CHAMPION IRON 

DISCLAIMER

CHAMPION IRON 

This presentation contains certain forward-looking information and statements within the meaning of applicable securities laws. The use of any of the words "expect", "anticipate", "continue", "estimate", "may", "will", "project", "should", "believe", "plans", "intends", "forecast" and similar expressions are intended to identify forward-looking information or statements. In particular, but without limiting the foregoing, this presentation contains forward-looking information and statements pertaining to Champion Iron Limited including: product qualification and transition potential, electronic arc furnace expected growth, prospective customers, optimization of operations, future development, exploration, development activities, infrastructure build-out and related capital expenditures and the timing thereof, the amount and timing of capital projects, operating cost, the total future capital associated with development of reserves and resources, access to labour and infrastructure, realized price, structural shift in iron ore industry, cost curve assumptions, ability to exceed nameplate capacity, additional training for personnel, accelerated tailings raising, being subject to cap and trade system. In this presentation, reference is made to the Company's Bloom Lake Iron Mine growth scenario and economic analysis. All information derived therefrom are not estimates or forecasts of metrics that may actually be achieved. Such information reflects internal projections used by management for the purposes of making capital investment decisions and for internal long range planning and budget preparation. Accordingly, undue reliance should not be placed on same. The recovery, reserve and resources estimates of Champion Iron's reserves and resources provided herein are estimates only and there is no guarantee that the estimated reserves or resources will be recovered. In addition, forward-looking statements or information are based on a number of material factors, expectations or assumptions of Champion Iron which have been used to develop such statements and information but which may prove to be incorrect. Although Champion Iron believes that the expectations reflected in such forward-looking statements or information are reasonable, undue reliance should not be placed on forward-looking statements because Champion Iron can give no assurance that such expectations will prove to be correct. In addition to other factors and assumptions which may be identified herein, assumptions have been made regarding, among other things: the impact of increasing competition; the general stability of the economic and political environment in which Champion Iron operates; the timely receipt of any required regulatory approvals; the ability of Champion Iron to obtain qualified staff, equipment and services in a timely and cost efficient manner; drilling results; the ability of the operator of the projects in which Champion Iron has an interest in to operate the field in a safe, efficient and effective manner; the ability of Champion Iron to obtain financing on acceptable terms; field production rates and decline rates; the ability to replace and expand oil and natural gas reserves through acquisition, development and exploration; risks associated with the degree of certainty in resource assessments; future commodity prices; currency, exchange and interest rates; and the regulatory framework regarding royalties, taxes and environmental matters in the jurisdictions in which Champion Iron operates. Our objective will be to proactively manage our capital program as it relates to operational success and fluctuating commodity prices with a priority to maintain financial flexibility and achieve our production guidance. Champion Iron will closely monitor the budget and financial situation throughout the year to assess market conditions and will quickly adjust budget levels or pace of development in accordance with commodity prices and available funds from operations. The forward-looking information and statements included in this presentation are not guarantees of future performance and should not be unduly relied upon. Such information and statements, including the assumptions made in respect thereof, involve known and unknown risks, uncertainties and other factors that may cause actual results or events to differ materially from those anticipated in such forward-looking information or statements including, without limitation: changes in commodity prices; the potential for variation in the quality of the Bloom Lake formation; changes in the demand for or supply of Champion Iron's products; unanticipated operating results or production declines; changes in tax or environmental laws, royalty rates or other regulatory matters; changes in development plans of Champion Iron or by third party operators of Champion Iron's properties, increased debt levels or debt service requirements; limited, unfavourable or a lack of access to capital markets; increased costs; a lack of adequate insurance coverage; the impact of competitors; and certain other risks detailed from time-to-time in Champion Iron's public disclosure documents, (including, without limitation, those risks identified in this presentation and Champion Iron's Annual Information Form). The forward-looking information and statements contained in this presentation speak only as of the date of this presentation, and Champion Iron does not assume any obligation to publicly update or revise any of the included forward-looking statements or information, whether as a result of new information, future events or otherwise, except as may be required by applicable securities laws.

Except as required by law, Champion Iron Limited expressly disclaims any intention and undertakes no obligation to update any forward looking statements or information as conditions change.

The historical mineral resources mentioned are strictly historical in nature and are non-compliant to National Instrument 43-101 mineral resources and mineral reserves standards, and should therefore not be relied upon. A qualified person has not done sufficient work to upgrade or classify the historical mineral resources as current National Instrument NI-43-101 compliant

On February 3, 2013, the Company released the results for the Fire Lake North project. The Company is not aware of any new information or data that materially affects the information included in the Phase II Release and confirms that all material assumptions and technical parameters underpinning the estimates in the Phase II Release continue to apply and have not materially changed.

On June 20, 2019, the Company released the results of the Feasibility Study for the Bloom Lake Phase II expansion project, which included a summary of the Economic Parameters and Feasibility Results - Phase I and II combined. The Company is not aware of any new information or data that materially affects the information included in the Phase II Release and confirms that all material assumptions and technical parameters underpinning the estimates in the Phase II Release continue to apply and have not materially changed.

This presentation has been authorized for release to the market by the CEO of Champion Iron Limited, David Cataford.

All amounts are in Canadian dollars unless otherwise stated.

COVID-19 RESPONSE

- > Implemented measures to safeguard the health and safety of our employees, partners and communities
- > Rapidly and diligently adapted operations to conform with or exceed government issued guidelines
- > Additional measures include:
 - √ Monitoring and screening of employees' health
 - √ Additional transportation capacity to enable adequate social distancing
 - √ Amended work schedules to reduce travel volumes
 - √ Isolation measures from the nearby communities
 - √ Completed several on-site simulations to manage suspect cases of COVID-19
 - √ Additional medical support, distancing protocols and disinfection stations at the mine site

CORPORATE OVERVIEW

Largest publicly listed pure-play high-grade iron ore producer globally

- Top Tier Jurisdiction
- Established production in region since 50's
- 2nd largest hub of high-grade production globally
- Access to infrastructure

- Nearly US\$4 Billion invested
- 7.4 Mtpa nameplate capacity
- Short-term opportunity to double production
- High-grade 66.2% Fe with low impurities
- 20+ years mine life

- Proven management team
- 11.5% insider ownership

- Current realized price ~ US\$100+/t*
- Total Cash cost US\$39.6/t FOB*
- C\$785.1M Revenue in last 4 quarters
- C\$348.5M EBITDA in last 4 quarters

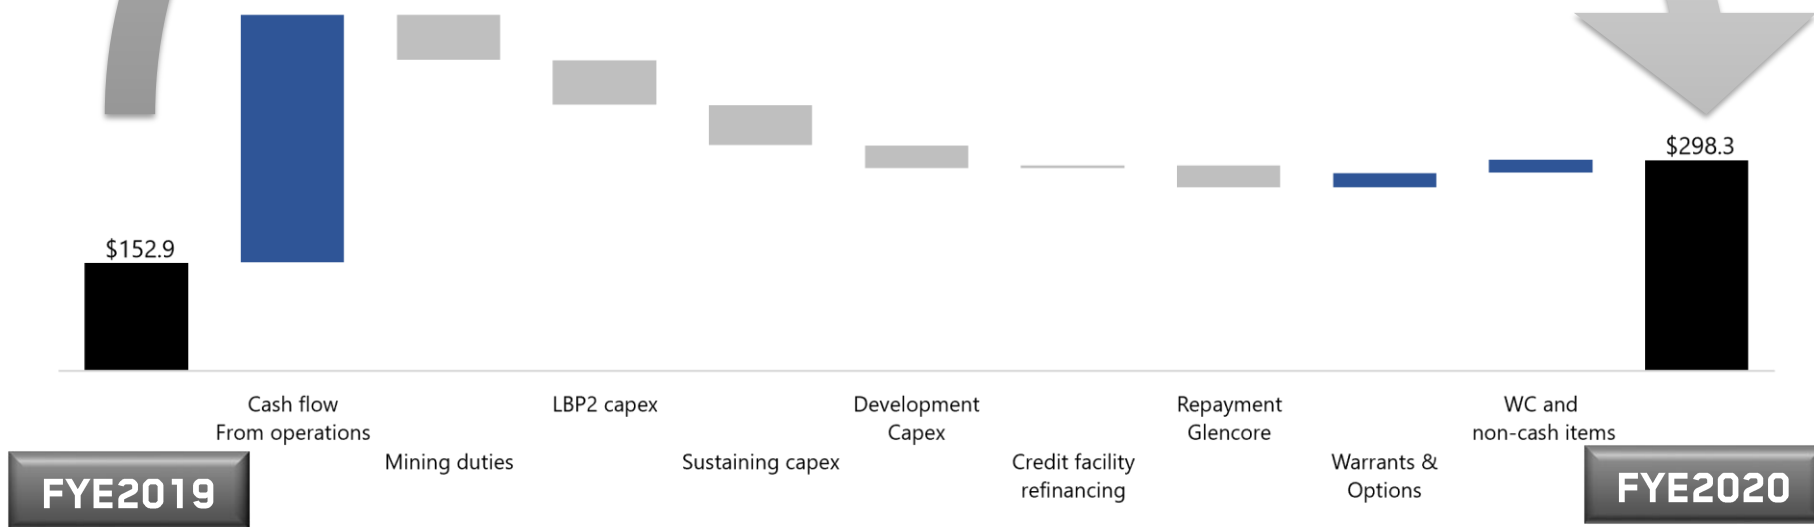

BLOOM LAKE 

FY 2019 → FY2020

STRENGTHENING POSITION

CASH ON HAND* INCREASE OF \$145.4M YOY
LONG-TERM DEBT* INCREASE OF \$2.47M YOY

- ✓ Acquired the remaining 36.8% minority interest in the subsidiary operating Bloom Lake (QIO) for C\$211M
- ✓ Deployed \$58M* on the Phase II Feasibility Study
- ✓ Accelerated tailings containment dam rising work by \$30M
- ✓ Improved cost of debt from weighted average cost ranging from 12.37%-14.75% to an annualized 4.8%

FYE2019

FYE2020

*As of March 31, 2020
 Cash on hand includes short-term investments; Long-term debt face value

STRUCTURAL SHIFT IN IRON ORE

HIGH QUALITY & LOW CONTAMINANT PRODUCT IN RISING DEMAND

✓ **Champion sells based on Platts 65% Fe premium benchmark**

- > China implemented “Blue-Sky” initiative to reduce emissions
- > More complex steel focus in China and increasing consumption of white goods demanding higher quality input with low impurities
- > Potential for higher standards in tailings management to limit new entrants for high-grade supply
- > Potential supply disruption globally due to COVID-19
- > Rising contaminant issues in other major hubs globally

CANADA - 2ND LARGEST EXPORT REGION IN HIGH GRADE

- > Active producers in the region for decades including Rio Tinto, ArcelorMittal and Tata Steel
- > Quebec ranks Top-10 mining jurisdiction globally as per Fraser Institute
- > VALE dominates the high-grade market with 60%+ market share

GLOBAL SEABORN HIGH-GRADE MARKET (65%+Fe, WMT/YEAR)

Global Seaborn Iron Ore Market

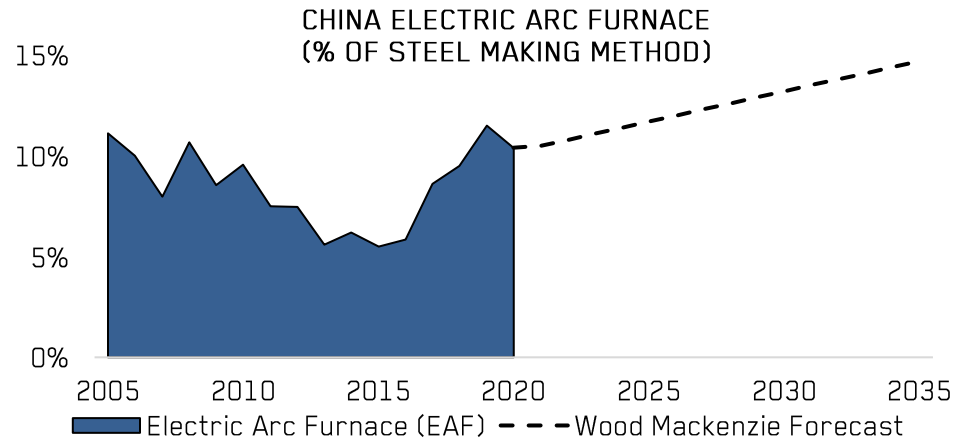

*Source: Wood Mackenzie 2018 annual data

STEEL INDUSTRY GOING GREEN

DR PELLET FEED IN RISING DEMAND

- > Completed a commercial production test of 67.98% Fe iron ore with combined silica plus alumina content of 2.57%
- > Product aimed to qualify for DR pellet feed material, which can be converted by DRI producers and utilised in EAFs
- > EAF's market share in China expected to grow from ~10% to over 16% by 2040¹

GLOBAL IRON ORE SEABORN MARKET (2020)

- > "DR" iron ore concentrate quality is only available from a handful of producers globally
- > Québec offers prospective customers a safe and reliable jurisdiction

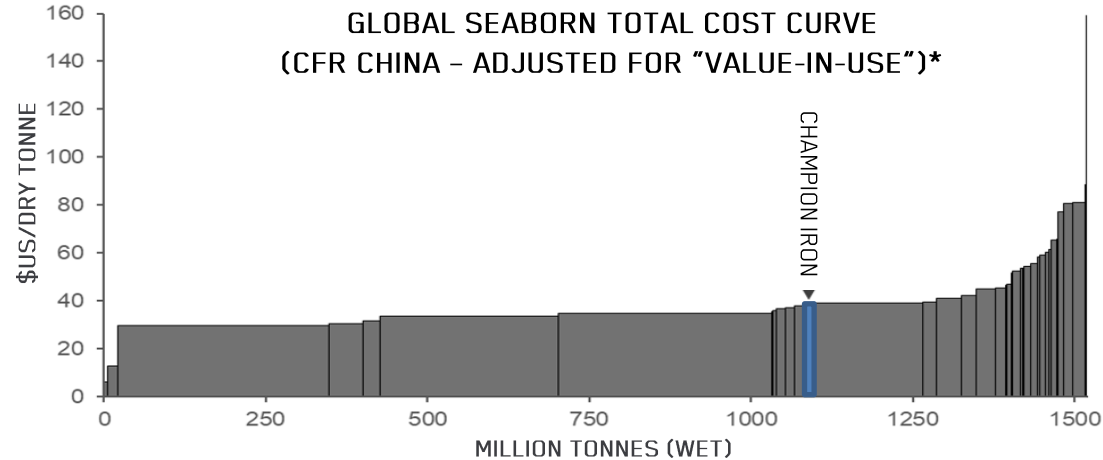

Source: Champion Iron Ltd, Wood Mackenzie data

¹ Wood Mackenzie research

COMPETING ON COST CURVE

PROVEN COST STRUCTURE¹

- > Bloom Lake has proven cost structure
- > Product quality premium offsets freight differential when compared to Australian operators
- > Major producers act as price setters as top four producers control over 70% of global seaborne supply

POSITIONED FOR PROFITABILITY

- > Iron Ore has traded on 'spot' basis since 2008
- > Producers within 75th percentile of the cost curve have remained profitable in biggest downturn of 2015

¹Source: Wood Mackenzie data, calendar 2019; Bloomberg; P62: Platts TSI IODEX 62% Fe CFR China
 *Value-in-use" adjusts for premium/discount in realized price reflecting product quality and contaminants

DIVERSIFIED CUSTOMER BASE

Product sold to 22 different customers since 1st shipment

Sojitz & Glencore sells our product on an agency basis

- > Access to larger customer base
- > Reduce execution risk
- > Access to preferential freight

Champion retains the right to deal directly with end buyers and arrange shipping

OPERATIONAL RESULTS

SETTING HISTORICAL RECORDS AT BLOOM LAKE

- > Set new annual production record in Bloom Lake's history (FY20)
- > Completed a commercial production test of 67.98% Fe aimed to qualify for DR pellet feed material
- > Proven ability to exceed nameplate capacity
- > Achieved and maintained target recovery rate of 83%
- > Focus on quality with continuous improvement in ore recovery
- > No penalties for contaminants since restart
- > Proven ability to operate in all seasons

FISCAL PERIODS	Q1/20	Q2/20	Q3/20	Q4/20	FY2020
Fe concentrate produced (M wmt)	1.99	2.19	1.83	1.89	7.90

BLOOM LAKE PHASE I (7.4 MTPA)

Phase I positions Champion as a strong free cash flow generator with 20+ years mine life

- > Focus on quality with continuous improvement in ore recovery
- > Achieved nameplate capacity within 4 months
- > Set annual production record in Bloom Lake history of 7.90M wmt in FY2020
- > Achieved and maintained target recovery of 83%
- > Proven ability to operate in all seasons

BLOOM LAKE PHASE II ROBUST ECONOMICS

- > Proposed plan to double capacity from 7.4 Mtpa to 15 Mtpa
- > Takes advantage of US\$1.2B already invested and infrastructure already in place

- > Phase II NPV8% of \$956M and 33.4% IRR after-tax
- > 2.4 years payback on initial capital
- > Life of mine total cash cost of \$46.6/t (US\$35.4/t)
- > Initial CAPEX of \$589.8M (US\$446.8M)
- > 20 years mine life
- > Combined Phase I & II NPV8% of \$3.76B pre-tax and \$2.38B after-tax

- > Economics based on P65 life of mine iron ore price of US\$83.9/t or a discount of ~35% to the P65 index when the Study was released on June 20, 2019

* See disclosure page for statement regarding Phase II Feasibility Study

PHASE II – CAPITAL SPENDING

LOW CAPITAL REQUIREMENT DUE TO PRIOR INVESTMENT OF ~US\$1.2B

CAPEX PRE-PRODUCTION

	(C\$M)	(US\$M)
General	28.2	21.4
Mine - Phase II	37.6	28.5
Crusher and stockpile	24.3	18.4
Concentrator	165.0	125.0
Tailings and water management	50.2	38.0
Services	30.5	23.1
Rail and port	73.4	55.6
Owner's costs	105.1	79.6
Contingency (15%)	75.5	57.2
TOTAL	589.8	446.8

OPERATING COSTS

	LoM (CA\$/t)	LoM (US\$/t)
Mining	13.4	10.2
Crushing and conveying	1.7	1.3
Processing plant	7.9	6.0
Concentrate shipping	16.8	12.7
Water and tailings management	2.1	1.6
General and administrative	4.7	3.6
TOTAL CASH COST	46.6	35.4
Sustainability & other community expense	1.3	1.0
Sustaining CAPEX	4.4	3.3
ALL-IN SUSTAINING COSTS	52.3	39.7

PHASE II – EXECUTION UPDATE

√158,000h worked

√ 3,800m³ of concrete

√ 18,000m³ of backfill

- > \$58M deployed to date, in accordance with the plans from the initial \$68M budget approved by the board of directors
- > Work to date significantly de-risked the construction timeline initially estimated at 21 months
- > Discretionary capital expenditures currently suspended in response to COVID-19
- > Initial intention to address the Phase II growth plans by the middle of the current calendar year, postponed to a later time
- > Optionality to progress at a reduced pace while the company generates cash flow from operations

PHASE II – ECONOMICS

P65 ASSUMED PRICE
US\$83.9/T

IRR → 33.4%
NPV → \$2.38B

P65 CURRENT PRICE*
US\$113.10/T

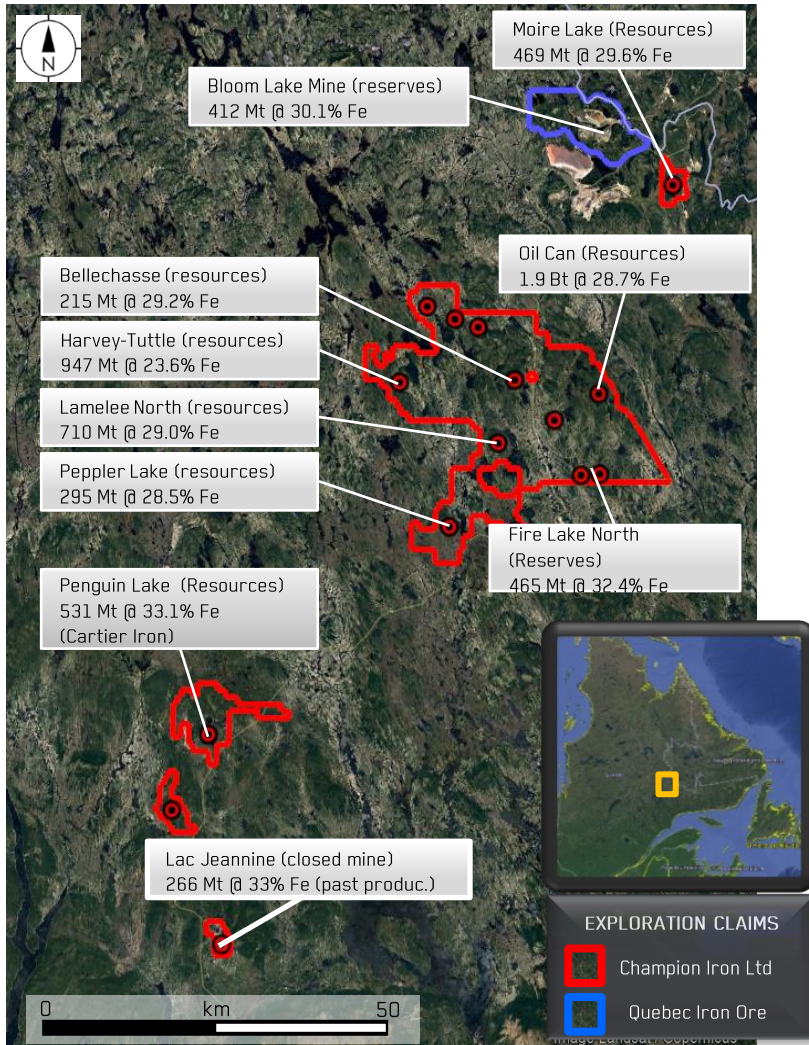

BLOOM LAKE PHASE II POSITIONING AS A GLOBAL LEADER

- > Focus on creating value per share
- > Further position Champion as one of the largest high-grade iron ore producers in the world

GLOBAL SEABORN PRODUCERS (WMT/YEAR)

REGIONAL OPPORTUNITIES PHASE III

- > Only 60 km south of Bloom Lake, Champion controls over 5.4 Billion tonnes of additional resources
- > A feasibility study was completed on Fire Lake North in 2013 considering a 9.3 Mtpa project over a 19.6-year life of mine
- > Completed railway feasibility (completely funded by Quebec Government)

* See disclosure page for statement regarding Fire Lake North Feasibility Study

FY2020 HEALTH & SAFETY

- > QIO's statistics in line with open pit mining benchmarks as set by ASPM
- > Initiated new simulation programs to optimize emergency response time
- > Virtual training completed during period of reduced activities related to COVID-19
- > Additional measures in place to train new personnel arriving at site
- > Continuous monitoring and improvement of protocols

QUEBEC IRON ORE + CONTRACTORS FINANCIAL YEAR 2020						BENCHMARK 2019*
	Q1	Q2	Q3	Q4	FY2020	
Lost Time Injury Frequency Rate (LTIFR)	4.28	4.85	4.37	2.58	4.1	3,38
Disability Injury Severity Rate (DISR)	6.85	33.99	26.62	17.54	24.94	9

*ASPM: Association paritaire pour la santé et la sécurité au travail du secteur minier <http://aspmine.qc.ca/>

ENVIRONMENTALLY FOCUSED

- > No occurrence of major environmental issue to date
- > Implemented new initiatives that resulted in over 12 million litres (ML/yr) of fuel reduction, representing 33,000 t/yr of greenhouse gas reduction
- > Québec Iron Ore no longer subject to the cap-and-trade system
- > Completed C\$30M accelerated dam rising program improving tailings management
- > Conducted trials with new blasting compound to reduce Nitrogen Oxide (NOx)
- > Revegetation plan now covers 41 hectares
- > Completed work in streams surrounding Fermont to improve fish habitat
- > Completed a detailed analysis of energy consumption (65% of our energy consumption now originates from renewable energy)
- > New initiative with nearby communities to recover and distribute wood harvested by our operations

STRONG LEVERAGE TO COMMODITY PRICE

- > Well positioned for downturn with cost competing with global majors and substantial cash operating margin
- > Strong leverage to higher commodity price

EXPERIENCED TEAM

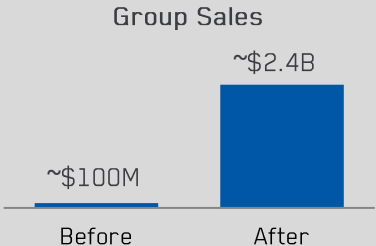

INDIVIDUAL	EXPERIENCE
MANAGEMENT TEAM	
 <p>Michael O'Keeffe Executive Chairman</p>	<ul style="list-style-type: none"> > Former Executive Chairman of Riversdale Mining Limited (2004-2011) where Mr. O'Keeffe led the development of Riversdale Mining from a junior until it was acquired by Rio Tinto for A\$4 billion. > Prior to joining Riversdale, Mr. O'Keeffe was a Managing Director with Glencore Australia Limited (1995-2004) and was responsible for Glencore's Australian trading acquisitions. Previously, held a series of senior operating positions with MIMHoldings (Mt. Isa).
 <p>David Cataford CEO</p>	<ul style="list-style-type: none"> > Mr. Cataford was appointed to the position of President and Chief Executive Officer on April 1, 2019. Mr. Cataford had been Chief Operating Officer of the Company since March 20, 2017. Prior to joining Champion in 2014, Mr. Cataford held several management positions within Cliffs Natural Resources Inc., including key positions in their main iron ore deposit at Bloom Lake Mine in Fermont, Quebec. At Bloom Lake, Mr. Cataford played an important role in the management team including phase 1 expansion of the plant. His experience in iron ore mining includes mineral characterization projects at Bloom Lake and for ArcelorMittal at Mont Wright, as well as adapting the recovery circuit to meet new customer demands. Mr. Cataford was president and cofounder of the North Shore and Labrador Mineral Processing Society.
 <p>Natacha Garoute CFO</p>	<ul style="list-style-type: none"> > Has more than 20 years of finance experience as a CPA with a strong focus on mining and public corporations, with extensive international exposure. > Solid background in public company reporting and corporate finance expertise implementing financing and international tax structure. > Strong experience including CFO of Roxgold, senior finance positions at SEMAFO Inc., Canadian Railway, MDD and PWC.
BOARD OF DIRECTION	
 <p>Andrew J. Love, FCA Director</p>	<ul style="list-style-type: none"> > More than 30 years of accounting experience in reorganizing and redesigning companies in Australia. > Over 25 years' experience as a consultant to public companies, particularly in mining and resource industries. > Managed two companies in the energy and mining sectors and served as Vice-President at Riversdale Mining.
 <p>Gary Lawler, LLB, LLM Director</p>	<ul style="list-style-type: none"> > Experience as an M&A lawyer for over 30 years. > Advised numerous companies and investment banks on transactions, including hostile takeovers and anti-takeover measures. > Served on the boards of Dominion Mining and Riversdale Mining.
 <p>Wayne Wouters (The Honourable), PC Director</p>	<ul style="list-style-type: none"> > Strategic advisor to McCarthy Tétrault LLP. > Worked in private sector as Clerk of the Privy Council, Secretary to the Cabinet and Head of the Federal Public Service. > Previously served as deputy minister for several departments including Human Resources and Development of Skills Canada.
 <p>Michelle Cormier Director</p>	<ul style="list-style-type: none"> > Operating partner for Wynnchurch Capital, a \$2.3 billion private equity fund. > Former CFO of a private company and a publicly traded forest products company operating in Canada and the United States. > Vast experience in senior management roles including corporate strategy, finance, human resources and reorganization.
 <p>Jyothish George Director</p>	<ul style="list-style-type: none"> > Joined Glencore in London in 2006 and is currently head of the iron ore department. > Serves as Vice-Chairman of the board of directors of Jumelles Limited, the holding company of the Zanaga iron ore mine in the Republic of Congo.

TRACK-RECORD OF SUCCESS

Michael O’Keeffe has a track record of successful turnarounds on out-of-consensus calls

GLENCORE AUSTRALIA ('95-'04)

Group Sales

~\$100M Before ~\$2.4B After

- > Responsible for Glencore’s Australian and South Asian operations
 - > Grew group sales from ~\$100M to ~\$2.4B over his tenure
- > Acquired Cobar copper mine in 1999 for \$2M
 - > Mine was not profitable and copper prices had fallen for 5 years
 - > Glencore modified the mine plan and became profitable

RIVERSDALE MINING ('04-'11)

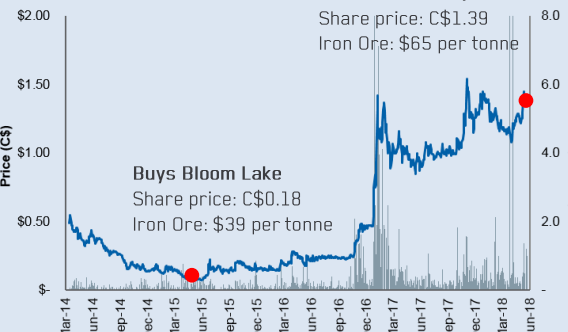

Sold to Rio Tinto
Share price: A\$16.20
Coal: \$315 per tonne

Founded
Share price: A\$0.22
Coal: \$85 per tonne

- > Founded coal group Riversdale Mining in '05, listing its shares at A\$0.22/sh
 - > Acquired BHP’s Zululand anthracite colliery for \$14M, funded with credit from BHP
 - > Repaid BHP within the year and expanded operation
- > After expanding into Mozambique, Riversdale was bought by Rio Tinto in 2011 for \$3.9bn, or A\$16.20/sh
 - > ~7,200% return to shareholders

CHAMPION

Current (June 8, 2018)
Share price: C\$1.39
Iron Ore: \$65 per tonne

Buys Bloom Lake
Share price: C\$0.18
Iron Ore: \$39 per tonne

- > Assumed control of Champion through its takeover by Mamba Minerals
- > Acquired Bloom Lake for C\$9.75M in cash and assumed liabilities of C\$42.8M
 - > Champion’s share price at the time was C\$0.18
 - > Acquired near record-low iron ore prices of ~US\$39/t
- > Since then, Champion’s share price has increased ~650% to C\$1.38 on the back of a positive mine restart

APPENDIX

TAILINGS MANAGEMENT

CHAMPION'S TAILING MANAGEMENT IS ADOPTING A CONSERVATIVE APPROACH

- > Fine and coarse tailings separation representing 12% & 88%, respectively
- > 10:1 slope for upstream dam construction vs. industry standard of 6:1
- > Fines managed with center line dam systems
- > Real time monitoring consoles + robust daily inspections and annual audits
- > Low seismic area reducing risk of events sitting on the Canadian Shield being old stable bedrock

IRON ORE VALUE CHAIN

- > Bloom Lake produces concentrate fines primarily used in sintering process, but also grinded further for pellet feed by some customers

SLINTER

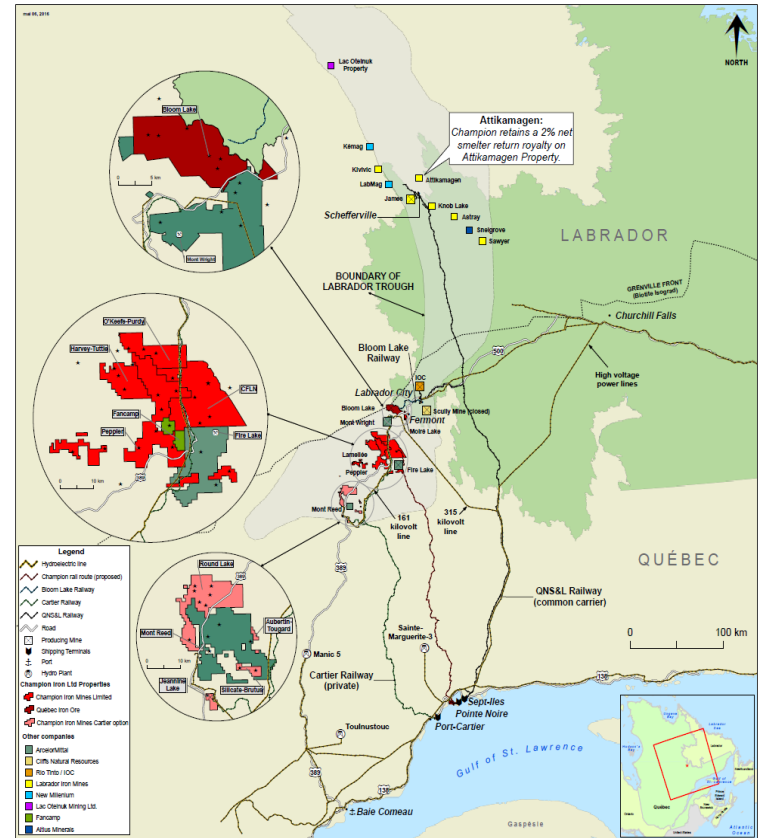

PELLETS

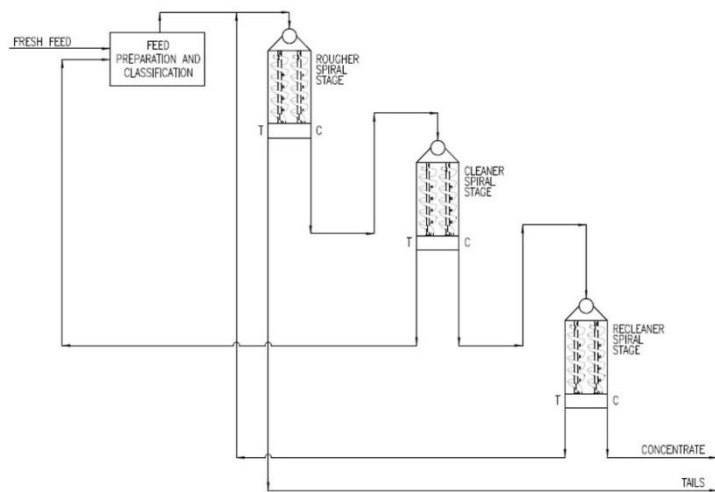

*Source: WoodMackenzie»

Mining Fleet	> Acquired entire mining fleet with capacity to mine 30Mtpa of ore/waste
Conveyor System	> New fully operational 3.45km conveyor system delivers crushed ore from the mine site to the processing facility
Processing Plant	> Two concentrators (one operative to be revamped for higher recovery plus one 70% complete for future expansion)
Rail	<ul style="list-style-type: none"> > Rail access to port consisting of three separate segments: <ul style="list-style-type: none"> > Rail spur on site (32km), that is operational and connects to the Quebec North Shore and Labrador (QNS&L) railway at the Wabush Mines facilities > QNS&L railway from Wabush to Arnaud Junction in Sept-Iles > Arnaud junction to Pointe-Noire (Sept-Iles), where the concentrate will be unloaded, stockpiled, and loaded onto vessels > Own 735 specialized iron ore railcars used to transport concentrate from Bloom Lake to Port of Sept-Iles.
Port	<ul style="list-style-type: none"> > Agreement with Government of Quebec for port area (Arnaud rail, car dumper, stacker/reclaimer) > Service agreement with Port of Sept-Iles for ship loading
Lodging	<ul style="list-style-type: none"> > As part of the purchase of the Bloom Lake mine, QIO acquired the following accommodations, which are in the town of Fermont: <ul style="list-style-type: none"> > 26 fully furnished houses > Two blocks (motels) of 99 rooms of lodging > Facilities can host up to about 700 people on a fly-in-fly-out basis
Power	<ul style="list-style-type: none"> > QIO owns a 315 kV station including two 80 MVA transformers > As part of previous expansion plans, the high voltage power lines were upgraded to be able to handle a further 30 MW > Current plans for a moderate increase in production capacity and further tailings pumping will use only a small fraction of surplus electrical power availability (68 MW authorized by Hydro-Québec)
Other	> A spare parts inventory representing a total of C\$43.6M, as estimated in October 2014 before mining operations shut down, is currently available for future operations

REGIONAL LOCATION AND INFRASTRUCTURE MAP

BLOOM LAKE UPDATED RECOVERY FLOWSHEET

INITIAL FLAW OF FLOWSHEET INSTALLED AT BLOOM LAKE

- > The rougher spirals originally used in the Bloom Lake concentrator only had five (5) turns compared to seven (7) turns spirals more commonly used in the Labrador Trough
- > No possibility for dilution at cleaner and recleaner stages feed
- > Higher than designed spiral feed rate

UPGRADED RECOVERY CIRCUIT FLOWSHEET

In addition to installing new spiral system, Mineral Technologies proposed two processing routes for the Phase 1 upgrade flowsheet:

- > A gravity-only primary case comprising rougher spirals, rougher middlings scavenging spirals, an up-current classifier (UCC) and a final UCC overflow scavenging spiral stage;
- > A bonus case serving to boost recovery of iron ore through the treatment of the gravity circuit tailings by a series of low intensity magnetic separators (LIMS) and wet high intensity magnetic separators (WHIMS).

UPDATED FEASIBILITY ECONOMICS

COMBINED PHASE I & II (JUNE 2019)

SUMMARY OF ECONOMIC PARAMETERS AND FEASIBILITY RESULTS – PHASE I & II (COMBINED)

Mining Parameters	Reserve (Mt)	807.0
	Processed Tonnage (Mtpa)	41.6
	Average Stripping Ratio (waste:ore)	0.88
	Average Fe Feed Grade (% Fe)	29.0
	Average Fe Processing Recovery (%)	82.4%
	Average Mining Dilution (%)	1.2%
	Average Recovered Concentrate (Mtpa)	15
	Mine Life (years)	20 years
Cost Parameters	Initial CAPEX, pre-production (C\$M)	589.8
	Initial CAPEX, total including deposits (C\$M)	633.8
	LOM Sustaining CAPEX (C\$M)	1,220
	LOM FOB Sept-Îles Production Costs (C\$/t dry concentrate)	46.6
	LOM OPEX FOB Sept-Îles, all-in sustaining (C\$/t dry concentrate)	52.3
	LOM freight cost (US\$/t dry concentrate)	21.54
Revenue Parameters	Gross Revenue (C\$M)	32,281
	Net Cash Flow After Taxes (C\$M)	5,186
Iron Ore Price Parameters	LOM Avg Iron Price at 66.2%Fe CFR China (US\$/t)	84.1
	Average Exchange Rate	0.76 US\$/C\$
Valuation Parameters	NPV – 8% (after-tax) (C\$M)	2,384
	IRR (after-tax)	33.4%
	Payback (after-tax) (years)	2.4

BLOOM LAKE RESERVES & RESOURCES

PHASE I (MARCH 31, 2020)

March 31, 2020 Phase I Bloom Lake Mineral Resources Estimate (at 15% Fe Cut-off)

Category	Mt Tonnage (dmt)	Fe (%)	CaO (%)	MgO (%)	Al ₂ O ₃ (%)
Measured	392.6	30.8	0.6	0.7	0.3
Indicated	471.9	28.5	2.5	2.3	0.4
M+I Total	864.5	29.6	1.6	1.6	0.3
Inferred	80.4	25.6	1.9	1.7	0.3

March 31, 2020 Phase I Bloom Lake Mineral Reserves Estimate (at 15% Fe Cut-off)

Category	Mt Tonnage (dmt)	Fe (%)	CaO (%)	MgO (%)	Al ₂ O ₃ (%)
Proven	217.0	30.4	0.5	0.5	0.3
Probable	147.6	28.7	2.8	2.7	0.4
Total	364.6	29.7	1.4	1.4	0.3

PHASE II – FEASIBILITY STUDY (JUNE/19)

Mineral Resource Estimate for Bloom Lake

Classification	Tonnage kt	Fe %	CaO %	Sat %	MgO %	Al ₂ O ₃ %
Measured	379,100	30.2	1.4	4.4	1.4	0.3
Indicated	514,400	28.7	2.5	7.7	2.3	0.4
Total M&I	893,500	29.3	2.1	6.3	1.9	0.4
Inferred	53,500	26.2	2.8	8.0	2.4	0.4

Mineral Reserve Estimate

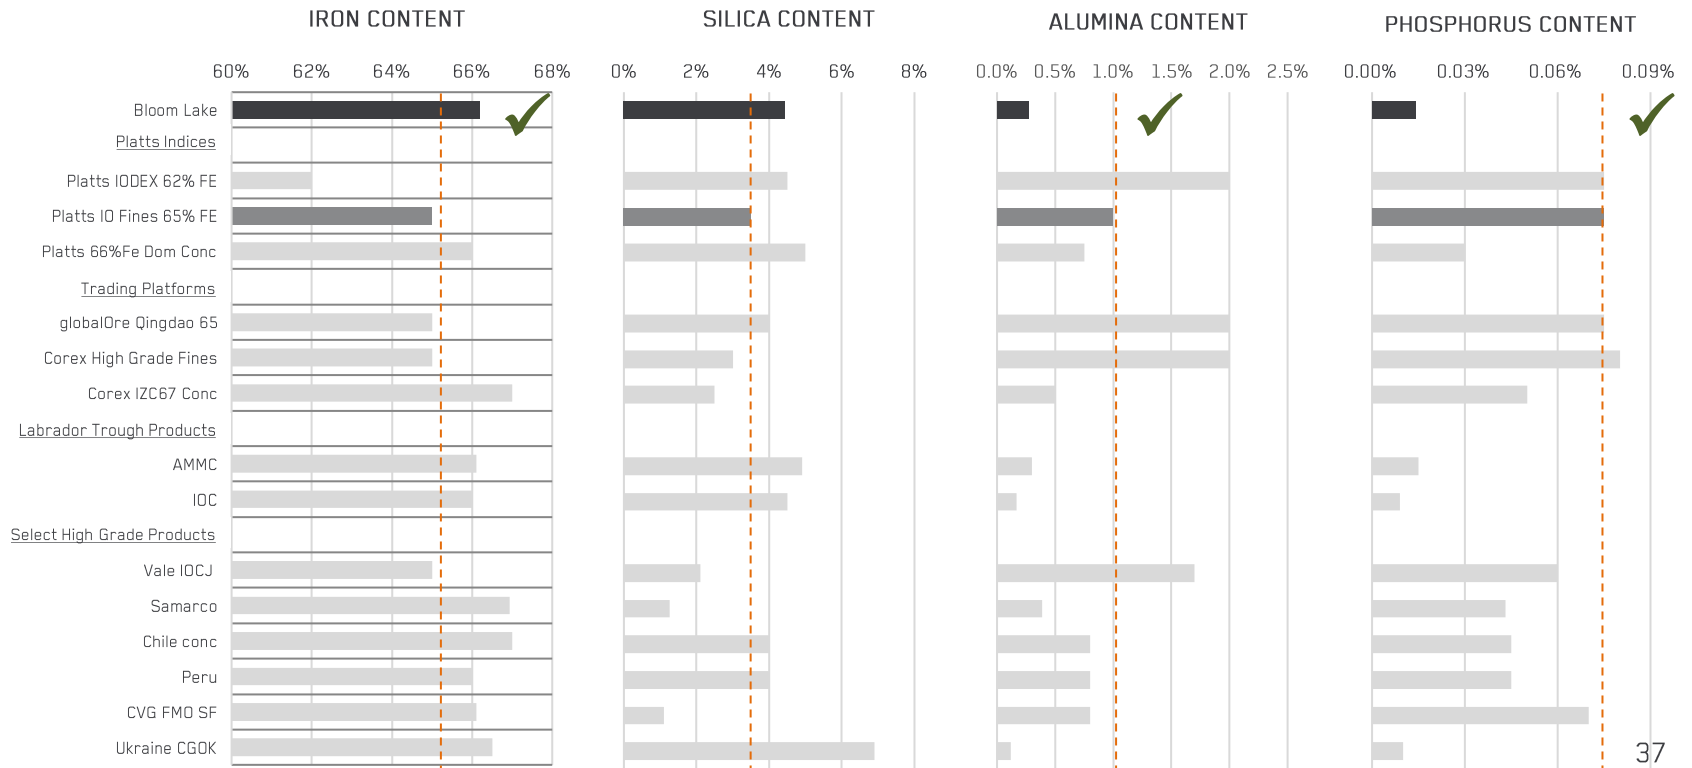

Classification	Diluted Ore Tonnage (dmt)	Fe %	CaO %	Sat %	MgO %	Al ₂ O ₃ %
Proven	346.0	29.9	1.5	4.7	1.4	0.3
Probable	461.0	28.2	2.6	7.9	2.5	0.6
Total P&P	807.0	29.0	2.2	6.5	2.0	0.5

VALUABLE AND SOUGHT-AFTER PRODUCT

HIGH-GRADE, LOW-IMPURITY PRODUCT PERMITS STEEL MILLS TO OPTIMIZE BLENDS, BALANCING LOWER-QUALITY ORES, REDUCING COSTS, INCREASING EFFICIENCY AND REDUCING CO₂ EMISSIONS

Source: Metalytics Market Study

- > Bloom Lake's concentrate product expected to be very attractive in the global high-grade fines market
- > Silica level similar to other Labrador Trough concentrates, but above the Platts index base specification, although more than offset by lower alumina and phosphorus
- > Very low levels of alumina, phosphur, and sulphur compared to other concentrates and the Platts index
- > Quite beneficial when mixed with lower quality ores when mixed during sintering process
- > History of successfully selling into China for ~4 years

BLOOM LAKE MINE COMPLEX

CHAMPION IRON 

MULTI-USER PORT

CHAMPION IRON 

STRUCTURAL IMPROVEMENTS 2018 RECOMMISSIONING

> New multi-user berth

> New 3.5km overland conveyor

> Re-engineered recovery circuit

> New tailings pumping system

THANK YOU!
