US\$/t)

Note: Latest reported 12 months iron ore production used for peer set

EV / Reserve (US\$ / tonne contained Fe)

EV / Resource (US\$ / t contained Fe)

Management Team

Michael O’Keeffe <i>Executive Chairman and CEO</i>	<ul style="list-style-type: none"> Former Executive Chairman of Riversdale Mining Limited (2004-2011) where Mr. O’Keeffe led the development of Riversdale Mining from a junior until it was acquired by Rio Tinto for A\$4 billion Prior to joining Riversdale Mr. O’Keeffe was a Managing Director with Glencore Australia Limited (1995-2004), and was responsible for Glencore’s Australian trading acquisitions; Previously, held a series of senior operating positions with MIM Holdings (Mt.Isa)
Natacha Garoute Chief Financial Officer	<ul style="list-style-type: none"> Previously, CFO of gold mining company More than 10 years experience in international mining industry 20 years of finance experience with focus on project finance, operational budget and international taxes
David Cataford Chief Operating Officer	<ul style="list-style-type: none"> Held various management positions at Cliffs including senior roles at Bloom Lake, and was part of the management team that increased mining capacity by 80% and completed the phase-one plant ramp-up Mr. Cataford’s experience in iron-ore mining includes ore characterization projects at Bloom Lake and ArcelorMittal’s Mont Wright, and adapting the recovery circuit to meet new customer’s demands

Board of Directors

Andrew J. Love, FCA Director	<ul style="list-style-type: none"> More than 30 years of accounting experience in reorganizing and redesigning companies in Australia Over 25 years experience as a consultant to public companies, particularly in mining and resource industries Managed two companies in the energy and mining sectors and served as Vice President at Riversdale Mining
Gary Lawler, LLB, LLM Director	<ul style="list-style-type: none"> Experience as an M&A lawyer for over 30 years Advised numerous companies and investment banks on transactions, including hostile takeovers and anti-takeover measures Served on the boards of Dominion Mining and Riversdale Mining
Wayne Wouters (The Honourable), PC Director	<ul style="list-style-type: none"> Strategic advisor to McCarthy Tétrault LLP Worked in private sector as Clerk of the Privy Council, Secretary to the Cabinet and Head of the Federal Public Service Previously served as deputy minister for several departments including Human Resources and Development of Skills Canada
Michelle Cormier Director	<ul style="list-style-type: none"> Operating partner for Wynnchurch Capital, a \$2.3 billion private equity fund Former CFO for a private company and a publicly traded forest products company operating in Canada and the United States Vast experience in senior management roles including corporate strategy, finance, human resources and reorganization
Jyothish George Director	<ul style="list-style-type: none"> Joined Glencore in London in 2006 and is currently head of the iron ore department. Serves as Vice-Chairman of the board of directors of Jumelles Limited, the holding company of the Zanaga iron ore mine in the Republic of Congo.
