CHAMPION IRON

FINANCIAL REPORT

FOR THE HALF-YEAR ENDED
SEPTEMBER 30, 2026

DIRECTORS' REPORT

Operating and Financial Review

This following Champion Iron Limited ("Champion" or the "Company") Directors' Report has been prepared as of October 29, 2026. This Directors' Report is intended to supplement the condensed interim consolidated financial statements for the three and six-month periods ended September 30, 2026, and related notes thereto ("Financial Statements"), which have been prepared in accordance with the Australian Accounting Standards Board ("AASB") 134 / International Accounting Standards ("IAS") 34, Interim Financial Reporting, and should be read in conjunction with the Company's audited annual financial statements and Annual Report for the year ended March 31, 2026. The Financial Statements and other information pertaining to Champion are available under the Company's profile on the Australian Securities Exchange (the "ASX") at www.asx.com.au, SEDAR+ at www.sedarplus.ca and the Company's website at www.championiron.com. Champion's management team ("Management") is responsible for the preparation and integrity of the Financial Statements, including the maintenance of appropriate information systems, procedures and internal controls. Management is also responsible for ensuring that information disclosed externally, including the Financial Statements and this Directors' Report, is complete and reliable.

Unless otherwise specified, all dollar figures stated herein are expressed in millions of Canadian dollars, except for: (i) tabular amounts, which are expressed in thousands of Canadian dollars; and (ii) per share or per tonne (including dmt and wmt) amounts, which are expressed in Canadian dollars or in United States dollars, as indicated. The following abbreviations and definitions are used throughout this Directors' Report: US$ or U.S. dollar (United States dollar), C$ (Canadian dollar), Board (Board of Directors of Champion), t (tonnes), wmt (wet metric tonnes), dmt (dry metric tonnes), M (million), Mt (million tonnes), FOB (free on board), Fe (iron), LoM (life of mine), Bloom Lake or Bloom Lake Mine (Bloom Lake Mining Complex), Rana Gruber Mine (Mo i Rana Mining Complex), FID (final investment decision), IID (interim investment decision), DFS (definitive feasibility study), DR (direct reduction), DRPF (direct reduction pellet feed), Kami Project (Kamistiatusset project), P61 index (Platts IODEX 61% Fe CFR China index), P62 index (Platts IODEX 62% Fe CFR China index), P65 index (Platts IODEX 65% Fe CFR China index), C3 index (C3 Baltic Capesize index), EBITDA (earnings before income and mining taxes, net finance costs and depreciation), AISC (all-in sustaining cost) and EPS (earnings per share). References to "Champion" or the "Company" refer to Champion Iron Limited and/or one, or more, or all of its subsidiaries, as applicable, and "QIO" refers to Quebec Iron Ore Inc., the Company's wholly-owned subsidiary and the operator of Bloom Lake. The term "IFRS" refers to International Financial Reporting Standards as issued by the International Accounting Standards Board.

This Directors' Report contains forward-looking statements. Particular attention should be given to the risk factors described in the "Risk Factors" sections of the Company's 2026 Annual Report for the financial year ended March 31, 2026, and to the "Cautionary Note Regarding Forward-Looking Statements" section of this Directors' Report.

Non-IFRS and Other Financial Measures

Certain financial measures used by the Company to analyze and evaluate its results are non-IFRS financial measures or ratios and supplementary financial measures. Each of these indicators is not a standardized financial measure under IFRS and might not be comparable to similar financial measures used by other issuers. These indicators are intended to provide additional information and should not be considered in isolation or as substitutes for measures of performance prepared in accordance with IFRS. The non-IFRS and other financial measures that may be included in this Directors' Report are: EBITDA and EBITDA margin, adjusted EBITDA and adjusted EBITDA margin, adjusted net income, adjusted EPS or adjusted loss per share, available liquidity, C1 cash cost per dmt sold, mining and processing costs per dmt produced, land transportation and port handling costs per dmt sold, AISC per dmt sold, cash operating margin, cash profit margin, gross average realized selling price per dmt sold, net average realized selling price per dmt sold or net average realized FOB selling price per dmt sold, and operating cash flow per share. In addition, per mine performance measures, including C1 cash cost, AISC and net average realized selling price are non-IFRS financial measures. When applicable, a quantitative reconciliation to the most directly comparable IFRS measure is provided in section 20 — Non-IFRS and Other Financial Measures of this Directors' Report.

Cautionary Note Regarding Forward-Looking Statements

Forward-Looking Statements

This Directors' Report contains certain information and statements that may constitute "forward-looking information" under applicable securities legislation ("Forward-Looking Statements"). Forward-Looking Statements are statements that are not historical facts and are generally, but not always, identified by the use of words such as "will", "plans", "expects", "is expected", "budget", "scheduled", "estimates", "continues", "forecasts", "projects", "predicts", "intends", "anticipates", "aims", "targets" or "believes", or variations of, or the negatives of, such words and phrases or state that certain actions, events or results "may", "could", "would", "should", "might" or "will" be taken, occur or be achieved. Inherent in Forward-Looking Statements are risks, uncertainties and other factors beyond the Company's ability to predict or control.

Cautionary Note Regarding Forward-Looking Statements (continued)

Specific Forward-Looking Statements

All statements, other than statements of historical facts, included in this Directors' Report that address future events, developments or performance that Champion expects, anticipates or believes may or will occur are Forward-Looking Statements. Forward-Looking Statements include, among other things, Management's expectations regarding:

(i) Bloom Lake's LoM, long-term investment plan and efforts to improve recovery rates, production, economic and other benefits, nameplate capacity and related opportunities and benefits;

(ii) the project to upgrade the Bloom Lake iron ore concentrate to a higher purity and to convert approximately half of Bloom Lake's increased mine capacity to a DR quality pellet feed iron ore (the DRPF project), expected DRPF project timeline, including the anticipated timeline for initial saleable production and full production capacity, remaining completion expenditures and budget, pricing premiums, efficiencies, economic and other benefits, related engagement with, and expectations with respect to, prospective customers, the expected commercial shipments of iron ore, commercial production, the confirmation of DRPF product quality, expected test-cargoes and ramping-up and achieving full production capacity of the DRPF project and the impact thereof on production, sales and financial results and the timing thereof;

(iii) the Kami Project Study (including LoM), the Kami Project's potential to produce a DR grade product, DFS and its timing, stakeholder and government engagement, efficiencies and economic and other benefits and evaluation of opportunities to improve project economics;

(iv) the Kami Partnership (as defined below) with Nippon Steel Corporation and Sojitz Corporation with respect to the Kami Project, the completion of a DFS and the timing thereof, the Partners' (as defined below) contributions to support the DFS, potential IID and FID, the second closing of the Kami Transaction (as defined below) and its timing, the ability of Champion to realize on the benefits of the Kami Transaction, use of the initial cash contributions, subsequent cash contributions, future cash calls, funding thereof and the impact thereof on the Company's liquidity;

(v) the Rana Gruber Acquisition (as defined below), including the expectations regarding the integration of Rana Gruber and the ability of Champion to realize the anticipated benefits of the Rana Gruber Acquisition;

(vi) the shift in steel industry production methods, expected rising demand for higher-purity iron ore products and DRI globally and related market deficit and higher premiums, and the Company's participation therein, contribution thereto and positioning in connection therewith, including the transition of the Company's product offering (including producing high-purity DRPF products) and the expansion of its geography, markets and customer base, related investments and expected benefits thereof;

(vii) maintaining stripping activities cadence;

(viii) ore inventory management strategies, including product blending, short-term stockpiling and reducing inventory levels at Rana Gruber;

(ix) the Company's safe tailings strategy, tailings investment plan and mining equipment rebuild programs;

(x) the impact of exchange rates on commodity prices and the Company's financial results;

(xi) the relationship between iron ore prices and ocean freight costs (including C3 index outlook) and their impact on the Company;

(xii) the impact of iron ore price fluctuations on the Company and its financial results and the occurrence of certain events and their impact on iron ore prices and demand for high-purity iron ore products;

(xiii) the Company's cash requirements for the next 12 months relating primarily to sustaining capital expenditures, other capital development expenditures and DRPF ramp-up costs, capital repayments related to lease liabilities and long-term debt, and mining and income taxes, the Company's positioning to fund such cash requirements, including through operational optimization initiatives, cost reduction efforts, potential adjustments to capital expenditure programs and operating plans and potential additional sources of liquidity, and estimated future interest payments;

(xiv) legal actions, including arbitration and class actions, their potential outcome and effect on the Company's consolidated financial position;

(xv) production and recovery rates and levels, ore characteristics and the Company's performance and related strategies and work programs to optimize operations, including ore blending optimization;

(xvi) pricing of the Company's products (including provisional pricing);

(xvii) the Company's tax position and expectations regarding the absence of taxable profit to utilize losses;

(xviii) the Company's expected iron ore concentrates production and sales, mining and hauling activities and related costs;

(xix) the Company's iron ore concentrates pricing trends compared to the P65 index;

(xx) available liquidity and the Company's financial flexibility, including spending prioritization;

(xxi) the Company's beliefs regarding non-IFRS and other financial measures, including usefulness of those measures for investors to understand the Company's results and ability to generate operating earnings, compare operating results between periods, evaluate business performance, assess liquidity and cash flows to fund working capital needs and capital expenditures, and service debt obligations;

(xxii) the Company's beliefs regarding compliance with applicable laws and regulations, including that it has all necessary licenses, permits and approvals required to carry out its activities;

(xxiii) contingent production payments with respect to the Company's properties;

Cautionary Note Regarding Forward-Looking Statements (continued)

Specific Forward-Looking Statements (continued)

(xxiv) the Company's strategic and growth initiatives and opportunities generally, including that such initiatives are subject to market conditions and funding capabilities, and their potential to optimize shareholder returns, unlock value for stakeholders and reinforce the Company's leadership in the high-purity iron ore industry;

(xxv) the Company's compliance with the covenants under its credit facilities, the temporary covenant relief, enhanced covenant flexibility, amendments and waivers obtained under its credit facilities;

(xxvi) the Company's dividend policy, including the targeted distribution of 30% to 40% of trailing six-month free cash flows, and the declaration and payment of future dividends;

(xxvii) the Partners' options to exit the Kami Partnership, the related redemption obligation and the impact thereof on the Company's liquidity;

(xxviii) the Company's hedging activities and derivative instruments, including foreign exchange forward contracts entered into by QIO;

(xxix) the impact of the conflict in the Middle East, trade policy measures (including the European Union's safeguard framework and carbon border adjustment mechanism) and other geopolitical developments on iron ore demand and prices, freight and fuel costs and the Company's operations; and

(xxx) the Company's operational optimization and cost reduction initiatives and their expected benefits, and the prioritization of exploration programs.

Risks

Although the Company believes the expectations expressed in such Forward-Looking Statements are based on reasonable assumptions, such Forward-Looking Statements involve known and unknown risks, uncertainties and other factors, most of which are beyond the control of the Company, which may cause the Company's actual results, performance or achievements to differ materially from those expressed or implied by such Forward-Looking Statements. Factors that could cause actual results to differ materially from those expressed in Forward-Looking Statements include, without limitation: (i) iron ore prices; (ii) energy prices; (iii) operating costs; (iv) freight costs; (v) general economic, competitive, political and social uncertainties; (vi) continued availability of capital and financing and general economic, market or business conditions; (vii) timing of and uncertainty regarding the steel industry shift in production methods, impacting demand for high-purity feed; (viii) failure of plant, equipment or processes, including those of third-party providers or counterparties, to operate as anticipated; (ix) delays in obtaining governmental approvals, necessary permitting or in the completion of development or construction activities; (x) the results of feasibility studies; (xi) changes in the assumptions used to prepare feasibility studies; (xii) project delays; (xiii) geopolitical events, including the conflict in the Middle East; (xiv) the effects of catastrophes and public health crises on the global economy, the iron ore market and Champion's operations; (xv) the Company's ability to comply with the covenants under its credit facilities, the expiry of temporary covenant relief and the Company's ability to obtain further amendments, waivers or additional financing on acceptable terms or at all; (xvi) the ability of the DRPF project to consistently produce product meeting customer quality specifications and the acceptance of DRPF product by customers; (xvii) trade policies, tariffs, safeguard measures and carbon border adjustment mechanisms; (xviii) fluctuations in foreign exchange rates and the effectiveness of, and counterparty risk under, the Company's hedging arrangements; (xix) the exercise by the Partners of their options to exit the Kami Partnership; and (xx) risks relating to the integration of Rana Gruber and the realization of the anticipated benefits of the Rana Gruber Acquisition, as well as those factors discussed in the section entitled "Risk Factors" of the Company's MD&A for the financial year ended March 31, 2026, available under the Company's profile on the ASX at www.asx.com.au, SEDAR+ at www.sedarplus.ca and its website at www.championiron.com.

There can be no assurance that any such Forward-Looking Statements will prove to be accurate as actual results and future events could differ materially from those anticipated in such Forward-Looking Statements. Accordingly, readers should not place undue reliance on Forward-Looking Statements.

Additional Updates

All of the Forward-Looking Statements contained in this Directors' Report are given as of the date hereof or such other date or dates specified in the Forward-Looking Statements and are based upon the opinions and estimates of Champion's Management and information available to Management as at the date hereof. Champion disclaims any intention or obligation to update or revise any of the Forward-Looking Statements, whether as a result of new information, future events or otherwise, except as required by law or the listing rules of any stock exchange on which the Company's securities are listed, including the Company's continuous disclosure obligations under the ASX Listing Rules and applicable Canadian securities laws. If the Company does update one or more Forward-Looking Statements, no inference should be drawn that it will make additional updates with respect to those or other Forward-Looking Statements. Champion cautions that the foregoing list of risks and uncertainties is not exhaustive. Readers should carefully consider the above factors as well as the uncertainties they represent and the risks they entail.

1. Description of Business

Champion was incorporated under the laws of Australia in 2006 and is dual-listed on the Australian Securities Exchange (ASX: CIA) and the Toronto Stock Exchange (TSX: CIA), and trades on the OTCQX Best Market (OTCQX: CIAFF).

Champion is a high-purity iron ore producer with operations in Canada and Norway. Through Quebec Iron Ore Inc., Champion owns and operates the Bloom Lake Mining Complex located on the south end of the Labrador Trough, approximately 13 kilometres north of Fermont, Québec. Bloom Lake is an open-pit operation with two concentration plants that primarily source energy from renewable hydroelectric power, having a combined nameplate capacity of 15 million wmt per year that produce low contaminant high-purity iron ore concentrates with a proven ability to produce direct reduction grade quality iron ore concentrate. The iron ore concentrate from Bloom Lake is transported by rail to a ship loading port in Sept-Îles, Québec. Benefiting from one of the highest purity resources globally, Champion has completed the construction of the DRPF project, which is designed to upgrade up to half of Bloom Lake's mine capacity to a direct reduction quality pellet feed iron ore with up to 69% Fe, and is currently progressing through its commissioning and ramp-up phase. Bloom Lake's high-purity and lower contaminant iron ore products have attracted a premium to the P61 index (formerly, the P62 index). Champion also owns and operates Rana Gruber AS ("Rana Gruber"), a Norwegian iron ore producer based in Mo i Rana, Nordland. With continuous production dating back to the 1960s, Rana Gruber produces approximately 1.8 million dmt per year of hematite and magnetite iron ore concentrates. Champion has delivered iron ore concentrates to global markets, including China, Japan, the Middle East, Europe, South Korea, India, Southeast Asia, North Africa and Canada. In addition to its producing mines, Champion holds a 51% interest in Kami Iron Mine Partnership (the "Kami Partnership"), which is jointly owned with Nippon Steel Corporation ("Nippon Steel") and Sojitz Corporation ("Sojitz", and collectively with Nippon Steel, the "Partners"), and through which the Kami Project is held. Located approximately 21 kilometres southeast of Bloom Lake, the Kami Project benefits from access to existing infrastructure. Champion also holds a portfolio of exploration and development projects in the Labrador Trough, including the Cluster II properties, which are situated within 60 kilometres south of Bloom Lake.

2. Rana Gruber Acquisition

Rana Gruber is a Norwegian iron ore producer operating both an underground mine and a nearby open pit. Its operations are integrated with a public railway network connecting the mine to a coastal processing plant and dedicated port facilities. Rana Gruber produces hematite iron ore concentrates, primarily for European steelmakers, as well as a high-purity magnetite concentrate mostly used in industrial applications. Benefiting from access to renewable power, Rana Gruber maintains a low carbon production profile.

On April 10, 2026, Champion acquired 92.48% of the issued and outstanding shares of Rana Gruber and completed the compulsory acquisition of the remaining shares in April 2026, resulting in 100% ownership (the "Rana Gruber Acquisition"). The Rana Gruber Acquisition impacts the comparability of the Company's current financial results with those of prior periods. Following the Rana Gruber Acquisition, Champion aligned Rana Gruber's financial information and reporting metrics with its reporting practices. Accordingly, caution should be exercised when comparing current-period results with Rana Gruber's historical results reported prior to the Rana Gruber Acquisition, as well as with Champion's previous results. Additional details on the Rana Gruber Acquisition are provided in note 3 to the Financial Statements.

3. Consolidated Financial and Operating Highlights

	Three Months Ended September 30,			Six Months Ended September 30,		
	2026	2025	Variance	**2026**	2025	Variance

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

[2] See the "Currency" subsection included in section 6 — Key Drivers of this Directors' Report.

4. Consolidated Quarterly Highlights

Operations and Sustainability

- No serious workplace injuries and no significant environmental incidents were reported during the three-month period ended September 30, 2026;
- Quarterly production totalled 3.9 million wmt of high-purity iron ore concentrates for the three-month period ended September 30, 2026, up 9% over the same prior-year period, attributable to the contribution from Rana Gruber (0.5 million wmt), partially offset by the lower production volumes at Bloom Lake (3.3 million wmt) which were impacted by inefficiencies created by the DRPF commissioning activities, consistent with management's expectations for the commissioning period;
- Record consolidated quarterly sales of 4.5 million dmt of high-purity iron ore concentrates for the three-month period ended September 30, 2026, an increase of 17% over the same prior-year period, driven by strong sales volumes at Bloom Lake (3.9 million dmt) and from Rana Gruber (0.6 million dmt), resulting in lower inventory levels across both operations; and
- Completed the inaugural commercial shipment of DRPF product during the quarter, secured additional test-cargoes and commercial agreements for shipments scheduled for the third quarter of the 2027 financial year and continued to advance discussions with prospective customers. While DRPF production volumes remained comparable quarter-over-quarter, average product quality continued to improve towards the project's target specifications.

Financial Results

- Financial results for the quarter continued to be impacted by lower iron ore indexes, higher ocean freight rates and elevated fuel prices, partly resulting from the conflict in the Middle East, as well as DRPF start-up costs;
- Revenues of $403.9 million for the three-month period ended September 30, 2026, compared to $492.9 million for the same period in 2025, attributable to lower net realized selling prices reflecting recently depressed iron ore and freight market conditions, partially offset by higher sales volumes;
- C1 cash cost for the iron ore concentrates loaded onto vessels totalled $82.9/dmt[1] (US$59.2/dmt)[2] for the three-month period ended September 30, 2026, up from $76.2/dmt[1] (US$55.3/dmt)[2] for the same period in 2025. C1 cash cost for the period continued to be affected by elevated fuel prices impacting mining operations, the transition toward DRPF production and its higher processing costs, and lower production volumes at Bloom Lake over which to amortize fixed costs;
- Net loss totalled $48.4 million (adjusted net loss of $34.3 million[1]) for the three-month period ended September 30, 2026, representing a $0.09 loss per share (adjusted loss per share of $0.06[1]), compared to net income of $56.8 million (adjusted net income of $56.8 million[1]) and EPS of $0.11 (adjusted EPS of 0.11[1]) for the same period in 2025. In addition to the gross loss, which included DRPF project start-up costs of $6.9 million and inventory valuation adjustments of $4.8 million related to the Rana Gruber Acquisition, the net loss for the period was also impacted by unfavourable fair value adjustments of $0.8 million on derivative instruments;
- EBITDA of $3.7 million[1] (adjusted EBITDA of $23.3 million[1]) for the three-month period ended September 30, 2026, down from $174.8 million[1] (adjusted EBITDA of $174.8 million[1]) for the same period in 2025. Adjusted EBITDA excludes several items, including DRPF start-up costs of $6.9 million, inventory valuation adjustments of $4.8 million related to the Rana Gruber Acquisition and $7.9 million unrealized fair value losses on derivative instruments;
- Net cash flows from operating activities totalled $82.4 million for the three-month period ended September 30, 2026, compared to $121.0 million for the same period in 2025, primarily reflecting lower gross profit, partially offset by favourable changes in non-cash operating working capital;
- Cash balance, excluding the unused portion of the initial cash contributions from Nippon Steel and Sojitz that are held by the Kami Partnership, totalled $214.4 million as at September 30, 2026, an increase of $15.7 million since June 30, 2026. This primarily reflects robust sales volumes, including the destocking of iron ore inventories, and strong cash collections, partially offset by sustaining capital expenditures; and
- Available liquidity of $618.4 million[1] as at September 30, 2026, compared to $653.1 million[1] as at June 30, 2026.

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

[2] See the "Currency" subsection included in section 6 — Key Drivers of this Directors' Report.

5. DRPF Project Update

The DRPF project is designed to upgrade half of Bloom Lake's capacity to a DR quality pellet feed iron ore grading up to 69% Fe, with combined silica and alumina content below 1.2%. Benefiting from a rare high-purity resource, Bloom Lake is positioned to supply one of the highest quality DRPF products available on the seaborne market, which the Company believes may attract a pricing premium over its high-purity 66.2% Fe iron ore concentrate, although there can be no assurance as to the level or timing of any such premium. Construction of the DRPF project was completed within the recently estimated $500 million budget, with cumulative investments of $497.0 million as at September 30, 2026, and only operational ramp-up costs are anticipated to be incurred going forward.

The project achieved a key commissioning milestone in March 2026 with the successful completion of initial production tests, marking the first tonnes of DR quality iron ore pellet feed production. During the three-month period ended September 30, 2026, average product quality continued to improve towards the project's target specifications while commissioning activities progressed as planned, positioning the Company to achieve commercial production toward the end of the current financial year.

The integration of the DRPF project and its ramp-up toward commercial production capacity over the coming months may continue to affect operational efficiencies at Bloom Lake and influence the timing of iron ore shipments in future periods. Accordingly, the Company continues to evaluate and optimize its iron ore inventory management strategies, which may include product blending and the short-term stockpiling of different iron ore concentrate qualities. Until Champion consistently delivers a DRPF product that meets customer quality specifications, a portion of production may be sold into the spot market. Additionally, existing commercial commitments for Bloom Lake's high-purity iron ore concentrate will influence the sequencing of DR quality iron ore production and sales volumes. Accordingly, the Company does not expect to fully benefit from DRPF premiums or freight savings during the ramp-up period.

During the three-month period ended September 30, 2026, the Company completed its inaugural commercial shipment of DR quality iron ore, marking an important milestone in the commercialization of the DRPF project. The Company confirmed additional test-cargoes and commercial agreements for shipment during the third quarter of the 2027 financial year and continues to advance discussions with other prospective customers.

6. Key Drivers

Iron Ore Concentrate Price

The price of iron ore concentrate is a critical factor influencing the Company's financial performance and is influenced by market factors beyond the Company's control. Due to the high-purity properties of its iron ore products, the Company's sales are primarily linked to the P65 index, which has historically attracted a premium over the P61 index (formerly, the P62 index), reflecting the productivity and emissions-reduction benefits associated with higher-grade iron ore products. A smaller portion of Champion's sales is priced based on the P61 index and other commercial contracts not linked to primary iron ore indices.

During the three-month period ended September 30, 2026, the P65 index averaged US$112.8/dmt, representing a decrease of 4% year-over-year and 7% quarter-over-quarter. Iron ore prices remained resilient through the first half of the quarter, extending the strength observed in preceding months. Iron ore prices held within a narrow range throughout the period, underpinned by persistent cost inflation, as elevated bunker and fuel prices arising from the conflict in the Middle East continued to inflate landed costs across the industry. The seaborne market remained well supplied, with Brazilian iron ore export volumes near the upper end of their historical seasonal range, Australian shipments remaining at elevated levels and West African output continuing to ramp up. Set against this, Chinese hot metal output remained below previous-year levels, apparent steel consumption contracted and the share of profitable mills declined markedly as raw material costs outpaced steel prices. State-directed procurement in China remained a feature of the market, with purchasing restrictions and outstanding term settlements adding uncertainty to seaborne trade flows and pricing. In parallel, iron ore port inventories in China eased modestly but remained well above seasonal historical averages.

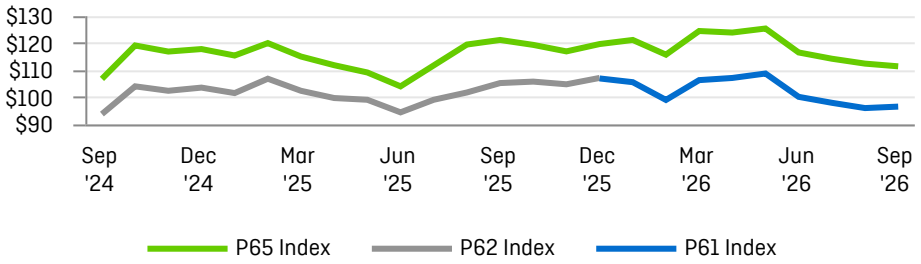

According to the World Steel Association[1], global crude steel production declined by 0.6% year-over-year for the three-month period ended September 30, 2026, totalling 436.1 million tonnes. China accounted for most of the decline, with output down 2.9% year-over-year since the beginning of the year as new property starts fell sharply and infrastructure investment slowed while discipline remained a policy priority. Middle Eastern output recorded the steepest regional decline, reflecting conflict-related disruptions, while production growth in India, the United States and South Korea partially offset these decreases. Meanwhile, the European Union's revised safeguard framework took effect on July 1, 2026, halving the duty-free import quota and doubling the out-of-quota tariff to 50%. Combined with the carbon border adjustment mechanism, these measures supported regional prices, margins and output, primarily by displacing imports rather than through a recovery in end-use demand, with construction and industrial activity still lagging.

6. Key Drivers (continued)

Iron Ore Concentrate Price (continued)

Average Monthly US$ Spot Price of Iron Ore Fines per dmt (as per Platts IODEX Index)

The following table details the Company's gross revenue exposure, as at September 30, 2026, subject to movements in iron ore prices for the provisionally priced sales volume:

	As at September 30, 2026
Dry metric tonnes subject to provisional pricing adjustments	**3,416,200**
(in thousands of U.S. dollars)	
10% increase in iron ore prices	**35,323**
10% decrease in iron ore prices	**(35,323)**

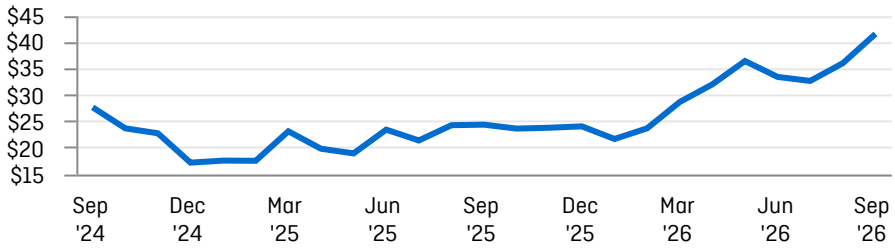

These sensitivities demonstrate the monetary impact on gross revenues in U.S. dollars resulting from a 10% increase and 10% decrease in gross realized selling prices as at September 30, 2026, while holding all other variables constant, including foreign exchange rates. The relationship between iron ore prices and exchange rates is complex, and movements in exchange rates can impact net realized selling price in Canadian dollars. The above sensitivities should, therefore, be used with caution.

Sea Freight

Sea freight is an important component of the Company's cost structure, as most iron ore concentrates are sold to overseas markets. The C3 index, which measures freight rates between Tubarao (Brazil) and Qingdao (China), is the primary benchmark used to assess ocean freight costs in the iron ore market. Since no equivalent index exists for the routes between the Company's operating mines and end markets, Champion's freight costs are primarily derived from the C3 index and adjusted for customer destinations, seasonality and other market factors. As a result, realized freight costs are generally higher than the C3 index and may also be impacted by seasonal ice premiums, particularly during the fourth financial quarter.

When contracting vessels on the spot market, Champion typically books the majority of its vessels three to five weeks prior to the desired laycan period due to its distance from main shipping hubs. Although this creates a delay between the freight paid and the C3 index, the effect of this delay is eventually reconciled since Champion ships its high-purity iron ore concentrates uniformly throughout the year. Additionally, from time to time, the Company enters into freight agreements based on an agreed-upon premium above the loading month average C3 index, or into fixed-price freight contracts, to further mitigate price volatility.

Average Monthly US$ Sea Freight Cost per wmt – C3 Baltic Capesize Index (Brazil to China)

6. Key Drivers (continued)

Sea Freight (continued)

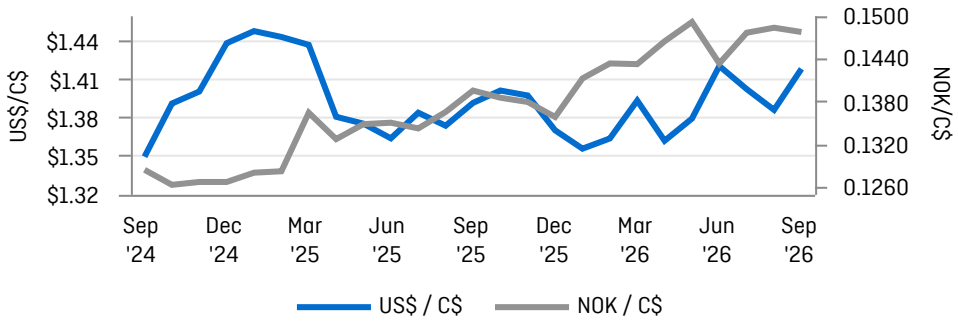

During the three-month period ended September 30, 2026, the C3 index averaged US$36.8/t, up 57% year-over-year and 8% quarter-over-quarter. The increase was driven by tonne-mile demand as much as by cost inflation. Robust Brazilian iron ore exports and rising West African iron ore and bauxite shipments tightened Capesize tonnage supply in the Atlantic basin, while coal mine closures in China increased seaborne coal import requirements. The Middle East conflict continued to drive bunker fuel costs higher, while typhoon-related port congestion in the Pacific and an elevated sequence of aging vessels requiring dry docking further reduced effective tonnage availability. As a result, the spread between the C3 and other freight routes widened materially year-over-year, increasing the share of freight in the Company's delivered price in China.

Currency

The Canadian dollar is the Company's functional and reporting currency. The Company is exposed to foreign exchange fluctuations as the majority of its sales, sea freight costs, long-term debt and lease liabilities are denominated in U.S. dollars. Consequently, the Company's operating results and cash flows are affected by fluctuations in the Canadian dollar to U.S. dollar exchange rate. A strengthening of the U.S. dollar would have a positive impact on the Company's net income and cash flows, while a strengthening of the Canadian dollar would have a negative impact. Following the Rana Gruber Acquisition, the Company is also exposed to fluctuations in the Norwegian krone as the majority of Rana Gruber's expenses are denominated in this currency. While movements in the Norwegian krone may also affect the Company's operating and financial results, the associated exposure is less significant than its exposure to the U.S. dollar.

As a significant portion of the Company's long-term debt and lease liabilities are denominated in U.S. dollars and, to a lesser extent, Norwegian krone, foreign exchange fluctuations also result in non-cash revaluation adjustments, impacting its financial results. However, the Company typically maintains a cash balance and has trade receivables in U.S. dollars, which partially mitigate its foreign exchange exposure. Assuming a stable selling price, a variation of C$0.01 against the U.S. dollar would impact gross revenues by approximately 1%. Similarly, assuming a stable long-term debt balance, a variation of C$0.01 against the U.S. dollar would impact debt revaluation by approximately 1%.

Monthly Closing Exchange Rates

Exchange rates were as follows:

Key Drivers Related to Derivatives

Rana Gruber holds a number of hedging instruments related to iron ore concentrate prices, sea freight, foreign exchange rates and electricity prices. Moreover, in May 2026, QIO entered into foreign exchange forward contracts to hedge its anticipated exposure to fluctuations in the US$/C$ exchange rate through May 2027. Further information regarding the Company's derivative instruments is outlined in note 20 to the Financial Statements.

6. Key Drivers (continued)

Apart from these key drivers and the risk factors that are described in the "Risk Factors" section of the Company's Annual Report for the financial year ended March 31, 2026, and the matters described in section 11 — Financial Position (including under "Liquidity") of this Annual Report, Management is not aware of any other trends, commitments, events or uncertainties that would have a material effect on the Company's business, financial condition or results of operations.

7. Financial and Operating Performance

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

[2] See the "Currency" subsection included in section 6 — Key Drivers of this Directors' Report.

7. Financial and Operating Performance (continued)

A. Consolidated Revenues (continued)

Second Quarter of the 2027 Financial Year vs. Second Quarter of the 2026 Financial Year

Revenues totalled $403.9 million for the three-month period ended September 30, 2026, down $89.0 million from $492.9 million in the same prior-year period, despite the contribution of $54.3 million from Rana Gruber's operations. The decrease in Bloom Lake revenues was attributable to lower net realized selling prices, reflecting elevated C3 index and lower iron ore indexes, as well as less favourable provisional pricing adjustments, compared to the same period in 2025.

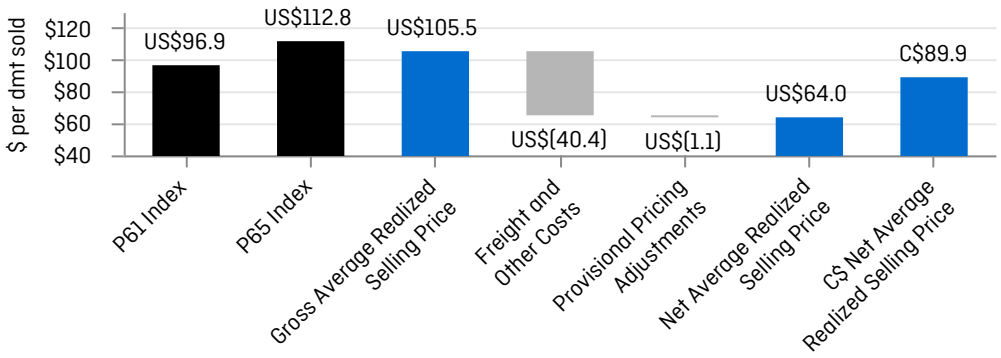

For the three-month period ended September 30, 2026, the gross average realized selling price of US$105.5/dmt[1] was below the P65 index average price of US$112.8/dmt. The 3.4 million dmt of iron ore sold that remained subject to pricing adjustments as at September 30, 2026, were evaluated using a weighted average forward selling price of US$103.4/dmt, which was lower than the P65 index average price for the period. The discount to the P65 index also reflected continued exposure to short-term and spot market sales at discounted pricing during Bloom Lake's transition to higher-purity DR quality iron ore products. This was partially offset by Bloom Lake's concentrate sales priced using backward-looking mechanisms, where applicable index prices were above the P65 index average price of the period.

Freight and other costs totalled US$40.4/dmt during the three-month period ended September 30, 2026, representing a 39% increase compared to US$29.1/dmt in the same prior-year period. While the C3 index increased significantly during the quarter, the Company's freight and other costs rose at a slower pace, reflecting its vessel booking strategy and the benefit of favourable freight rates secured under fixed-price contracts for a portion of the sales volumes, at below prevailing market levels. The rise in the C3 index, driven in part by the ongoing conflict in the Middle East outlined in section 6 — Key Drivers, is expected to continue impacting Champion's net revenues in future months, as most vessels are booked three to five weeks prior to the desired laycan period.

During the three-month period ended September 30, 2026, an average final price of US$108.1/dmt was established for the 2.1 million dmt of iron ore concentrates sold that were subject to provisional pricing adjustments as at June 30, 2026, which were previously evaluated using an average estimated price of US$110.4/dmt. Accordingly, negative provisional pricing adjustments of $6.5 million (US$4.8 million) were recorded on tonnes subject to provisional pricing as at June 30, 2026, representing a negative impact of US$1.1/dmt for the 4.5 million dmt sold during the quarter.

After taking into account sea freight and other costs of US$40.4/dmt and the negative provisional pricing adjustments of US$1.1/dmt, the Company obtained a net average realized selling price of US$64.0/dmt[2] (C$89.9/dmt[1]) for its high-purity iron ore concentrates shipped during the three-month period ended September 30, 2026.

Q2 FY2027 Net Average Realized Selling Price

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

[2] See the "Currency" subsection included in section 6 — Key Drivers of this Directors' Report.

7. Financial and Operating Performance (continued)

A. Consolidated Revenues (continued)

First Six Months of the 2027 Financial Year vs. First Six Months of the 2026 Financial Year

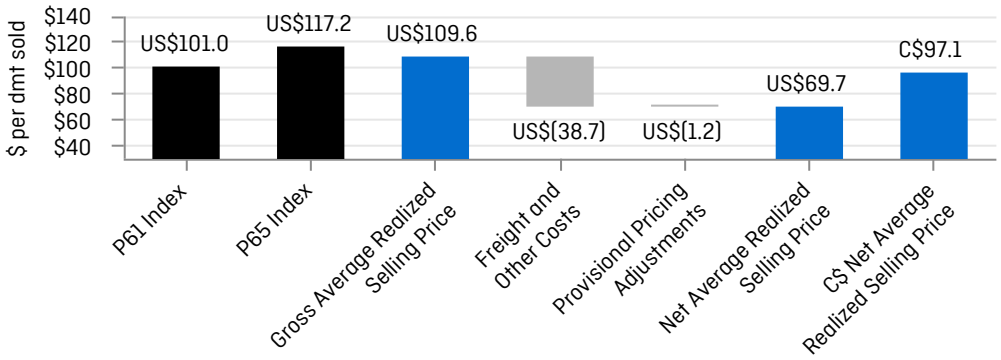

Revenues totalled $760.8 million for the six-month period ended September 30, 2026, including $78.2 million from Rana Gruber following the completion of its acquisition in April 2026. This represented a decrease of $122.1 million, compared to revenues of $882.9 million in the corresponding prior-year period, primarily reflecting lower net realized selling prices and reduced Bloom Lake sales volumes. The prior-year period benefited from a significant reduction in stockpiled iron ore concentrate inventories which supported higher sales volumes.

The Company sold its product at a gross average realized selling price of US$109.6/dmt[1] for the six-month period ended September 30, 2026, below the P65 index average price of US$117.2/dmt for the period. As part of the planned transition toward commercializing a higher purity DRPF product, Champion reduced the volume of iron ore concentrate sold under long-term sales contracts, retaining a greater proportion of its iron ore concentrate production for short-term and spot markets, where pricing has been more volatile and discounts have been more pronounced.

Freight and other costs for the six-month period ended September 30, 2026, totalled US$38.7/dmt, an increase of 38% compared to the previous year. This increase was lower than the year-over-year rise in the average C3 index, reflecting favourable pricing under fixed-price contracts entered into during the previous calendar year, as well as the positive impact of backward-looking pricing mechanisms.

After accounting for sea freight and other costs of US$38.7/dmt and negative provisional pricing adjustments of US$1.2/dmt, the Company achieved a net average realized selling price of US$69.7/dmt[2] (C$97.1/dmt)[1] for its high-purity iron ore concentrates sold during the period.

FY2027 Net Realized Selling Price

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

[2] See the "Currency" subsection included in section 6 — Key Drivers of this Directors' Report.

7. Financial and Operating Performance (continued)

B. Bloom Lake Mine Results

Bloom Lake conducts scheduled maintenance on both plants in the second and fourth financial quarters, which may create significant quarter-over-quarter variances in production output and mining and processing costs.

	Three Months Ended September 30,			Six Months Ended September 30,		
	2026	2025	Variance	**2026**	2025	Variance

Second Quarter of the 2027 Financial Year vs. Second Quarter of the 2026 Financial Year

i. Operating Performance

Bloom Lake produced 3.3 million wmt of high-purity iron ore concentrates during the three-month period ended September 30, 2026, a decrease of 6% compared to 3.6 million wmt produced during the same period in 2025, reflecting inefficiencies from the ongoing commissioning of the DRPF project. Quarterly production included 0.6 million wmt of concentrate produced through the DRPF project, comparable quarter-over-quarter, with average product quality progressively improving towards targeted purity specifications in accordance with the commissioning process. As a result, the weighted average product grade increased to 66.7% Fe from 66.5% Fe year-over-year. During the three-month period ended September 30, 2026, the Fe recovery rate decreased to 78.2% from 79.6% for the same period in 2025, primarily attributable to higher iron ore losses to tailings associated with DRPF operations.

Iron ore concentrate sales volumes exceeded production, with 3.9 million dmt sold during the three-month period ended September 30, 2026, as Bloom Lake recovered from shipment delays experienced in the previous quarter caused by the DRPF project commissioning activities. As a result, inventories of iron ore concentrates at Bloom Lake and at the Port of Sept-Îles decreased to 1.0 million wmt as at September 30, 2026, compared to 1.7 million wmt as at June 30, 2026. As Bloom Lake advances the commissioning of the DRPF project, it continues to optimize its inventory management strategies to manage different iron ore concentrate qualities and enhance production and sales logistics.

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

7. Financial and Operating Performance (continued)

B. Bloom Lake Mine Results (continued)

Second Quarter of the 2027 Financial Year vs. Second Quarter of the 2026 Financial Year (continued)

i. Operating Performance (continued)

During the three-month period ended September 30, 2026, Bloom Lake mined and hauled 21.7 million wmt of waste and ore, compared to 22.9 million wmt in the same prior-year period. The stripping ratio for the three-month period ended September 30, 2026, was 1.21, consistent with its LoM plan, compared to a 1.29 ratio recorded in the same prior-year period.

ii. Financial Performance

The cost of sales associated with Bloom Lake operations totalled $329.2 million, compared to $293.4 million for the same period in 2025. For the three-month period ended September 30, 2026, mining and processing costs totalled $60.5/dmt produced[1], representing a 14% increase, compared to $52.9/dmt produced[1] in the same prior-year period, primarily attributable to higher fuel prices arising from the conflict in the Middle East, the transition toward DRPF production and its higher processing costs, and lower production volumes over which to amortize fixed costs. Land transportation and port handling costs include both fixed and variable components and are significantly influenced by the volume hauled from Fermont to the Port of Sept-Îles. For the three-month period ended September 30, 2026, these costs totalled $24.1/dmt sold[1], consistent with the prior-year period, due to similar sales volumes. In addition, cost of sales was impacted by changes in iron ore concentrates inventory valuation, which incorporate mining and processing costs from the previous quarter, along with variations in production and sales volumes. Consequently, Bloom Lake C1 cash cost totalled $82.5/dmt[1], compared to $76.2/dmt[1] for the same period in 2025. C1 cash cost excludes DRPF start-up costs, which mainly include abnormal operational costs incurred as the facility progresses toward commercial production.

Gross loss totalled $27.3 million during the three-month period ended September 30, 2026, compared to gross profit of $155.0 million for the same period in 2025. This gross loss was mainly attributable to lower net realized selling prices combined with higher cost of sales, resulting in lower gross margins on each tonne sold.

AISC totalled $94.4/dmt[1] for the three-month period ended September 30, 2026, in line with the same prior-year period as higher cash costs were offset by lower sustaining capital expenditures, reflecting the phasing of infrastructure-related investments and the optimization of capital allocation in response to current market conditions.

First Six Months of the 2027 Financial Year vs. First Six Months of the 2026 Financial Year

i. Operating Performance

Bloom Lake produced 6.9 million wmt of high-purity iron ore concentrates during the six-month period ended September 30, 2026, representing a decrease of 3% compared to the previous year, primarily attributable to anticipated DRPF project commissioning activities. Production benefited from a Fe recovery rate of 78.6% for the six-month period ended September 30, 2026, compared to 78.9% in the previous year. The iron ore head grade was 29.9% for the six-month period ended September 30, 2026, consistent with the LoM head grade average and up from the previous year's 28.9% head grade average.

Sales volumes reached 7.0 million dmt for the six-month period ended September 30, 2026, representing a decrease of 8% compared to the previous year, as the prior-year period benefited from strong sales volumes supported by the drawdown of stockpiled inventory.

Bloom Lake mined and hauled 41.5 million wmt of material during the six-month period ended September 30, 2026, compared to 43.9 million wmt in the corresponding prior-year period, consistent with the execution of the LoM plan. This resulted in a stripping ratio of 1.12 for the six-month period ended September 30, 2026, down from a stripping ratio of 1.19 recorded for the same period in the previous year.

ii. Financial Performance

For the six-month period ended September 30, 2026, the cost of sales of Bloom Lake totalled $596.7 million with a C1 cash cost of $82.9/dmt[1], compared to $607.3 million with a C1 cash cost of $79.1/dmt[1] for the previous year. Mining and processing costs for the 6.7 million dmt produced in the six-month period ended September 30, 2026, totalled $57.4/dmt produced[1], compared to $53.3/dmt produced[1] in the previous year, mainly reflecting higher fuel and explosives prices. Land transportation and port handling costs for the six-month period ended September 30, 2026, were $27.0/dmt sold[1], compared to $24.3/dmt sold[1] for the previous year. This increase was mainly due to lower sales volumes which negatively impacted fixed port handling costs at the Sept-Îles port yard facilities, and volume discounts from lower tonnage hauled. The C1 cash cost was also impacted by changes in iron ore concentrate inventory valuation, which incorporate mining and processing costs from the previous quarters, along with variations in production and sales volumes.

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

7. Financial and Operating Performance (continued)

B. Bloom Lake Mine Results (continued)

First Six Months of the 2027 Financial Year vs. First Six Months of the 2026 Financial Year (continued)

Gross profit totalled $0.1 million during the six-month period ended September 30, 2026, compared to $184.9 million for the same period in 2025, mainly due to lower sales volumes, lower net realized selling prices and higher cash costs.

AISC totalled $98.9/dmt[1] for the six-month period ended September 30, 2026, compared to $93.6/dmt[1] for the same prior-year period. The increase in AISC mostly reflected higher cash costs, lower sales volumes and higher sustaining capital expenditures, primarily attributable to stripping and mining activities and overhaul expenditures on mining equipment. The timing of planned sustaining activities for the current financial year also resulted in a higher proportion of expenditures being incurred in the first half of the financial year.

C. Rana Gruber Mine Results

Comparisons of unit costs across Champion's operating segments should be interpreted in the context of distinct production methods, processing operations and logistics infrastructure associated with each site.

At Bloom Lake, the distance between the mine site and the Port of Sept-Îles results in transportation and handling costs being incurred primarily during the haulage of iron ore concentrates and are therefore categorized as land transportation and port handling costs.

At Rana Gruber, the proximity of the processing facility to the port means that a greater proportion of handling costs are incurred prior to the production of iron ore concentrates and are included in mining and processing costs, while land transportation costs are limited due to the significantly shorter rail haulage distance, compared to Bloom Lake.

The following Rana Gruber results have been consolidated since the acquisition date in April 2026, and accordingly year-to-date results represent less than a full six-month period of operations.

	Three Months Ended September 30,	Six Months Ended September 30,
	2026	**2026**

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

7. Financial and Operating Performance (continued)

C. Rana Gruber Mine Results (continued)

Second Quarter of the 2027 Financial Year vs. Second Quarter of the 2026 Financial Year

i. Operating Performance

Rana Gruber produced 0.5 million wmt of high-purity iron ore concentrates at a weighted average grade of 65.0% Fe during the three-month period ended September 30, 2026. Production during the quarter benefited from higher mill throughput of 1.3 million wmt following the annual maintenance shutdown completed in June 2026, together with a higher head grade of 32.8% Fe and Fe recovery of 76.3%.

Iron ore concentrates sales totalled 0.6 million dmt during the quarter, exceeding production levels, primarily due to the timing of shipments and the reduction of magnetite inventories. As a result, inventories of iron ore concentrates decreased to 0.3 million wmt as at September 30, 2026, from 0.4 million wmt as at June 30, 2026.

ii. Financial Performance

During the three-month period ended September 30, 2026, cost of sales totalled $54.9 million, while C1 cash cost amounted to $85.3/dmt sold[1], lower than the previous quarter. Cost of sales for the period included mining and processing costs of $34.5 million, land transportation and port handling costs of $0.9 million, a $14.6 million change in iron ore concentrates inventories and a purchase price allocation inventory adjustment of $4.8 million. Mining and processing costs totalled $67.9/dmt produced[1] and benefited from higher production levels, improved control over consumable usage and ongoing cost optimization efforts. These favourable impacts were partially offset by persistently higher diesel and explosives prices during the quarter. Land transportation and port handling costs totalled $1.6/dmt sold[1] and benefited from a one-time reimbursement resulting from the resolution of historical public railway fee claims. C1 cash cost excludes inventory adjustments made as part of the purchase price allocation, as it reflects the fair value step-up of inventories recognized as part of the Rana Gruber Acquisition and is not representative of the underlying operating cost of producing and selling iron ore concentrates.

Gross loss totalled $11.5 million during the three-month period ended September 30, 2026, as the positive impact of higher sales volumes was more than offset by lower realized selling prices resulting from downward pressure on iron ore index prices and higher transportation costs driven by continued increases in fuel rates. Gross loss was also impacted by the purchase price allocation inventory adjustment of $4.8 million.

AISC totalled $97.1/dmt[1] for the three-month period ended September 30, 2026, significantly lower than in the previous quarter, mainly attributable to lower sustaining capital expenditures and the positive impact of higher sales volumes.

First Six Months of the 2027 Financial Year vs. First Six Months of the 2026 Financial Year

i. Operating Performance

Rana Gruber produced 0.9 million wmt of high-purity iron ore concentrates at a weighted average grade of 65.1% Fe since the acquisition date in April 2026. When adjusted to reflect a full six-month period of operations, production was in line with Rana Gruber's nameplate capacity. Production benefited from stable mill throughput of 2.4 million wmt at a weighted average head grade of 32.3% Fe and Fe recovery of 75.9%. Iron ore concentrates sold totalled 0.8 million dmt since the acquisition date and were generally in line with production levels.

ii. Financial Performance

Cost of sales totalled $76.1 million since the acquisition date while C1 cash cost totalled $85.8/dmt sold[1]. C1 cash cost excludes $7.7 million of inventory adjustments made as part of the purchase price allocation, as outlined above. Mining and processing costs totalled $65.7 million or $75.3/dmt produced[1] and were impacted by increased underground mining costs resulting from higher explosives prices and temporary operational challenges related to ventilation and water management. In addition, open-pit mining costs were impacted by increased hauling and waste rock activities in a new open pit commissioned in January 2026, as well as higher diesel prices. Land transportation and port handling costs totalled $1.5 million or $1.9/dmt sold[1], consistent with historical performance and management expectations. Cost of sales also includes a $1.2 million change in iron ore concentrates inventories.

Gross loss totalled $17.5 million during the six-month period ended September 30, 2026, primarily attributable to continued pressure on iron ore and freight index prices, the product mix of hematite and magnetite sold during the period, and the purchase price allocation inventory adjustment of $7.7 million.

AISC totalled $110.2/dmt[1] for the six-month period ended September 30, 2026, reflecting a high level of sustaining capital expenditure attributable to the development of an additional underground mining level, including related infrastructure, and other mine development activities, partially offset by the positive impact of sales volumes.

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

7. Financial and Operating Performance (continued)

D. Other Operating Expenses

	Three Months Ended September 30,			Six Months Ended September 30,		
(in thousands of dollars)	**2026**	2025	Variance	**2026**	2025	Variance
Share-based payments	**(3,485)**	4,618	(175)%	**(6,175)**	4,301	(244)%
General and administrative expenses	**14,114**	9,894	43 %	**28,299**	22,475	26 %
Sustainability and other community expenses	**5,149**	4,893	5 %	**10,195**	9,470	8 %
Innovation and growth initiative expenses	**1,551**	2,243	(31)%	**6,184**	4,114	50 %
	17,329	21,648	(20)%	**38,503**	40,360	(5)%

For the three and six-month periods ended September 30, 2026, share-based payments were mainly impacted by the change in value of the related liability, which varies based on the price of the Company's shares at each reporting date, and the quarterly vesting.

The increase in general and administrative expenses for the three and six-month periods ended September 30, 2026, was mainly attributable to the inclusion of Rana Gruber's results following the acquisition in April 2026. The increase in sustainability and community-related expenses for the three and six-month periods ended September 30, 2026, was mainly attributable to annual price indexation. Innovation and growth initiative expenses decreased for the three-month period ended September 30, 2026, mainly due to cost reduction initiatives implemented during the quarter, while the increase for the six-month period was driven by legal and consultant fees incurred in connection with the Rana Gruber Acquisition.

E. Net Finance Costs

	Three Months Ended September 30,			Six Months Ended September 30,		
(in thousands of dollars)	**2026**	2025	Variance	**2026**	2025	Variance
Interest expense on long-term debt	**13,141**	10,756	22 %	**26,140**	16,933	54 %
Standby commitment fees on long-term debt	**512**	782	(35)%	**1,108**	1,405	(21)%
Interest expense on lease liabilities	**2,300**	1,540	49 %	**4,619**	2,988	55 %
Interest income	**(1,297)**	(2,923)	(56)%	**(4,134)**	(3,941)	5 %
Other finance costs	**2,080**	3,322	(37)%	**4,345**	5,326	(18)%
	16,736	13,477	24 %	**32,078**	22,711	41 %
Realized and unrealized foreign exchange loss (gain)	**(1,251)**	12,166	(110)%	**19,268**	(10,324)	(287)%
	15,485	25,643	(40)%	**51,346**	12,387	315 %

Second Quarter of the 2027 Financial Year vs. Second Quarter of the 2026 Financial Year

Excluding foreign exchange gains or losses, net finance costs increased to $16.7 million for the three-month period ended September 30, 2026, compared to $13.5 million for the same period in 2025. Higher interest expenses on long-term debt were mainly associated with a higher debt balance, and higher interest expenses on lease liabilities were primarily attributable to the lease liabilities acquired through Rana Gruber.

The foreign exchange gain of $1.3 million for the three-month period ended September 30, 2026, was mainly attributable to the revaluation of net monetary liabilities denominated in U.S. dollars.

First Six Months of the 2027 Financial Year vs. First Six Months of the 2026 Financial Year

Excluding foreign exchange gains or losses, net finance costs increased to $32.1 million for the six-month period ended September 30, 2026, compared to $22.7 million for the previous year. This increase was primarily driven by higher interest expenses, with a higher debt balance during the year, partially offset by higher capitalization of borrowing costs related to the construction of the DRPF infrastructure. During the six-month period ended September 30, 2026, borrowing costs of $19.1 million were capitalized, compared to $15.1 million for the previous year, reflecting the construction progress of the project and the build-up of qualifying assets.

The foreign exchange loss of $19.3 million for the six-month period ended September 30, 2026, mainly resulted from the revaluation of net monetary liabilities denominated in U.S. dollars, with the depreciation of the Canadian dollar against the U.S. dollar as at September 30, 2026, compared to March 31, 2026.

7. Financial and Operating Performance (continued)

F. Income Taxes

The Company and its subsidiaries are subject to tax in Australia, Canada and Norway, based on the location of their operations. QIO, a Canadian subsidiary of Champion, is subject to Québec mining taxes at a progressive tax rate ranging from 16% to 28%, based on its mining profit margin. QIO is also subject to income taxes in Canada, where the combined provincial and federal statutory rate was 26.5% for the three and six-month periods ended September 30, 2026 (2025: 26.5%). Rana Gruber is subject to Norway's general corporate income tax at a rate of 22.0% on its profits, with no mining tax levied in Norway.

During the three and six-month periods ended September 30, 2026, current income and mining tax recoveries totalled $36.3 million and $31.0 million, respectively, compared to expenses of $10.4 million and $18.8 million, respectively, for the same periods in 2025. Changes in income and mining tax expense were mainly attributable to the change in taxable income (loss) and the withholding tax paid on the lower dividend received from QIO. With a net receivable balance of $9.6 million as at March 31, 2026, income tax payable resulting from the Rana Gruber Acquisition of $8.4 million, and net tax payments of $18.8 million during the six-month period ended September 30, 2026, the Company had net income and mining taxes receivable of $50.9 million as at September 30, 2026.

During the three and six-month periods ended September 30, 2026, the Company recognized deferred income and mining tax expenses of $13.7 million and a recovery of $0.4 million, respectively, compared to expenses of $36.9 million and $28.9 million, respectively, for the same periods in 2025. The variation in deferred tax expenses was primarily due to the origination and reversal of net taxable temporary differences.

The combined provincial and federal statutory tax and mining tax rate was 38% and the Company's effective tax rate was 32% and 26%, respectively, for the three and six-month periods ended September 30, 2026, compared to 45% and 37%, respectively, for the previous year. The effective tax rate for the six-month period was lower than the statutory tax rate, mainly due to the impact of foreign exchange losses (not deductible) and the withholding tax associated with the dividend received from QIO.

G. Net Income (Loss), EBITDA & Adjusted EBITDA

Second Quarter of the 2027 Financial Year vs. Second Quarter of the 2026 Financial Year

For the three-month period ended September 30, 2026, the Company generated a net loss of $48.4 million (loss per share of $0.09), compared to net income of $56.8 million (EPS of $0.11) for the same prior-year period. These decreases in net results were mainly attributable to a lower gross profit, partially offset by lower income and mining taxes, a lower foreign exchange loss on net monetary liabilities denominated in foreign currencies, as well as a share-based payment decrease. The lower gross result for the three-month period ended September 30, 2026, included DRPF start-up costs of $6.9 million and inventory valuation adjustments in relation to the Rana Gruber Acquisition of $4.8 million.

For the three-month period ended September 30, 2026, the Company generated EBITDA of $3.7 million[1], representing an EBITDA margin of 1%[1], compared to $174.8 million[1], representing an EBITDA margin of 35%[1], for the same period in 2025. Lower EBITDA and EBITDA margins were mainly driven by lower net realized selling prices and higher cash costs, partially offset by higher sales volumes.

For the three-month period ended September 30, 2026, adjusted EBITDA totalled $23.3 million[1], compared to $174.8 million[1], for the same prior-year period.

First Six Months of the 2027 Financial Year vs. First Six Months of the 2026 Financial Year

For the six-month period ended September 30, 2026, the Company recorded a net loss of $89.9 million (loss per share of $0.16), compared to net income of $80.6 million (EPS of $0.15) for the same prior-year period. These decreases were mainly due to lower gross profit, an unrealized foreign exchange loss of $16.0 million on net monetary liabilities denominated in foreign currencies, as well as unfavourable fair value adjustments of $18.4 million on derivative instruments, partially offset by lower income and mining taxes and a share-based payment decrease.

For the six-month period ended September 30, 2026, the Company generated EBITDA of $36.4 million[1], representing an EBITDA margin of 5%[1], compared to $232.6 million[1], representing an EBITDA margin of 26%[1], for the same period in 2025. These decreases in EBITDA and EBITDA margin were mainly attributable to lower net realized selling prices, higher cash costs and unfavourable fair value adjustments on derivative instruments.

For the six-month period ended September 30, 2026, adjusted EBITDA totalled $101.6 million[1], compared to $232.6 million[1], for the same prior-year period.

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

7. Financial and Operating Performance (continued)

H. All-in Sustaining Cost & Cash Operating Margin

Second Quarter of the 2027 Financial Year vs. Second Quarter of the 2026 Financial Year

During the three-month period ended September 30, 2026, the Company realized an AISC of $97.9/dmt[1], compared to $96.9/dmt[1] in the same period in 2025, as lower sustaining capital expenditures at Bloom Lake, combined with higher volumes of iron ore concentrates sold, partially offset the rise in cash costs.

The Company generated a negative cash operating margin of $8.0/dmt[1] for each tonne of high-purity iron ore concentrate sold during the three-month period ended September 30, 2026, compared to a positive cash operating margin of $31.1/dmt[1] for the same prior-year period. This decrease was mainly due to a lower net average realized selling price with an AISC remaining relatively stable year-over-year.

First Six Months of the 2027 Financial Year vs. First Six Months of the 2026 Financial Year

During the six-month period ended September 30, 2026, the Company recorded an AISC of $103.6/dmt[1], compared to $96.6/dmt[1] for the previous year. The increase in AISC reflected higher cost of sales, sustaining capital expenditures and general and administrative expenses.

The Company generated a negative cash operating margin of $6.5/dmt[1] for the six-month period ended September 30, 2026, compared to a positive cash operating margin of $18.3/dmt[1] for the previous year. This decrease was due to lower net average realized selling prices and higher AISC for the period.

8. Kami Partnership Outlook

The Kami Project is a pre-development DR grade iron ore project located near Bloom Lake's existing infrastructure and represents a key long-term growth opportunity for the Company. The technical report titled "Pre-feasibility Study for the Kamistiatusset (Kami) Iron Ore Property, Newfoundland and Labrador, Canada", prepared pursuant to National Instrument 43-101 — *Standards of Disclosure for Mineral Projects* and Chapter 5 of the ASX Listing Rules and dated March 14, 2024 (the "Kami Project Study"), which was filed voluntarily by the Company, outlines a 25-year LoM and average annual production of approximately 9.0 million wmt[2] of DR grade iron ore concentrate grading above 67.5% Fe.

In July 2025, the Company entered into a framework agreement with Nippon Steel and Sojitz for the joint ownership and potential development of the Kami Project (the "Kami Transaction"). Under this agreement, the Partners are expected to contribute up to $245 million for a 49% interest in the Kami Partnership. In September 2025, the Partners made their initial cash contributions in an aggregate amount of $68.6 million. Until an FID is made, the Partners have different options to exit the Kami Partnership by requiring Champion to acquire their interests. The second closing of the Kami Transaction and subsequent cash contribution of $176.4 million remain subject to the completion of a DFS, and Champion and the Partners proceeding with positive IID elections to pursue work towards an FID, as well as other customary closing conditions.

As at September 30, 2026, DFS-related exploration and engineering work was completed with economic evaluation and analysis progressing toward completion. The Kami Partnership remains engaged with various levels of government regarding potential support for the development of the project and continues to evaluate opportunities to enhance the Kami Project's economics. Additionally, consultations with First Nations communities in Labrador regarding impact and benefit agreements are ongoing. Consistent with Champion's disciplined approach to evaluate growth opportunities while managing financial leverage, the Kami Project and other growth initiatives are subject to market conditions and funding capabilities.

Additional details on the Kami Project, including the Kami Project Study, are available on the Kami Project's website at www.kami.ca under the About Kami section. The information on the Kami website is not incorporated by reference into this Directors' Report.

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

[2] The production target was first reported in the Company's ASX announcement dated March 15, 2024. The Company confirms that all the material assumptions underpinning the production target in that announcement continue to apply and have not materially changed.

9. Exploration Activities

During the three and six-month periods ended September 30, 2026, the Company maintained all its properties in good standing and did not enter into any farm-in or farm-out arrangements. During the three and six-month periods ended September 30, 2026, $3.8 million and $5.7 million in exploration and evaluation expenditures were incurred, respectively, compared to $6.4 million and $15.2 million, respectively, for the same prior-year periods. The lower expenditures year-over-year reflected the transfer of the Kami properties to the Kami Partnership and the Partners' acquisition of the aggregate 49% interest in the Kami Partnership in September 2025. The decrease also reflects ongoing cost reduction initiatives across the organization, as well as the prioritization of certain exploration programs given the current market conditions.

Exploration and evaluation expenditures were incurred and carried out in Canada in the provinces of Québec and Newfoundland and Labrador. Details on exploration projects, including maps, are available on the Company's website at www.championiron.com under the Operations & Projects section. The information on the Company's website is not incorporated by reference into this Directors' Report.

10. Cash Flows

The following table summarizes consolidated cash flow activities:

	Three Months Ended September 30,		Six Months Ended September 30,	
(in thousands of dollars, except per share data)	**2026**	2025	**2026**	2025
Operating cash flows before working capital	**27,457**	163,016	**68,334**	204,817
Changes in non-cash operating working capital	**54,906**	(41,992)	**65,042**	(2,661)
Net cash flows from operating activities	**82,363**	121,024	**133,376**	202,156
Net cash flows used in investing activities	**(88,112)**	(119,599)	**(630,470)**	(239,586)
Net cash flows from financing activities	**20,456**	144,119	**412,990**	243,743
Net increase (decrease) in cash	**14,707**	145,544	**(84,104)**	206,313
Effects of exchange rate changes on cash	**1,029**	3,906	**1,673**	1,740
Cash, beginning of the period	**198,621**	176,054	**296,788**	117,451
Cash, end of the period	**214,357**	325,504	**214,357**	325,504
Operating cash flow per share[1]	**0.15**	0.23	**0.24**	0.38

A. Operating

During the three-month period ended September 30, 2026, the Company generated operating cash flows of $27.5 million before changes in working capital items, compared to operating cash flows of $163.0 million for the same prior-year period, reflecting lower EBITDA and lower current income and mining taxes. The changes in non-cash operating working capital increased cash flows from operating activities by $54.9 million during the period, mainly due to lower receivables from strong collection efforts and lower inventories, partially offset by lower accounts payable and higher income tax receivable. The operating cash flow per share for the three-month period ended September 30, 2026, was $0.15[1], compared to $0.23[1] for the same prior-year period.

During the six-month period ended September 30, 2026, the Company's operating cash flows before working capital items totalled $68.3 million, compared to $204.8 million for the previous year, mostly driven by lower EBITDA and lower current income and mining taxes. The changes in non-cash operating working capital positively impacted operating cash flows by $65.0 million due to lower trade receivables, partially offset by higher income tax receivable. Year-to-date variations are detailed in section 11 — Financial Position of this Directors' Report. The operating cash flow per share for the six-month period ended September 30, 2026, totalled $0.24[1], compared to $0.38[1] for the previous year.

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

10. Cash Flows (continued)

B. Investing

i. Purchase of Property, Plant and Equipment

	Three Months Ended September 30,		Six Months Ended September 30,	
(in thousands of dollars)	**2026**	2025	**2026**	2025
Tailings and water infrastructure	**14,823**	23,481	**35,644**	38,247
Stripping and mining activities	**24,583**	18,739	**46,219**	31,714
Tunnelling and underground infrastructure	**4,712**	—	**8,494**	—
Other sustaining capital expenditures	**9,502**	27,690	**41,467**	42,190
Sustaining Capital Expenditures	**53,620**	69,910	**131,824**	112,151
DRPF project	**3,244**	20,614	**17,462**	68,074
Other capital development expenditures	**25,754**	22,675	**34,253**	38,349
Purchase of Property, Plant and Equipment as per Cash Flows	**82,618**	113,199	**183,539**	218,574

Sustaining Capital Expenditures

The tailings-related investments for the three and six-month periods ended September 30, 2026, were consistent with QIO's long-term plan to support LoM operations. Champion continues to prioritize tailings safety through ongoing infrastructure monitoring and inspections, while advancing its long-term investment plan at Bloom Lake. Tailings-related construction activities are typically undertaken between May and November, when weather conditions are more favourable at Bloom Lake.

Stripping and mining activities for the three and six-month periods ended September 30, 2026, included $15.8 million and $33.6 million, respectively, of mine development costs, comprising topographic and pre-cut drilling work, the details of which are contained in the Company's mine plan ($7.3 million and $15.1 million, respectively, for the same periods in 2025). During the three and six-month periods ended September 30, 2026, stripping and mining activities also included $8.8 million and $12.7 million, respectively, of capitalized stripping costs ($11.4 million and $16.6 million, respectively, for the same periods in 2025).

Tunnelling and underground infrastructure expenditures are related to Rana Gruber and included ramp access and other underground infrastructure works.

Other sustaining capital investments for the three and six-month periods ended September 30, 2026, included expenditures related to mining equipment rebuild programs that are aligned with the Company's long-term investment strategy to support growth initiatives across the LoM.

DRPF Project

During the three and six-month periods ended September 30, 2026, the Company spent $3.2 million and $17.5 million, respectively, in capital expenditures related to the DRPF project ($20.6 million and $68.1 million, respectively, for the same prior-year periods). The decrease primarily reflects the substantial completion of construction activities, with year-to-date investments mainly consisting of commissioning and ramp-up activities. Cumulative investments totalled $497.0 million as at September 30, 2026. Refer to section 5 — DRPF Project Update of this Directors' Report.

Other Capital Development Expenditures

During the three and six-month periods ended September 30, 2026, other capital development expenditures totalled $25.8 million and $34.3 million, respectively ($22.7 million and $38.3 million, respectively, for the same periods in 2025) and are detailed as follows:

	Three Months Ended September 30,		Six Months Ended September 30,	
(in thousands of dollars)	**2026**	2025	**2026**	2025
Infrastructure improvements and conformity (i)	**1,727**	12,172	**7,744**	15,191
Mine maintenance garage expansion	**—**	—	**—**	457
Deposits or final payments for mining equipment	**11,325**	9,404	**11,346**	15,623
Other (ii)	**12,702**	1,099	**15,163**	7,078
Other Capital Development Expenditures	**25,754**	22,675	**34,253**	38,349

(i) Infrastructure improvements and conformity expenditures included various capital projects aimed at improving the performance or capacity of assets and complying with various regulations governing mining practices.

(ii) Other expenditures included cash borrowing costs capitalized on the DRPF project and the construction of new ventilation shafts related to underground infrastructure at Rana Gruber's mine site.

10. Cash Flows (continued)

B. Investing (continued)

ii. Other Main Investing Activities

During the six-month period ended September 30, 2026, the Company completed the Rana Gruber Acquisition for a total consideration of $426.6 million (refer to section 2 — Rana Gruber Acquisition of this Directors' Report).

During the three and six-month periods ended September 30, 2026, the Company invested $3.8 million and $5.7 million, respectively, in exploration and evaluation assets ($6.4 million and $15.2 million, respectively, for the same prior-year periods) and made advance payments of $1.1 million and $12.8 million, respectively, to third-party service providers for major replacement parts and asset improvement capital expenditures ($0.1 million and $5.4 million, respectively, for the same prior-year periods).

C. Financing

During the six-month period ended September 30, 2026, the Company financed the Rana Gruber Acquisition through the issuance of ordinary shares for net proceeds of $134.6 million, and a new term loan of $209.1 million (US$150 million). Transaction costs of $6.4 million were incurred in connection with the new term loan and amendments to the revolving credit facility. In the same period last year, the Company issued ordinary shares pursuant to the exercise of warrants for net proceeds of $36.8 million. During the three and six-month periods ended September 30, 2026, the Company returned $11.2 million to shareholders through a dividend payment, compared with $53.3 million in each of the corresponding prior-year periods.

During the three and six-month periods ended September 30, 2026, in addition to the new term loan outlined above, the Company made an additional net drawdown of $39.8 million and $103.0 million, respectively, under its long-term debt (net repayment of $8.8 million and net drawdown of $57.4 million, respectively, for the same prior-year periods) and made payments on lease liabilities of $8.2 million and $16.1 million, respectively ($4.2 million and $7.5 million, respectively, for the same prior-year periods). On July 2, 2025, Champion issued US$500 million in Senior Unsecured Notes for net proceeds of $666.8 million, after transaction costs, and concurrently repaid its senior credit facilities totalling $456.3 million.

11. Financial Position

The following table details the changes to the interim consolidated statements of financial position:

(in thousands of dollars)	**As at September 30, 2026**	As at March 31, 2026	Variance
Cash	**214,357**	296,788	(28)%
Receivables	**89,911**	179,652	(50)%
Inventories	**316,696**	289,341	9 %
Other current assets	**109,819**	61,869	78 %
Total Current Assets	**730,783**	827,650	(12)%
Advance payments	**88,636**	80,368	10 %
Property, plant and equipment	**2,805,582**	2,322,105	21 %
Exploration and evaluation assets	**104,045**	98,370	6 %
Other non-current assets	**297,670**	168,768	76 %
Total Assets	**4,026,716**	3,497,261	15 %
Total Current Liabilities	**457,834**	318,744	44 %
Long-term debt	**1,228,823**	922,136	33 %
Lease liabilities	**122,389**	93,791	30 %
Provisions	**136,586**	131,873	4 %
Net deferred tax liabilities	**488,298**	400,483	22 %
Other non-current liabilities	**18,364**	95,975	(81)%
Total Liabilities	**2,452,294**	1,963,002	25 %
Total Equity	**1,574,422**	1,534,259	3 %
Total Liabilities and Equity	**4,026,716**	3,497,261	15 %

11. Financial Position (continued)

Certain changes in the consolidated statements of financial position are attributable to the Rana Gruber Acquisition. The Company accounted for the Rana Gruber Acquisition as a business combination in accordance with IFRS 3 — Business Combinations, applying the acquisition method, which requires the recognition of all identifiable assets acquired and liabilities assumed at their fair values as at the acquisition date. Refer to note 3 to the Financial Statements for further details on the fair values recognized upon the Rana Gruber Acquisition.

Assets

The Company's cash balance on September 30, 2026, compared to the amount held on March 31, 2026, is detailed in section 10 — Cash Flows of this Directors' Report.

Receivables were lower as at September 30, 2026, compared to March 31, 2026, despite the inclusion of Rana Gruber's balances. The decrease primarily reflected strong collections near quarter-end and lower forward index prices, which resulted in a net payable balance for provisionally priced sales to one customer, reclassified from receivables to payables.

The increase in inventories mainly reflected the inclusion of Rana Gruber's inventories and higher inventory values at Bloom Lake, partially offset by lower inventory volumes held by QIO.

The increase in other current assets is mainly attributable to a higher income and mining tax receivable.

The additions to property, plant and equipment are detailed in section 10 — Cash Flows of this Directors' Report. The increase was also attributable to additional right-of-use assets related to Rana Gruber's operations.

Other non-current assets increased primarily due to the recognition of mining interests as part of the Rana Gruber Acquisition.

Liabilities and Equity

During the period, the $68.6 million redemption obligation related to Nippon Steel's and Sojitz's put option to exit the Kami Partnership was reclassified as a current liability, resulting in an increase in current liabilities with a corresponding decrease in non-current liabilities. The remaining increase in current liabilities primarily reflected the recognition of additional current lease liabilities related to Rana Gruber's operations.

The increase in long-term debt mainly reflected the addition of a new US$150 million term loan used to partially finance the Rana Gruber Acquisition, drawdowns on the senior revolving credit facility, and an unrealized foreign exchange loss on long-term debt denominated in U.S. dollars.

The increase in net deferred tax liabilities was mainly attributable to temporary differences between the carrying amounts of property, plant and equipment and their tax basis.

Total equity increased by $40.2 million since the beginning of the financial year, primarily reflecting the issuance of the Company's ordinary shares to partially finance the Rana Gruber Acquisition, partially offset by the net loss for the six-month period and a dividend payment.

Liquidity

Despite volatile market conditions, the Company remains in compliance with the covenants under its senior secured credit facilities as at September 30, 2026, which provide access to its revolving credit facility. As a preventive measure to mitigate potentially continued depressed market conditions, the Company proactively obtained temporary financial covenant relief and enhanced financial covenant flexibility under its senior credit facilities and other credit facilities, if required in upcoming periods. Given recent volatile market conditions, the Company would not have satisfied certain financial covenants under some of its other credit facilities for the quarter ended September 30, 2026, primarily driven by (i) the structural and contractual differences in how debt is treated under these credit facilities compared to the senior secured credit facility; and (ii) the inclusion of Rana Gruber's financial results following its acquisition.

Before quarter-end, the Company obtained amendments and waivers providing for amendments to, or waivers of compliance with, the financial covenants of its credit facilities, including preventive waivers for the senior secured credit facility, which amendments and waivers may be triggered, at the discretion of the Company and as required, including:

- Covenant relief period for the credit facility with Fonds de Solidarité des Travailleurs du Québec (FTQ Loan) up to December 31, 2026, inclusively;
- Preventive covenant relief period for its senior credit facility up to March 31, 2027, inclusively, and secured enhanced covenants to help mitigate the impact of future market volatility following a covenant relief period, should it be required by the Company; and
- Amended the covenants of the agreement with Caterpillar Financial Services Limited (CAT Financing) to align with those under the senior credit facility.

11. Financial Position (continued)

Liquidity (continued)

The Company is actively discussing with its creditors to further amend or refinance certain credit facilities to improve financial flexibility. Although challenging market conditions may persist, the Company expects to benefit in the near term from operational optimization initiatives, cost reduction efforts and the positive impact of the DRPF project on net realized selling prices. Depending on market conditions, the Company may need to adjust its capital expenditure programs, operating plans and/or secure additional funding or relief. There can be no assurance that such relief or funding, if required, will be available on acceptable terms. Management believes that these measures, together with the Company's current available liquidity and its forecasted cash flows from operating activities, should position the Company to meet its cash requirements over the next 12 months.

As at September 30, 2026, the Company held $214.4 million in cash and had $404.1 million in undrawn loans under the senior revolving facility for total available liquidity of $618.4 million[1].

The Company's cash requirements for the next 12 months are primarily related to the following activities:

- Sustaining capital expenditures;
- Capital repayments related to lease liabilities and long-term debt; and
- Payment of mining and income taxes, when applicable.

Future cash calls by the Kami Partnership are not expected to affect the Company's liquidity in the short term. It is expected that the proceeds from the initial cash contributions to the Kami Partnership by the Partners will be used to cover the Company's pro-rata share of the costs, thus reducing the amount of the contribution note receivable from the Kami Partnership, issued in connection with the Kami assets transfer from the Company to the Kami Partnership.

Consistent with the Company's recently revised dividend policy, as announced to the market in the press release dated May 27, 2026 (Montréal), which targets distributions of 30% to 40% of trailing six-month free cash flows, the Board of Directors did not declare a dividend for the six-month period ended September 30, 2026.

12. Financial Instruments

The nature and extent of risks arising from the Company's financial instruments are summarized in note 26 to the audited consolidated financial statements for the financial year ended March 31, 2026.

13. Contingencies

The Company is and may be from time to time subject to legal actions, including arbitration and class actions, arising in the normal course of business. It is inherently difficult to predict the outcome of any of these proceedings with certainty, and it is possible that an adverse resolution could have a material adverse effect on the consolidated financial position of the Company. However, based on currently available information, it is not expected that any of the existing legal actions, either individually or in the aggregate, will have a material adverse effect on the consolidated financial position of the Company.

In relation to the Kami Project, the second closing of the Kami Transaction remains subject to: i) the completion of a DFS and ii) positive IID elections by Champion and the Partners to advance work towards an FID; as well as other customary closing conditions. Until an FID is made, the Partners have different options to exit the Kami Partnership, requiring Champion to acquire their respective interests. Details on contingencies related to the Kami Project and other contingencies are disclosed in notes 21 and 23 to the Financial Statements.

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

14. Contractual Obligations, Commitments and Off-Balance Sheet Arrangements

Contractual Obligations and Commitments

The following table details the contractual maturities of the Company's liabilities segmented by period, including estimated future interest payments and future minimum payments of the commitments, as at September 30, 2026:

(in thousands of dollars)	Less than 1 Year	1 to 5 Years	More than 5 Years	Total
Accounts payable and other (excluding current portion of lease liabilities, cash-settled share-based payment liability and redemption obligation)	**253,971**	**—**	**—**	**253,971**
Long-term debt	**153,688**	**780,813**	**808,756**	**1,743,257**
Lease liabilities	**44,364**	**75,970**	**84,171**	**204,505**
Commitments as per note 23 to the Financial Statements	**99,556**	**69,374**	**157,066**	**325,996**
	551,579	**926,157**	**1,049,993**	**2,527,729**

The Company has obligations for services related to fixed charges for the use of infrastructure over a defined contractual period of time. These service commitments are excluded from the table above since the services are expected to be received by the Company. To the extent that this changes, the commitment amount may change.

Contingent upon the Kami Project advancing to commercial production, Champion will be subject to a fixed production payment on future tonnes sold. The Company is also subject to limited production payments on its Consolidated Fire Lake North, Lac Lamêlée, Moiré Lake, O'Keefe-Purdy and Harvey-Tuttle properties.

Other Off-Balance Sheet Arrangements

As at September 30, 2026, the undrawn portion of the senior revolving facility is subject to standby commitment fees.

15. Material Judgments, Estimates and Assumptions

In connection with the Rana Gruber Acquisition, the Company made the following additional judgments, estimates and assumptions.

Fair value measurement of assets acquired

The fair values of the material assets acquired were measured using the following valuation techniques:

Assets acquired	Valuation technique
Mining interests	For modelled mineralization considered in the life of mine, the valuation model was based on a discounted cash flow approach. For unmodelled mineralization, with a greater uncertainty regarding the mineralization, a market approach was used, based on multiples of publicly-traded comparable companies.
Property, plant and equipment	The valuation model was based on the cost approach. Some assets were valued based on the current cost of identical physical assets derived using data directly from equipment manufacturers, vendors or other sources. Other assets were valued based on their replacement cost by indexing the historical capitalized cost on asset type and acquisition date.
Inventories	For stockpiled ore inventories, the fair value was determined using the net selling price of the iron ore concentrate expected to be produced from the stockpiled ore, less costs required to process the material to a saleable condition. For finished goods inventories, the fair value was determined using the net selling price of the underlying iron ore grades. Both net selling prices were based on quoted market price adjusted for freight and other costs.
Right-of-use assets	Right-of-use assets were measured at an amount equal to the corresponding lease liabilities, which were measured at the present value of the remaining lease payments as of the acquisition date, and discounted using an incremental borrowing rate determined for each lease based on the Company's credit risk profile and the remaining lease term.

The Company's other material accounting judgments, estimates and assumptions are summarized in note 2 to the audited consolidated financial statements for the financial year ended March 31, 2026.

16. New Accounting Amendments Issued and Adopted by the Company

The new accounting amendments issued and adopted by the Company are disclosed in note 2 to the Financial Statements.

17. New Accounting Standard Issued to Be Adopted at a Later Date

The new accounting standard issued but not yet in effect is disclosed in note 2 to the Financial Statements.

18. Related Parties

Related party transactions consist of transactions with key management personnel and joint ventures.

Key management personnel

The Company considers members of the Board and some of its senior officers to be key management personnel. Transactions with key management personnel are disclosed in note 29 to the audited consolidated financial statements for the financial year ended March 31, 2026. No significant changes occurred during the six-month period ended September 30, 2026.

Joint venture

The Company holds a 51% interest in the Kami Partnership since September 29, 2025, formed for the joint ownership and potential development of the Kami Project. Balances and transactions with the joint venture, accounted for using the equity method, are summarized below:

(in thousands of dollars)	**As at September 30, 2026**	As at March 31, 2026
Investment in a joint venture	**74,118**	73,124
Joint venture's contribution note	**53,227**	55,446
Other receivables (from a joint venture)	**430**	1,047

During the three and six-month periods ended September 30, 2026, Champion invoiced management fees and other services to the Kami Partnership totalling $1.2 million and $2.5 million, respectively, and recognized interest income of $0.3 million and $0.7 million, respectively, on restricted cash held within the joint venture for the Company's benefit.

The joint venture does not have any future minimum payments of commitments as at September 30, 2026.

19. Summary of Consolidated Quarterly Results

The following information is derived from and should be read in conjunction with the Financial Statements, the unaudited condensed interim consolidated financial statements for the previous quarters, and the audited annual consolidated financial statements for the financial year ended March 31, 2026.

	Q2 2027	Q1 2027	Q4 2026	Q3 2026	Q2 2026	Q1 2026	Q4 2025	Q3 2025

[1] This is a non-IFRS financial measure, ratio or other financial measure. This measure is not a standardized financial measure under the financial reporting framework used to prepare the Financial Statements and might not be comparable to similar financial measures used by other issuers. Refer to the section 20 — Non-IFRS and Other Financial Measures of this Directors' Report for definitions of these metrics and reconciliations to the most comparable IFRS measure when applicable.

[2] See the "Currency" subsection included in section 6 — Key Drivers of this Directors' Report.

20. Non-IFRS and Other Financial Measures

The Company has included certain non-IFRS financial measures, ratios and supplementary financial measures in this Directors' Report, as listed in the table below, to provide investors with additional information in order to help them evaluate the underlying performance of the Company. These measures are mainly derived from the Financial Statements but do not have any standardized meaning prescribed by IFRS and, therefore, may not be comparable to similar measures presented by other companies. Management believes that these measures, in addition to conventional measures prepared in accordance with IFRS, provide investors with an improved ability to understand the results of the Company's operations. Non-IFRS and other financial measures should not be considered in isolation or as substitutes for measures of performance prepared in accordance with IFRS. The exclusion of certain items from non-IFRS financial measures does not imply that these items are necessarily non-recurring. Mine performance measures should be read in conjunction with segmented information disclosed in note 25 of the Financial Statements.

The Company presents certain of its non-IFRS measures and other financial measures in United States dollars in addition to Canadian dollars to facilitate comparability with measures presented by other companies.

Non-IFRS Financial Measures	
Available liquidity	Cash and cash equivalents, plus short-term investments, plus undrawn amounts under credit facilities
EBITDA	Earnings before income and mining taxes, net finance costs (income) and depreciation
Adjusted EBITDA	EBITDA adjusted, as applicable, for acquisition-related costs, start-up costs, purchase price allocation inventory adjustments, gain or loss on disposal of non-current investments, write-off of non-current investments and unrealized fair value changes on derivative instruments
Adjusted net income (loss)	Net income (loss) adjusted, as applicable, for acquisition-related costs, start-up costs, purchase price allocation inventory adjustments, gain or loss on disposal of non-current investments, write-off of non-current investments, unrealized fair value changes on derivative instruments and the related tax effects of these items
Non-IFRS Ratios	
EBITDA margin	EBITDA as a percentage of revenues
Adjusted EBITDA margin	Adjusted EBITDA as a percentage of revenues
Adjusted EPS	Adjusted net income (loss) per basic weighted average number of ordinary shares outstanding
C1 cash cost per dmt sold	Cost of sales before start-up costs and purchase price allocation inventory adjustment, if any, divided by iron ore concentrates sold in dmt
Mine C1 cash cost per dmt sold	C1 cash cost per dmt sold presented on a segment level (Bloom Lake and Rana Gruber)
AISC per dmt sold	C1 cash cost, plus sustaining capital expenditures and general and administrative expenses, divided by iron ore concentrates sold in dmt
Mine AISC per dmt sold	AISC per dmt sold, excluding general and administrative expenses, presented on a segment level (Bloom Lake and Rana Gruber)
Cash operating margin	Net average realized selling price, less AISC
Gross average realized selling price per dmt sold	Revenues before provisional pricing adjustments and freight and other costs, divided by iron ore concentrates sold in dmt
Cash profit margin	Cash operating margin as a percentage of net average realized selling price
Other Financial Measures	
Net average realized selling price or net average realized FOB selling price per dmt sold	Revenues divided by iron ore concentrates sold in dmt
Mining and processing costs per dmt produced	Mining and processing costs, divided by iron ore concentrates produced in dmt
Land transportation and port handling costs per dmt sold	Land transportation and port handling costs, divided by iron ore concentrates sold in dmt
Operating cash flow per share	Net cash flows from (used in) operating activities per basic weighted average number of ordinary shares outstanding

Non-IFRS financial information in this Directors' Report has not been audited or reviewed by the Company's external auditors.

20. Non-IFRS and Other Financial Measures (continued)

Available Liquidity

Available liquidity is a non-IFRS measure used by Management to prudently monitor the cash accessible by the Company. Available liquidity is comprised of cash and cash equivalents, short-term investments that mature within twelve months and undrawn amounts under available credit facilities. The Company uses available liquidity to measure the liquidity required to satisfy its lenders, fund capital expenditures and support operations. This measure does not have any standardized meaning prescribed by IFRS and, therefore, may not be comparable to similar measures presented by other companies.

(in thousands of dollars)	**As at September 30, 2026**	As at June 30, 2026
Cash	**214,357**	198,621
Undrawn amounts under credit facilities	**404,088**	454,516
Available liquidity	**618,445**	653,137

EBITDA, Adjusted EBITDA, EBITDA Margin and Adjusted EBITDA Margin

EBITDA is a non-IFRS financial measure that allows comparability of operating results from one period to another by excluding the effects of items that are usually associated with investing and financing activities. EBITDA is not necessarily indicative of operating profit or cash flows from operating activities as determined under IFRS. Adjusted EBITDA is a new non-IFRS financial measure introduced by the Company during the second quarter of the 2027 financial year.

Adjusted EBITDA and adjusted EBITDA margin provide investors with additional information to evaluate the Company's underlying operating performance by excluding the impact of certain items that management believes are not indicative of the Company's ongoing operations. Management believes that excluding these items provides a more meaningful representation of the Company's operating performance as these items may vary significantly between periods and may not be reflective of the performance of the Company's core mining operations. Management believes this measure enhances the comparability of operating performance between periods and may facilitate comparisons with the performance of other companies in the mining industry.

EBITDA margin and adjusted EBITDA margin are used for the purpose of evaluating business performance. Management believes these financial ratios are relevant to investors in assessing the Company's ability to generate operating earnings and liquidity to fund working capital requirements, capital expenditures and debt obligations.

EBITDA, adjusted EBITDA, EBITDA margin and adjusted EBITDA margin do not have any standardized meanings prescribed by IFRS and, therefore, may not be comparable to similar measures presented by other companies.

(in thousands of dollars)	December 31, 2025	March 31, 2026	June 30, 2026	**Three Months Ended September 30, 2026**	**Six Months Ended September 30, 2026**

Adjusted Net Income (Loss) and Adjusted EPS

Management uses adjusted net income (loss) and adjusted EPS to evaluate the Company's operating performance and for planning and forecasting future business operations. Management believes that these financial measures provide investors with an enhanced understanding of the Company's results by excluding certain items that do not reflect the core performance of the Company. By excluding these items, Management believes it provides a better comparability of the Company's results from one period to another and with other mining entities. These financial measures do not have any standardized meanings prescribed by IFRS and, therefore, may not be comparable to similar measures and ratios presented by other companies.

Management's determination of the components of adjusted net income (loss) and adjusted EPS is performed periodically and is based, in part, on its review of non-IFRS financial measures and ratios used by mining industry analysts.

20. Non-IFRS and Other Financial Measures (continued)

C1 Cash Cost per dmt sold and All-in Sustaining Cost per dmt sold (continued)

C1 cash cost and AISC per dmt sold are common non-IFRS financial performance measures used in the iron ore mining industry. The Company believes these measures provide useful information to investors and management in evaluating operating cost performance and the cost competitiveness of its mining operations. Management uses C1 cash cost and AISC per mine to evaluate the operating performance of each reportable segment. These measures do not have any standardized meaning prescribed by IFRS and, therefore, may not be comparable to similar measures presented by other companies.

C1 cash cost reflects the costs associated with producing and selling iron ore concentrate, including mining, processing, mine site general and administrative expenses, and rail and port operating costs. Depreciation and start-up costs are excluded from the calculation, as well as purchase price allocation inventory adjustments, as it reflects the fair value step-up of inventories recognized as part of a business combination and is not representative of the underlying operating cost of producing and selling iron ore concentrates.

The Company believes that AISC provides a more comprehensive view of the total cost associated with producing iron ore concentrate, as it incorporates the sustaining expenditures required to maintain current operations. Consolidated AISC is calculated as C1 cash cost plus sustaining capital expenditures, including deferred stripping costs, and general and administrative expenses, divided by iron ore concentrate sold. As AISC is intended to reflect the cost of current operations, it excludes expenditures related to development projects, mine expansions and studies intended to increase production capacity or extend mine life, as well as innovation and growth initiatives, income and mining taxes, working capital movements, net finance costs and other income or expenses. Purchase of property, plant and equipment as per the consolidated statements of cash flows are classified into sustaining capital expenditures, DRPF project and other capital development expenditures. Sustaining capital expenditures are defined as capital expenditures to sustain or maintain the existing assets to achieve operations as per the mine plan, from which future economic benefits will be derived. Refer to section 10 — Cash Flows of this Directors' Report. AISC per mine does not include general and administrative expenses as Management analyzes them as corporate expenses for the group.

Cash Operating Margin per dmt sold and Cash Profit Margin

Cash operating margin per dmt sold is used by Management to better understand the iron ore concentrate margin realized throughout a period. Cash operating margin represents the net average realized selling price per dmt sold less AISC per dmt sold. Cash profit margin represents the cash operating margin per dmt sold divided by the net average realized selling price per dmt sold. A negative cash operating margin indicates that realized selling prices were insufficient to cover sustaining costs during the period.

These measures do not have any standardized meanings prescribed by IFRS and, therefore, may not be comparable to similar measures presented by other companies.

Cash profit margin	15%	24%	6%	24%	16%

20. Non-IFRS and Other Financial Measures (continued)

Gross Average Realized Selling Price per dmt sold

Gross average realized selling price is used by Management to better understand the iron ore concentrate price throughout a period. The measure excludes the provisional pricing adjustments on sales contracts structured on a provisional pricing basis and freight and other costs, which enables Management to track the level of its iron ore concentrate price, compared to the average P65 index used in the market.

Provisional pricing adjustments represent any difference between the revenue recognized at the end of the previous period and the final settlement price. Excluding this element presents a better understanding of the price realized on iron ore concentrate sold during the period. This measure does not have any standardized meaning prescribed by IFRS and, therefore, may not be comparable to similar measures presented by other companies.

21. Share Capital Information

The Company's share capital consists of ordinary shares without par value. As of October 28, 2026, there were 560,046,922 ordinary shares issued and outstanding and 8,564,197 restricted share units, deferred share units and performance share units issued under the Company's Omnibus Incentive Plan.

22. Risk Factors

Champion is subject to several risks and uncertainties which could have a material adverse impact on its operations, its financial condition and the trading price of its shares.

The Board oversees Management's establishment and execution of the Company's risk management framework. Management has implemented and monitors compliance with risk management policies. The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, to monitor risks and adherence to market conditions, and the Company's activities.

Refer to the section entitled "Risk Factors" in the Company's Annual Report for the financial year ended March 31, 2026, available on the ASX at www.asx.com.au, SEDAR+ at www.sedarplus.ca and the Company's website at www.championiron.com to see the principal risk factors that apply to the Company and that may have a material adverse effect on its business, operating results and financial condition and for information about the Company's exposure to each of the described risks. In addition, Champion is subject to risks and uncertainties associated with the recent acquisition of Rana Gruber, including risks related to the integration of operations, systems, processes and personnel, as well as the risk that the anticipated benefits of the Rana Gruber Acquisition may not be realized within the expected timeframe or at all.

23. Nature of Securities

The purchase of the Company's securities involves a high degree of risk and should be undertaken only by investors whose financial resources are sufficient to enable them to assume such risks. The Company's securities should not be purchased by people who cannot afford the possibility of losing their entire investment. Furthermore, an investment in the Company's securities should not constitute a major portion of an investor's portfolio.

24. Additional Information

Additional information related to the Company is available for viewing under the Company's profile on the ASX at www.asx.com.au, SEDAR+ at www.sedarplus.ca and the Company's website at www.championiron.com.

DIRECTORS' REPORT

Specific and General Information

The Board of Directors of Champion Iron Limited present herewith the consolidated financial report of the entity for the half-year ended September 30, 2026. In order to comply with the provisions of the Corporations Act 2001, the Directors report as follows:

Principal Activities

Champion's principal activities include the production of high-purity iron ore concentrate and the development and exploration of its iron ore properties in the provinces of Québec and Newfoundland and Labrador in the Labrador Trough region, Canada. Following the acquisition of Rana Gruber in April 2026, the Company also produces iron ore concentrate in Norway.

Operating and Financial Review

The review of operations and financials is set out from page 2 to page 37 and forms part of this Directors' Report.

Events Occurring After the Reporting Period

There are no significant matters, circumstances or events that have arisen since the end of the financial half-year that have significantly affected, or may significantly affect, the Company's operations, the results of those operations, or the Company's state of affairs, in the financial years subsequent to the financial half-year ended September 30, 2026.

Directors

The Directors of the Company at any time during or since the end of the half-year are:

Director	Position	Note
Michael O'Keeffe	Executive Chairman	Non-independent
David Cataford	Executive Director and Chief Executive Officer	Non-independent
Gary Lawler	Non-executive Director	Lead Director
Michelle Cormier	Non-executive Director	Independent Director
Louise Grondin	Non-executive Director	Independent Director
Jessica McDonald[1]	Non-executive Director	Independent Director
Jyothish George	Non-executive Director	Independent Director
Ronnie Beevor	Non-executive Director	Independent Director

[1] Ms. Jessica McDonald did not stand for re-election at the Annual General Meeting of Champion held on August 26, 2026 (Montréal time) / August 27, 2026 (Sydney time).

Auditor's Independence Declaration

Ernst & Young (Australia) are the auditors of the Company. A copy of their auditor's independence declaration for the half-year ended September 30, 2026, as required under section 307C of the Corporations Act 2001 is set out on page 40 and forms part of this Directors' Report.

Rounding

The Company is of a kind referred to in ASIC Corporation (Rounding in Financial/Directors' report) Instruments 2016/191 issued by the Australian Securities and Investments Commission. In accordance with the class order, amounts in this report and in the half-year financial report have been rounded to the nearest thousand dollars unless specifically stated to be otherwise.

Signed in accordance with a resolution of the Directors made pursuant to section 306(3) of the Corporations Act 2001.

/s/ Michael O'Keeffe

Michael O'Keeffe, Executive Chairman

/s/ Gary Lawler

Gary Lawler, Lead Director

Dated on October 29, 2026

DIRECTORS' DECLARATION

In the Directors' opinion:

a. the accompanying financial statements and notes of Champion Iron Limited

   - give a true and fair view of the Company's consolidated financial position as at September 30, 2026, and of its performance for the half-year ended on that date; and
   - comply with Accounting Standard AASB 134 "*Interim Financial Reporting*" and the Corporations Act 2001.

b. there are reasonable grounds to believe that the Company will be able to pay its debts as and when they become due and payable.

Signed in accordance with a resolution of the Directors.

/s/ Michael O'Keeffe
Michael O'Keeffe, Executive Chairman

/s/ Gary Lawler
Gary Lawler, Lead Director

Dated on October 29, 2026

Shape the future with confidence

Auditor's independence declaration to the directors of Champion Iron Limited

As lead auditor for the review of the half-year financial report of Champion Iron Limited for the half-year ended 30 September 2026, I declare to the best of my knowledge and belief, there have been:

a. No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the review;

b. No contraventions of any applicable code of professional conduct in relation to the review; and

c. No non-audit services provided that contravene any applicable code of professional conduct in relation to the review.

This declaration is in respect of Champion Iron Limited and the entities it controlled during the financial period.

Independent auditor's review report to the members of Champion Iron Limited

Conclusion

We have reviewed the accompanying condensed half-year financial report of Champion Iron Limited (the Company) and its subsidiaries (collectively the Group), which comprises the consolidated statement of financial position as at 30 September 2026, the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the half-year ended on that date, explanatory notes and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of the Group does not comply with the *Corporations Act 2001*, including:

a. Giving a true and fair view of the consolidated financial position of the Group as at 30 September 2026 and of its consolidated financial performance for the half-year ended on that date; and

b. Complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis for conclusion

We conducted our review in accordance with ASRE 2410 *Review of a Financial Report Performed by the Independent Auditor of the Entity* (ASRE 2410). Our responsibilities are further described in the *Auditor's responsibilities for the review of the half-year financial report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Directors' responsibilities for the half-year financial report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors determine is necessary to enable the preparation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities for the review of the half-year financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. ASRE 2410 requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 30 September 2026 and its performance for the half-year ended on that date, and complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Shape the future
with confidence

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

1. Description of Business

Champion Iron Limited ("Champion" or the "Company") was incorporated under the laws of Australia in 2006 and is dual-listed on the Australian Securities Exchange (ASX: CIA) and the Toronto Stock Exchange (TSX: CIA), and trades on the OTCQX Best Market (OTCQX: CIAFF). Its registered office is located at Level 1, 91 Evans Street, Rozelle, New South Wales 2039, Australia. The Company is domiciled in Australia and its principal activities are carried out in Canada through Quebec Iron Ore Inc. ("QIO"), its wholly-owned subsidiary. QIO's registered office is located at 1155 René-Lévesque Blvd. West, Suite 3300, Montréal, QC, H3B 3X7, Canada. In these financial statements, "Champion" or the "Company" refers to Champion Iron Limited and/or one, or more, of its subsidiaries, as the context requires.

Champion is a high-purity iron ore producer with operations in Canada and Norway. Through QIO, Champion owns and operates the Bloom Lake Mining Complex ("Bloom Lake" or "Bloom Lake Mine") located on the south end of the Labrador Trough, approximately 13 kilometres north of Fermont, Québec. Bloom Lake is an open-pit operation with two concentration plants that primarily source energy from renewable hydroelectric power, having a combined nameplate capacity of 15 million wet metric tonnes per year that produce low contaminant high-purity iron ore concentrates with a proven ability to produce direct reduction grade quality iron ore concentrate. The iron ore concentrate from Bloom Lake is transported by rail to a ship loading port in Sept-Îles, Québec. Benefiting from one of the highest purity resources globally, Champion has completed the construction of the DRPF project, which is designed to upgrade up to half of Bloom Lake's mine capacity to a direct reduction quality pellet feed iron ore with up to 69% Fe, and is currently progressing through its commissioning and ramp-up phase (the "DRPF Project"). Bloom Lake's high-purity and lower contaminant iron ore products have attracted a premium to the P61 index (formerly, the P62 index). Champion also owns and operates Rana Gruber AS ("Rana Gruber"), a Norwegian iron ore producer based in Mo i Rana, Nordland. With continuous production dating back to the 1960s, Rana Gruber produces approximately 1.8 million dry metric tonnes per year of hematite and magnetite iron ore concentrates. Champion has delivered iron ore concentrates to global markets, including China, Japan, the Middle East, Europe, South Korea, India, Southeast Asia, North Africa and Canada. In addition to its producing mines, Champion holds a 51% interest in Kami Iron Mine Partnership (the "Kami Partnership"), which is jointly owned with Nippon Steel Corporation ("Nippon Steel") and Sojitz Corporation ("Sojitz", and collectively with Nippon Steel, the "Partners"), and through which the Kamistiatusset project (the "Kami Project") is held. Located approximately 21 kilometres southeast of Bloom Lake, the Kami Project benefits from access to existing infrastructure. Champion also holds a portfolio of exploration and development projects in the Labrador Trough, including the Cluster II properties, which are situated within 60 kilometres south of Bloom Lake.

2. Material Accounting Policy Information and Future Accounting Changes

a) Basis of Preparation and Statement of Compliance

The Company's condensed interim consolidated financial statements ("financial statements") are those of the group consisting of Champion Iron Limited and its subsidiaries. Unless otherwise indicated, all monetary amounts presented in these financial statements are expressed in thousands of the currency identified. Amounts denominated in U.S. dollars are identified by "US$", and amounts denominated in Norwegian kroner by "NOK".

These financial statements have been prepared for a for-profit entity in accordance with the requirements of the Corporations Act 2001 and Australian Accounting Standards Board ("AASB") 134 and International Accounting Standards ("IAS") 34, Interim Financial Reporting.

These financial statements do not include certain information and disclosures normally included in the audited annual consolidated financial statements prepared in accordance with AASB and International Financial Reporting Standards ("IFRS") and should be read in conjunction with the Company's audited annual consolidated financial statements for the year ended March 31, 2026.

These financial statements have been prepared on the historical cost basis, except for the revaluation of certain financial assets and financial liabilities recorded at fair value.

The nature of the operations and principal activities of the Company are described in the Directors' Report for the year ended March 31, 2026.

These consolidated financial statements were approved and authorized for release by the Board of Directors (the "Board") on October 29, 2026.

b) Material Accounting Policies

The accounting policies used in these financial statements are consistent with those disclosed in the Company's audited consolidated financial statements for the year ended March 31, 2026, except for accounting policies applied resulting from transactions that occurred during the reporting period, and new accounting standards issued and adopted by the Company, which are described below.

2. Material Accounting Policy Information and Future Accounting Changes (continued)

b) Material Accounting Policies (continued)

Business combination

The Company accounts for business combinations using the acquisition method when the acquired set of activities and assets meets the definition of a business and control is obtained by the Company. In determining whether an acquired set of activities and assets is a business, the Company assesses whether it includes, at a minimum, an input and substantive process and whether it has the ability to produce outputs. The consideration transferred in a business combination is measured at fair value at the acquisition date, as are the identifiable assets acquired and liabilities assumed. Ore reserves, mineral resources and exploration potential that can be reliably measured are recognized separately at their acquisition-date fair values and are presented within Mining interests under Intangible assets in the consolidated statements of financial position. Acquisition-related costs are recognized in profit or loss as incurred, except for costs related to the issuance of debt or equity instruments, which are accounted for in accordance with the applicable IFRS standards.

Mining interests

Mining interests represent the fair value assigned to ore reserves, mineral resources and exploration potential identified upon the acquisition of a business, determined using valuation techniques appropriate to the nature and level of development of the underlying mineralization. Mining interests are initially recognized at their acquisition-date fair value and are subsequently measured at cost less accumulated depreciation and any accumulated impairment losses.

c) Material Accounting Judgments, Estimates and Assumptions

The preparation of financial statements in conformity with AASB and IFRS requires the Company's management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimates are revised and in any future years affected.

Fair value measurement of assets acquired

The fair values of the material assets acquired were measured using the following valuation techniques:

Assets acquired	Valuation technique
Mining interests	For modelled mineralization considered in the life of mine, the valuation model was based on a discounted cash flow approach. For unmodelled mineralization, with a greater uncertainty regarding the mineralization, a market approach was used based on multiples of publicly-traded comparable companies.
Property, plant and equipment	The valuation model was based on the cost approach. Some assets were valued based on the current cost of identical physical assets derived using data directly from equipment manufacturers, vendors or other sources. Other assets were valued based on their replacement cost by indexing the historical capitalized cost on asset types and acquisition date.
Inventories	For stockpiled ore inventories, the fair value was determined using the net selling price of the iron ore concentrate expected to be produced from the stockpiled ore, less costs required to process the material to a saleable condition. For finished goods inventories, the fair value was determined using the net selling price of the underlying iron ore grades. Both net selling prices were based on quoted market price adjusted for freight and other costs.
Right-of-use assets	Right-of-use assets were measured at an amount equal to the corresponding lease liabilities, which were measured at the present value of the remaining lease payments as of the acquisition date, and discounted using an incremental borrowing rate determined for each lease based on the Company's credit risk profile and the remaining lease term.

2. Material Accounting Policy Information and Future Accounting Changes (continued)

d) New Accounting Amendments Issued and Adopted by the Company

The Company adopted the following accounting amendments for the first time for the financial year beginning April 1, 2026.

Amendments to AASB 9 (IFRS 9), Financial Instruments ("IFRS 9") and AASB 7 (IFRS 7), Financial Instruments: Disclosures ("IFRS 7")

The amendments clarify that a financial liability is derecognized on the 'settlement date' and introduce an accounting policy choice to derecognize financial liabilities settled using an electronic payment system before the settlement date. Other clarifications include the classification of financial assets with Environmental, Social and Governance (ESG) linked features via additional guidance on the assessment of contingent features. Clarifications have been made to non-recourse loans and contractually linked instruments.

e) New Accounting Standard Issued to be Adopted at a Later Date

The following new standard has been issued and is applicable to the Company for its annual period beginning on April 1, 2027, with an earlier application permitted:

AASB 18 (IFRS 18), Presentation and Disclosure in Financial Statements ("IFRS 18")

IFRS 18 replaces IAS 1 - Presentation of Financial Statements and requires: i) income and expenses in the income statement to be classified into three new defined categories "Operating", "Investing" and "Financing" and two new subtotals "Operating profit or loss" and "Profit or loss before financing and income tax"; ii) disclosures about management-defined performance measures, which are non-IFRS measures related to the income statement, used in public communications to communicate management's view of the entity's financial performance; and iii) an appropriate level of aggregation and disaggregation based on similar characteristics and specific disclosure requirements for entities that present operating expenses by function in the income statement.

The Company is currently evaluating the impact of adopting the new standard on the Company's consolidated financial statements.

3. Rana Gruber Acquisition

On April 10, 2026, the Company acquired 92.48% of the issued and outstanding shares of Rana Gruber, pursuant to its previously announced recommended voluntary cash tender offer. The Company subsequently completed the compulsory acquisition of the remaining shares and obtained ownership of 100% of Rana Gruber's 37,085,092 shares on April 17, 2026, at a price of NOK 79 per share. The acquisition was completed for a total consideration of $426,577, funded through a combination of a new secured four-year US$150,000 term loan (refer to note 12 — Long-Term Debt), the proceeds from a US$100,000 equity private placement (refer to note 14 — Share Capital and Reserves), and existing cash on hand. The business combination was accounted for as a single transaction, with April 10, 2026, identified as the acquisition date, being the date on which control of Rana Gruber was obtained.

Rana Gruber is a Norwegian iron ore producer operating both an underground mine and a nearby open pit. Its operations are integrated with a public railway network connecting the mine to a coastal processing plant and dedicated port facilities. Rana Gruber produces hematite iron ore concentrates and a high-purity magnetite concentrate. The acquisition is intended to strengthen the Company's position in the global high-purity iron ore market, by diversifying Champion's asset base and iron ore grades, while enhancing its contribution in decarbonizing the steel industry.

Total acquisition-related costs of $18,225 have been incurred by the Company, of which $3,618 was recognized as an expense in the consolidated statements of income (loss) during the six-month period ended September 30, 2026 ($5,580 during the year ended March 31, 2026). For the six-month period ended September 30, 2026, $2,806 was presented in Innovation and growth initiatives expenses and $812 in General and administrative expenses ($113 and $5,467, respectively, for the year ended March 31, 2026). The remaining $9,027 has been capitalized as long-term debt transaction costs and share issuance costs. Refer to notes 12 — Long-Term Debt and 14 — Share Capital and Reserves.

From April 10, 2026, to September 30, 2026, Rana Gruber realized revenues of $78,204 and a net loss of $8,575 included in the consolidated statements of income (loss). Had the acquisition occurred on April 1, 2026, revenues and net loss would have been $84,382 and $3,557, respectively.

The following table presents the preliminary allocation of the purchase consideration to the fair values of the identifiable assets acquired and liabilities assumed. As at September 30, 2026, the initial accounting for the acquisition has not been completed due to the timing of the transaction and the complexity of the valuation process. Accordingly, the amounts recognized for inventories, mining interests, property, plant and equipment and deferred taxes are provisional pending completion of the valuation analyses.

	Notes	As at April 10, 2026
Purchase consideration		**426,577**
Fair value of identifiable assets acquired and liabilities assumed		
Cash (i)		**(1,117)**
Accounts receivable (ii)		**26,796**
Inventories		**39,556**
Net derivative financial instruments		**20,553**
Intangible assets	**8**	**139,902**
Property, plant and equipment	**9**	**380,010**
Accounts payable		**(32,515)**
Current tax payable		**(8,357)**
Lease liabilities	**24**	**(48,511)**
Provision	**13**	**(2,855)**
Deferred tax liabilities		**(86,885)**
		426,577
Reconciliation of the business combination to the net cash flows used in investing activities		
Purchase consideration		**(426,577)**
Cash acquired		**(1,117)**
		(427,694)

(i) The negative cash position includes $1,998 drawn on the $14,550 (NOK 100,000) overdraft facility.

(ii) The fair value approximates the gross contractual amount, as substantially all contractual cash flows are expected to be collected.

4. Receivables

	As at September 30, 2026	As at March 31, 2026
Trade receivables (i)	**35,374**	135,537
Sales tax	**50,780**	37,663
Grants receivable	**769**	1,914
Other receivables	**2,988**	4,538
	89,911	179,652

(i) As at September 30, 2026, the above trade receivables included $2,273 associated with revenues that remained subject to provisional pricing (March 31, 2026: $43,191). One customer with a net payable balance was presented under Accounts payable and other in the consolidated statements of financial position. The net payable balance included a receivable of $4,626 related to shipments subject to provisional pricing.

5. Prepaid Expenses and Advances

	Note	As at September 30, 2026	As at March 31, 2026
Railway transportation and terminal logistics		**10,506**	36,074
Port handling services	**7**	**3,383**	3,469
Insurance		**3,177**	902
Other		**20,953**	7,487
		38,019	47,932

6. Inventories

	As at September 30, 2026	As at March 31, 2026
Stockpiled ore	**63,881**	58,568
Iron ore concentrate inventories	**105,836**	100,333
Supplies and spare parts	**146,979**	130,440
	316,696	289,341

For the three and six-month periods ended September 30, 2026, the amount of inventories recognized as an expense totalled $436,387 and $765,828, respectively (three and six-month periods ended September 30, 2025: $338,506 and $699,230, respectively).

7. Advance Payments

	Note	As at September 30, 2026	As at March 31, 2026
Advance payments related to railway transportation and terminal logistics		**16,492**	20,621
Prepaid future port handling services		**15,764**	16,414
Other long-term advance		**59,763**	50,095
		92,019	87,130
Less current portion classified in "Prepaid expenses and advances"	**5**	**(3,383)**	(6,762)
		88,636	80,368

Advance payments related to capital maintenance expenditures incurred by third-party service providers are presented within Investing activities in the consolidated statements of cash flows as an increase in advance payments, and totalled $1,061 and $12,801, respectively, for the three and six-month periods ended September 30, 2026 (three and six-month periods ended September 30, 2025: $63 and $5,360, respectively).

(i) Certain of the Company's railcars are subject to a rental agreement. As at September 30, 2026, the Company had 240 leased railcars with a net book value of $38,161 (March 31, 2026: no railcar from October 2025 to March 2026, as the parties agreed to temporarily suspend the operating lease contract). Rental income is included in Other income (expenses) in the consolidated statements of income (loss).

(ii) For the three and six-month periods ended September 30, 2026, the amount of borrowing costs capitalized during the development period of the DRPF Project was $9,508 and $19,089, respectively (three and six-month periods ended September 30, 2025: $8,471 and $15,122, respectively). Borrowing costs consisted of interest expense and amortization of transaction costs on the long-term debt. The capitalization rate used to determine the amount of borrowing costs eligible for capitalization for the three and six-month periods ended September 30, 2026, was 7.7% and 8.0%, respectively (three and six-month periods ended September 30, 2025: 8.2% and 7.8%, respectively).

10. Other Non-Current Assets

	Notes	As at September 30, 2026	As at March 31, 2026
Joint venture's contribution note	**22**	**53,227**	55,446
Embedded derivative asset	**20**	**7,093**	18,868
Transaction costs related to the senior revolving facility		**5,014**	3,559
Other		**305**	854
		65,639	78,727

11. Accounts Payable and Other

	Notes	As at September 30, 2026	As at March 31, 2026
Trade payables and accrued liabilities		**214,521**	197,659
Payable related to provisional pricing adjustments		**4,596**	—
Redemption obligation associated with the Partners' interest (i)	**23**	**68,600**	—
Wages and benefits		**34,854**	38,683
Cash-settled share-based payment liability	**14**	**3,248**	7,385
Current portion of lease liabilities		**37,322**	23,970
		363,141	267,697

(i) The liability relates to the redemption rights held by Nippon Steel and Sojitz in respect of their interests in the Kami Partnership. Given that these redemption rights are exercisable within the next twelve months, the liability was classified as current. The liability is measured at amortized cost. As at March 31, 2026, the obligation was presented in Other non-current liabilities.

12. Long-Term Debt

	Interest Rate	Maturity	As at September 30, 2026	As at March 31, 2026
Senior Unsecured Notes	7.875 %	July 15, 2032	**707,560**	694,952
Senior Term Loan	SOFR + 1.75% to 2.75%	April 1, 2030	**209,248**	—
Senior Revolving Facility	SOFR + 1.75% to 2.75%	April 1, 2030	**120,598**	—
IQ Loan	3.70%	April 1, 2031	**34,947**	40,758
FTQ Loan	7.75%	May 21, 2028	**74,512**	74,373
CAT Financing	SOFR + 2.35% to 3.25%	October 2026 to October 2030	**75,255**	88,814
Railcars Loan	6.66% and 6.57%	November 22 and December 4, 2034	**62,924**	63,866
Other debts	NIBOR + 2.25%	May 18, 2029	**7,390**	—
			1,292,434	962,763
Less current portion			**(63,611)**	(40,627)
			1,228,823	922,136

The interest rate of the Senior Credit Facilities and the CAT Financing is based on Secured Overnight Financing Rate ("SOFR"), plus a credit spread adjustment and a financial margin. For the Senior Credit Facilities, the financial margin fluctuates depending on the net debt to EBITDA ratio. Interest rates of other debts are based on the Norwegian Interbank Offered Rate ("NIBOR"), plus a fixed margin.

The CAT Financing matures between 3 and 6 years depending on the equipment.

The undrawn portion of the Senior Revolving Facility and the CAT Financing are subject to commitment fees varying from 0.50% to 0.62%.

The Company remains in compliance with the covenants under its Senior Credit Facilities and CAT Financing as at September 30, 2026. As a preventive measure to mitigate potentially continued depressed market conditions, the Company obtained temporary financial covenant relief and enhanced financial covenant flexibility under its Senior Credit Facilities and other credit facilities, if required in upcoming periods.

12. Long-Term Debt (continued)

Before quarter-end, the Company obtained amendments and waivers providing for amendments to, or waivers of compliance with, the financial covenants of its credit facilities, including preventive waivers for the Senior Credit Facilities, which amendments and waivers may be triggered, at the discretion of the Company and as required, including:

- Covenant relief period for the credit facility under the FTQ Loan up to December 31, 2026, inclusively;
- Preventive covenant relief period for its Senior Credit Facilities up to March 31, 2027, inclusively, and secured enhanced covenants to help mitigate the impact of future market volatility following a covenant relief period, should it be required by the Company; and
- Amended the covenants under the CAT Financing to align with those under the Senior Credit Facilities.

	As at September 30, 2026	As at March 31, 2026
Face value of long-term debt	**1,303,103**	971,063
Unamortized embedded derivative prepayment options	**9,749**	10,592
Unamortized transaction costs	**(20,418)**	(18,892)
Long-term debt, net of derivative and transaction costs	**1,292,434**	962,763

Senior Unsecured Notes

On July 2, 2025, the Company issued $681,100 (US$500,000) senior unsecured notes (the "Notes"). Interest is payable semi-annually, on January 15 and July 15 of each year. The Notes include various prepayment options, in whole or in part, at different times, by paying premiums at decreasing rates depending on the term of the Notes. At any time after July 15, 2030, the Notes may be repaid at 100% of the principal. The Notes were bifurcated into a debt component and an embedded derivative for prepayment features. The embedded derivative asset was presented in Other non-current assets in the consolidated statements of financial position with a corresponding adjustment recorded in Long-term debt. Refer to note 10 — Other Non-Current Assets.

The Notes are guaranteed on an unsecured basis by certain of the Company's subsidiaries. The Company is subject to certain restrictions on asset sales, indebtedness, distributions and transactions with affiliates. There are no maintenance covenants with respect to the Company's financial performance. In July 2025, the Company incurred transaction costs of $14,329 related to the issuance of the Notes, which were presented against Long-term debt. As at September 30, 2026, the outstanding balance was $709,400 (US$500,000) (March 31, 2026: $696,950 (US$500,000)).

Senior Credit Facilities

On November 29, 2023, the Company completed a five-year term loan (the "Original Senior Term Loan") with a syndicate of lenders and extended the maturity of its existing US$400,000 general purpose revolving facility (the "Senior Revolving Facility") to November 2027.

On July 2, 2025, the Company used the proceeds of the Notes to repay its $313,307 (US$230,000) Original Senior Term Loan and $143,031 (US$105,000) Senior Revolving Facility outstanding balance. This transaction resulted in the Original Senior Term Loan extinguishment, leading to the recognition of $1,908 unamortized transaction costs, within Net finance costs in the consolidated statements of income (loss). During the three and six-month periods ended September 30, 2026, the Company drew $48,514 (US$35,000) and $119,444 (US$85,000), respectively, on the Senior Revolving Facility (three and six-month periods ended September 30, 2025: nil and $76,004 (US$55,000), respectively).

On April 1, 2026, the Company amended the credit facilities agreement to consider the acquisition of Rana Gruber by entering into a four-year $209,085 (US$150,000) term loan (the "Senior Term Loan", and collectively with the Senior Revolving Facility, the "Senior Credit Facilities") and extending the maturity of the Senior Revolving Facility to April 2030. The Senior Term Loan is payable in 14 quarterly instalments of US$3,750 starting on December 31, 2026, with a final payment of US$97,500 at maturity. Transaction costs of $6,360 were incurred in the six-month period ended September 30, 2026, for amendments to the agreement, of which $2,172 associated with the Senior Revolving Facility were recorded in Other non-current assets and $4,188 were presented against Long-term debt. As at September 30, 2026, the Senior Term Loan and Senior Revolving Facility remaining balances were $212,820 (US$150,000) and $120,598 (US$85,000), respectively. The Company had $42,834 letters of credit issued under the $446,922 (US$315,000) undrawn Senior Revolving Facility.

The Senior Credit Facilities are collateralized by all of the present and future undertakings, properties and assets of QIO, and Lac Bloom Railcars Corporation Inc. The Company guaranteed all the obligations of QIO and Lac Bloom Railcars Corporation Inc. and pledged all of the shares it holds in QIO, and Lac Bloom Railcars Corporation Inc.

For the three and six-month periods ended September 30, 2026, the weighted average interest rate was 5.76% and 6.25%, respectively (three and six-month periods ended September 30, 2025: nil and 7.21%, respectively).

12. Long-Term Debt (continued)

IQ Loan

On July 21, 2021, QIO entered into an unsecured loan agreement with Investissement Québec (the "IQ Loan") to finance the Company's share of the increase in transshipment capacity by SFP Pointe-Noire for an amount up to $70,000. The repayment commenced on April 1, 2022, in ten equal annual instalments of the principal balance outstanding. The agreement comprises an option to prepay the loan at any time without penalty.

The IQ Loan was determined to be at a below-market rate. The fair value of the total advances of $70,000 was estimated at $59,386 and was determined based on the prevailing market interest rate for a similar instrument at the time the advances were made. The residual amount of $10,614 was recognized as a government grant and presented as Deferred grant in the consolidated statements of financial position. The deferred grant is amortized on a straight-line basis over the loan maturity starting in September 2023 when SFP Pointe-Noire's new infrastructure became available for use. The remaining deferred grant as at September 30, 2026, totalled $6,345 (March 31, 2026: $7,037).

During the six-month period ended September 30, 2026, the Company repaid $6,400 (six-month period ended September 30, 2025: $6,400), resulting in a balance of $38,400 as at September 30, 2026 (March 31, 2026: $44,800).

FTQ Loan

On May 21, 2021, QIO entered into an unsecured loan agreement with Fonds de Solidarité des Travailleurs du Québec (the "FTQ Loan") to fund the completion of the Bloom Lake expansion project and for general purposes thereafter for an amount up to $75,000. The FTQ Loan includes an option to prepay in whole or in part at any time, but not prior to the second anniversary, by paying a premium that varies from 2% to 6% based on the prepayment date. The outstanding balance was $75,000 as at September 30, 2026 (March 31, 2026: $75,000).

CAT Financing

On April 1, 2021, the Company signed an agreement with Caterpillar Financial Services Limited (the "CAT Financing") to finance mining equipment required for the Bloom Lake expansion for a facility of up to US$75,000 and available until March 31, 2023. Over the years, the facility was increased by US$73,000 and the availability period extended to July 2025.

The CAT Financing includes a prepayment option of the loan without penalty at any time and is collateralized by all of the financed equipment. The carrying value of the financed equipment was $67,510 as at September 30, 2026 (March 31, 2026: $75,532).

During the three and six-month periods ended September 30, 2026, the Company repaid $7,633 (US$5,375) and $15,291 (US$10,877), respectively (three and six-month periods ended September 30, 2025: $7,808 and $18,774, respectively) and did not make any drawdown (three and six-month periods ended September 30, 2025: nil and $8,496, respectively), resulting in a balance of $76,059 (US$53,608) as at September 30, 2026 (March 31, 2026: $89,886 (US$64,485)).

For the three and six-month periods ended September 30, 2026, the weighted average interest rate was 6.77% and 6.82%, respectively (three and six-month periods ended September 30, 2025: 7.37% and 7.27%, respectively).

Railcars Loan

On November 1, 2024, the Company signed a loan agreement (the "Railcars Loan") to finance the purchase of 400 railcars for a facility of $69,842 (US$49,897). The Railcars Loan consists of two equal equipment notes payable in 120 progressive monthly instalments, with final payments of US$5,872 and US$5,861 at their respective maturities.

The Railcars Loan includes a prepayment option in whole at any time, but not prior to the second anniversary, by paying a premium of 1% of the amount prepaid for each remaining year of the loan. The Railcars Loan is collateralized by all the financed railcars. The carrying value of the financed railcars was $63,602 as at September 30, 2026 (March 31, 2026: $65,104).

During the three and six-month periods ended September 30, 2026, the Company repaid $1,066 (US$761) and $2,102 (US$1,510), respectively (three and six-month periods ended September 30, 2025: $979 and $1,950, respectively), resulting in a balance of $63,436 (US$44,711) as at September 30, 2026 (March 31, 2026: $64,427 (US$46,221)).

Other debts

On May 18, 2026, the Company drew $7,340 (NOK 50,000) under a DNB Bank ASA term loan agreement to finance a capital expenditure project. The term loan matures in three years and is payable in quarterly instalments of NOK 2,083 starting in December 2026, with a final payment of the remaining balance at maturity. The term loan bears interest at a variable rate, with interest payable quarterly, and includes a prepayment option of the loan, in whole or in part, at any time without penalty. As at September 30, 2026, the outstanding term loan balance was $7,390 (NOK 50,000).

14. Share Capital and Reserves

a) Authorized

The Company's share capital consists of authorized:

- Unlimited number of ordinary shares, without par value; and
- Unlimited number of preferred shares, without par value, issuable in series.

b) Ordinary Shares

	Six Months Ended September 30,	
	2026	2025
	(in thousands)	(in thousands)
Opening balance	**533,251**	518,251
Shares issued pursuant to a private placement	**26,796**	—
Shares issued for exercise of warrants	**—**	15,000
Ending balance	**560,047**	533,251

On April 10, 2026, in connection with the acquisition of Rana Gruber, Champion issued 26,795,921 ordinary shares pursuant to the completion of a US$100,000 private placement to Caisse de dépôt et placement du Québec, resulting in gross proceeds of $139,390 and share issuance costs of $4,839.

During the six-month period ended September 30, 2025, the remaining 15,000,000 warrants outstanding were exercised at an exercise price of $2.45, resulting in total proceeds of $36,750.

14. Share Capital and Reserves (continued)

c) Dividends

The following table details the dividends declared on the Company's ordinary shares:

Results Period	Montréal Declaration Date	Payment Date	Amount per Share	Six Months Ended September 30, 2026	2025
Final — Mar-26	May 27, 2026	July 8, 2026	0.02	**11,201**	—
Final — Mar-25	May 28, 2025	July 10, 2025	0.10	**—**	53,325
				11,201	53,325

d) Share-Based Payments

The Company has various share-based compensation plans for eligible employees and directors. The objective of the Omnibus incentive plan is to enhance the Company's ability to attract and retain talented employees and provide alignment of interests between such employees and the shareholders of the Company. Under the Omnibus incentive plan, the Company may grant stock option awards, restricted share unit ("RSU") awards, performance share unit ("PSU") awards and deferred share unit ("DSU") awards. If and when cash dividends are declared, the holders of RSUs, PSUs and DSUs are entitled to receive dividend equivalents.

Stock option and RSU awards vest annually in three equal tranches from the date of grant. PSU awards vest i) at the end of three years from the date of grant or ii) according to the date of achievement, when the PSUs are specific to a project. Vesting is subject to key performance indicators established by the Board. DSU awards vest at the date of grant. The cash consideration for awards settled through cash payment is included in Accounts payable and other under Changes in non-cash operating working capital in the consolidated statements of cash flows.

As at September 30, 2026, the Company is authorized to issue 56,005,000 stock options and share rights (September 30, 2025: 53,325,000) equal to 10% (September 30, 2025: 10%) of the issued and outstanding ordinary shares for issuance under the Omnibus incentive plan.

The following table summarizes the share-based payment expense (recovery):

	Three Months Ended September 30,		Six Months Ended September 30,	
	2026	2025	**2026**	2025
RSU	**(1,033)**	2,010	**(2,229)**	1,920
PSU	**(1,852)**	2,320	**(2,570)**	2,396
DSU	**(600)**	288	**(1,376)**	(15)
	(3,485)	4,618	**(6,175)**	4,301

The following table summarizes the carrying amount of the Company's cash-settled share-based payment liability in the consolidated statements of financial position for RSUs, PSUs and DSUs.

		As at September 30,	As at March 31,
	Note	**2026**	2026
Accounts payable and other	**11**	**3,248**	7,385
Other long-term liabilities		**8,048**	16,193
		11,296	23,578

14. Share Capital and Reserves (continued)

e) Restricted Share Units

The following table details the RSU activities of the share incentive plan:

	Six Months Ended September 30,			
	2026		2025	
	Number of RSUs	Weighted Average Share Price	Number of RSUs	Weighted Average Share Price
	(in thousands)		(in thousands)	
Opening balance	**2,703**	**4.73**	2,007	5.67
Granted	**1,093**	**4.31**	1,299	3.84
Dividend equivalents	**19**	**3.94**	75	3.95
Settled through cash payment	**(771)**	**5.05**	(467)	6.15
Forfeited	**(196)**	**4.29**	(25)	4.58
Ending balance	**2,848**	**4.51**	2,889	4.73
Vested - end of the period	**874**	**4.98**	788	5.35

During the six-month period ended September 30, 2026, 1,093,000 RSUs were granted to eligible employees (six-month period ended September 30, 2025: 1,299,000 RSUs).

During the six-month period ended September 30, 2026, 771,000 RSUs were settled in exchange for cash consideration based on a weighted average share price, at the settlement date, of $3.51 (six-month period ended September 30, 2025: 467,000 RSUs based on a weighted average share price, at the settlement date, of $3.94).

f) Performance Share Units

The Company assesses each reporting period whether performance criteria of share-based units will be achieved in measuring share-based payments. The actual share-based payment and the period over which the expense is being recognized may vary from the estimate.

The following table details the PSU activities of the share incentive plan:

	Six Months Ended September 30,			
	2026		2025	
	Number of PSUs	Weighted Average Share Price	Number of PSUs	Weighted Average Share Price
	(in thousands)		(in thousands)	
Opening balance	**4,049**	**4.73**	2,799	5.74
Granted	**2,537**	**4.31**	1,949	3.84
Dividend equivalents	**33**	**3.94**	108	3.95
Settled through cash payment	**(1,155)**	**5.05**	(485)	6.78
Forfeited	**(415)**	**4.40**	(40)	4.65
Ending balance	**5,049**	**4.47**	4,331	4.73
Vested - end of the period	**—**	**—**	—	—

During the six-month period ended September 30, 2026, 2,537,000 PSUs were granted to eligible employees (six-month period ended September 30, 2025: 1,949,000 PSUs).

During the six-month period ended September 30, 2026, 1,155,000 PSUs were settled in exchange for cash consideration based on a weighted average share price, at the settlement date of $3.51 (six-month period ended September 30, 2025: 485,000 PSUs based on a weighted average share price, at the settlement date, of $3.84).

14. Share Capital and Reserves (continued)

g) Deferred Share Units

The following table details the DSU activities of the share incentive plan:

	Six Months Ended September 30,			
	2026		2025	
	Number of DSUs	**Weighted Average Share Price**	**Number of DSUs**	**Weighted Average Share Price**
	(in thousands)		(in thousands)	
Opening balance	**663**	**5.05**	492	5.00
Dividend equivalents	**4**	**3.99**	12	4.10
Ending balance	**667**	**5.04**	504	4.98
Vested - end of the period	**667**	**5.04**	504	4.98

15. Revenues

	Three Months Ended September 30,		Six Months Ended September 30,	
	2026	2025	**2026**	2025
Iron ore revenue	**410,425**	451,955	**773,506**	868,534
Provisional pricing adjustments	**(6,493)**	40,935	**(12,698)**	14,383
	403,932	492,890	**760,808**	882,917

Quarterly provisional pricing adjustments represent subsequent changes to revenue attributable to iron ore concentrate sold in prior quarters based on the final settlement price. Changes to previous periods sales that were subject to provisional pricing as at June 30, 2026, and for which the final price was determined during the current quarter, were recorded within Provisional pricing adjustments in the current period. Current period sales subject to provisional pricing as at September 30, 2026, were recorded within Iron ore revenue in the current period and the adjustment upon determining the final price will be recorded as Provisional pricing adjustments in the future periods. Year-to-date provisional pricing adjustments represent the sum of the quarterly provisional pricing adjustments. Provisional pricing adjustments exclude adjustments recognized on pre-acquisition shipments of Rana Gruber, as the related initial revenues were not recognized in Champion's consolidated results; these are rather presented in Iron ore revenue.

During the three-month period ended September 30, 2026, a final price was established for the 2.1 million tonnes of iron ore that were subject to provisional pricing as at June 30, 2026, resulting in negative provisional pricing adjustments of $6,493 recorded as a decrease of revenues. As at September 30, 2026, 3.4 million tonnes of iron ore sales remained subject to provisional pricing, with the final price to be determined in the subsequent reporting periods (September 30, 2025: 2.5 million tonnes).

16. Cost of Sales

	Three Months Ended September 30,		Six Months Ended September 30,	
	2026	2025	**2026**	2025
Mining and processing costs	**229,421**	182,103	**447,945**	365,320
Change in iron ore concentrate inventories	**47,964**	17,410	**12,486**	54,949
Land transportation and port handling	**94,980**	93,885	**191,269**	187,057
Purchase price allocation inventory adjustment	**4,832**	—	**7,697**	—
Start-up costs	**6,921**	—	**13,472**	—
	384,118	293,398	**672,869**	607,326

For the three and six-month periods ended September 30, 2026, expenses for defined contribution plans amounted to $7,398 and $14,648, of which $7,000 and $13,843, were recorded in Cost of sales, respectively (three and six-month periods ended September 30, 2025: $4,202 and $8,524, including $3,828 and $7,738 in Cost of sales, respectively) and are presented in Mining and processing costs.

17. Net Finance Costs

	Three Months Ended September 30,		Six Months Ended September 30,	
	2026	2025	**2026**	2025
Interest expense on long-term debt	**13,141**	10,756	**26,140**	16,933
Amortization of transaction costs and accretion of long-term debt	**1,183**	3,012	**2,360**	4,110
Standby commitment fees on long-term debt	**512**	782	**1,108**	1,405
Interest expense on lease liabilities	**2,300**	1,540	**4,619**	2,988
Realized and unrealized foreign exchange loss (gain)	**(1,251)**	12,166	**19,268**	(10,324)
Amortization of deferred grant	**(346)**	(307)	**(692)**	(613)
Interest income	**(1,297)**	(2,923)	**(4,134)**	(3,941)
Accretion expense of provisions	**800**	785	**1,738**	1,480
Other finance costs	**443**	(168)	**939**	349
	15,485	25,643	**51,346**	12,387

During the development period of the DRPF Project, borrowing costs are capitalized. Refer to note 9 — Property, Plant and Equipment.

18. Other Income (Expenses)

		Three Months Ended September 30,		Six Months Ended September 30,	
	Notes	**2026**	2025	**2026**	2025
Rental income		**1,462**	1,245	**2,378**	2,514
Change in fair value of non-current investments	**20**	**(20)**	(2,375)	**231**	(3,160)
Change in fair value of derivative instruments	**20**	**(835)**	—	**(18,415)**	—
Insurance proceeds		**—**	—	**1,300**	—
Management services to a joint venture	**22**	**1,218**	—	**2,477**	—
Net gain (loss) on non-financial assets		**(20)**	(1,891)	**263**	(2,009)
		1,805	(3,021)	**(11,766)**	(2,655)

19. Earnings per Share

Earnings per share are calculated by dividing the net income (loss) by the weighted average number of shares outstanding during the period.

	Three Months Ended September 30,		Six Months Ended September 30,	
	2026	2025	**2026**	2025
Net income (loss)	**(48,355)**	56,794	**(89,883)**	80,578
	(in thousands)	(in thousands)	(in thousands)	(in thousands)
Weighted average number of common shares outstanding - Basic	**560,047**	533,251	**558,583**	528,005
Dilutive share options, warrants and equity settled awards	**—**	1,293	**—**	3,323
Weighted average number of outstanding shares - Diluted	**560,047**	534,544	**558,583**	531,328
	(in dollars)	(in dollars)	(in dollars)	(in dollars)
Basic earnings (loss) per share	**(0.09)**	0.11	**(0.16)**	0.15
Diluted earnings (loss) per share	**(0.09)**	0.11	**(0.16)**	0.15

For the three and six-month periods ended September 30, 2026, potentially dilutive securities were excluded from diluted loss per share as their effect would have been anti-dilutive.

20. Financial Instruments

a) Measurement Categories

Financial assets and financial liabilities have been classified into categories that determine their basis of measurement and, for items measured at fair value, whether changes in fair value are recognized in the profit or loss or in other comprehensive income. These categories are financial assets and financial liabilities at fair value through profit or loss ("FVTPL") and financial assets and financial liabilities at amortized cost. The following tables show the carrying amounts and the fair value of assets and liabilities for each of these categories:

As at September 30, 2026		Financial Instruments at FVTPL	Financial Instruments at Amortized Cost	Total Carrying Amount	Total Fair Value
Assets					
Current					
Cash	Level 1	—	**214,357**	**214,357**	**214,357**
Trade receivables	Level 2	**7,812**	**27,562**	**35,374**	**35,374**
Other receivables (excluding sales tax and grant)	Level 2	—	**2,988**	**2,988**	**2,988**
Derivative assets	Level 2	**12,786**	—	**12,786**	**12,786**

Senior Unsecured Notes (included in long-term debt)	Level 1	—	**707,560**	**707,560**	**689,891**
Other long-term debt	Level 2	—	**521,263**	**521,263**	**521,263**
		23,341	**1,541,809**	**1,565,150**	**1,547,481**

20. Financial Instruments (continued)

a) Measurement Categories (continued)

As at March 31, 2026		Financial Instruments at FVTPL	Financial Instruments at Amortized Cost	Total Carrying Amount	Total Fair Value
Assets					
Current					
Cash	Level 1	—	296,788	296,788	296,788
Trade receivables	Level 2	109,161	26,376	135,537	135,537
Other receivables (excluding sales tax and grant)	Level 2	1,795	2,743	4,538	4,538
		110,956	325,907	436,863	436,863
Non-current					
Equity investment in a publicly listed entity	Level 1	9	—	9	9
Equity investment in a private entity	Level 3	12,937	—	12,937	12,937
Other non-current financial assets	Level 2	—	854	854	854
Embedded derivative asset	Level 2	18,868	—	18,868	18,868
		142,770	326,761	469,531	469,531
Liabilities					
Current					
Accounts payable and other (excluding the current portion of lease liabilities and cash-settled share-based payment liability)	Level 2	—	236,342	236,342	236,342
Current portion of long-term debt	Level 2	—	40,627	40,627	40,627
		—	276,969	276,969	276,969
Non-current					
Senior Unsecured Notes (included in long-term debt)	Level 1	—	694,952	694,952	725,699
Other long-term debt	Level 2	—	227,184	227,184	227,184
		—	1,199,105	1,199,105	1,229,852

Current financial assets and financial liabilities are valued at their carrying amounts, which are reasonable estimates of their fair value due to their near-term maturities; this includes cash, short-term investments and restricted cash if any, other receivables, and accounts payable and other (excluding current portion of lease liabilities and cash-settled share-based payment liability).

Long-term debt is measured at amortized cost using the effective interest method. Except for the Senior Unsecured Notes, the fair value of long-term debt approximates its carrying amount, given that it is subject to terms and conditions, including variable interest rates, similar to those available to the Company for instruments with comparable terms.

b) Fair Value Measurement Hierarchy

Subsequent to initial recognition, the Company uses a fair value hierarchy to categorize the inputs used to measure the financial instruments at fair value grouped into the following levels based on the degree to which the fair value is observable.

- Level 1: Inputs derived from quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Inputs derived from other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and
- Level 3: Inputs that are not based on observable market data (unobservable inputs).

There were no transfers between Level 1, Level 2 and Level 3 during the three and six-month periods ended September 30, 2026 (three and six-month periods ended September 30, 2025: nil).

20. Financial Instruments (continued)

c) Financial Instruments Measured at FVTPL

Trade receivables

The trade receivables are classified as Level 2 in the fair value hierarchy. Their fair values are a recurring measurement. The measurement of the trade receivables is impacted by the Company's provisional pricing arrangements, where the final sale price is determined based on iron ore prices subsequent to the date of the sale. The Company initially recognizes revenues and trade receivables at the contracted provisional price on the shipment date and re-estimates the consideration to be received using forecast iron ore prices at the end of each reporting period. The impact of iron ore price movements until the final settlement is recorded as an adjustment to revenues and trade receivables.

Equity instruments in private entity

The Company holds equity instruments in a private entity which collaborates with the Company in industrial trials related to cold pelletizing technologies. The fair value of the equity instruments is a recurring measurement and is classified as Level 3. The determination of fair value is conducted on a quarterly basis and it is based on the entity's financial performance from the latest financial statements as well as enterprise values used in financing, if any. The change in fair value also reflects the foreign exchange gains or losses.

During the three and six-month periods ended September 30, 2026, the Company recognized a loss of $20 and a gain of $231, respectively, on the fair value of the equity instruments attributable to the changes in exchange rates (three and six-month periods ended September 30, 2025: decrease of $2,375 and $3,160, respectively, mainly attributable to a $2,673 loss associated with the reduction of the enterprise value of the private entity following a new financing round, with the remainder related to the changes in exchange rates). As at September 30, 2026, the equity instruments totalled $13,183 and includes $15 related to the acquisition of Rana Gruber (March 31, 2026: $12,937).

Embedded derivative asset

The Senior Unsecured Notes issued in July 2025 include redemption options accounted for as a separate embedded derivative measured at FVTPL. The fair value of the embedded derivative asset was estimated at $11,854 at inception and was recorded in Other non-current assets in the consolidated statements of financial position with a corresponding adjustment to Long-term debt. The fair value of redemption options was categorized as Level 2 in the fair value hierarchy.

The derivative asset is measured at fair value on a recurring basis, using market data such as traded Senior Unsecured Notes price, interest rate curves, volatility assumptions and credit spreads for similar instruments. During the three and six-month periods ended September 30, 2026, the fair value of the derivative asset decreased by $11,325 and $11,775, respectively (three and six-month periods ended September 30, 2025: nil). As at September 30, 2026, the derivative asset totalled $7,093 (March 31, 2026: $18,868).

Foreign exchange derivatives - USD/NOK

The Company had entered into USD/NOK foreign exchange options and forward contracts in the prior financial year to hedge the variability in cash flows arising from the NOK-denominated acquisition of Rana Gruber. These instruments were used to complete the acquisition in April 2026 and resulted in a realized gain of $9,429 and an unrealized loss of $1,795 for the six-month period ended September 30, 2026, presented in Other income (expenses) in the consolidated statements of income (loss). As at September 30, 2026, the derivative balance was nil (March 31, 2026: derivative asset of $1,795).

Foreign exchange derivative - USD/CAD

On May 15, 2026, the Company entered into foreign exchange forward contracts totalling US$600,000 at a fixed rate of 1.3636, to hedge the anticipated exposure to the variability of the USD/CAD exchange rate. These instruments are settled based on pre-determined monthly notional amounts. As at September 30, 2026, the remaining forward exchange contracts totalled US$375,000, maturing in May 2027. The weighted average forward foreign exchange rate used to estimate the fair value of these contracts was 1.4141 as at September 30, 2026, resulting in a liability of $18,745, presented under Derivative liabilities in the consolidated statements of financial position.

The fair value of derivative financial instruments generally represents the estimated amount that the Company would receive or pay if the instruments were settled at the reporting date, taking into account both the counterparty's credit risk and the Company's own credit risk. The fair value of foreign exchange forward contracts is primarily based on valuations provided by the Company's financial counterparties, which incorporate observable market inputs, including foreign exchange spot rates and forward curves. The Company did not apply hedge accounting on these contracts. During the three and six-month periods ended September 30, 2026, changes in the fair value of these contracts resulted in a realized loss of $5,644 and $8,366, respectively, and an unrealized gain of $3,938 and an unrealized loss of $18,745, respectively, all presented in Other income (expenses) of the consolidated statements of income (loss).

20. Financial Instruments (continued)

c) Financial Instruments Measured at FVTPL (continued)

Other derivatives

Prior to its acquisition by the Company, Rana Gruber had entered into derivative financial instruments to reduce its exposure to fluctuations in foreign exchange rates, iron ore prices, electricity prices and freight prices, all maturing in December 2026. The Company did not apply hedge accounting on these contracts. Consequently, all derivative instruments are measured at FVTPL, with realized and unrealized gains and losses recognized within Other income (expenses) in the consolidated statements of income (loss).

		As at September 30,		Three Months Ended September 30,		Six Months Ended September 30,	
		2026		2026		2026	
Derivative instruments	**Notional**	**Remaining notional**	**Fair value**	**Realized gain (loss)**	**Unrealized gain (loss)**	**Realized gain (loss)**	**Unrealized gain (loss)**

			12,786	**12,665**	**(469)**	**20,895**	**(8,058)**

Foreign exchange rates derivatives

The Company holds foreign exchange rate cap and floor derivatives to manage the risk associated to the variability of the USD/NOK exchange rate, at a weighted average foreign exchange rate cap and floor of 10.63 and 11.66, respectively. As at September 30, 2026, the weighted average foreign exchange rate used to estimate the fair value of these instruments was 9.60.

Iron ore prices derivatives

The Company holds forward derivatives to manage the risk associated to the variability of iron ore prices, by reference to the Platts IODEX 61% Fe CFR China Index ("P61 Index"), at a weighted average forward price of US$104.90 per tonne. As at September 30, 2026, the weighted average P61 Index used to estimate the fair value of these instruments was US$93.44 per tonne.

Electricity prices derivatives

The Company holds forward derivatives to manage the risk associated to the variability of electric power prices, by reference to the Nord Pool system price, at a weighted average forward price of EUR65.77 per Megawatt-hour for the expected future energy consumption. As at September 30, 2026, the weighted average price used to estimate the fair value of these instruments was EUR86.11 per Megawatt-hour.

Freight prices derivatives

The Company holds forward derivatives to manage the risk associated to the variability of freight prices, by reference to the C3 Baltic Capesize Index ("C3 Index"), at a weighted average forward price of US$20.35 per tonne. As at September 30, 2026, the weighted average C3 Index used to estimate the fair value of these instruments was US$35.32 per tonne.

21. Joint Venture

Since September 29, 2025, the Company holds a 51% interest in the Kami Partnership, a joint venture currently evaluating the potential development of the Kami Project, designed to produce 9 million wet metric tonnes per year of direct reduction grade iron ore pellet feed above 67.5% Fe and which is located 21 kilometres southeast of Bloom Lake, in Canada.

The Company's interest in the Kami Partnership is accounted for using the equity method in the consolidated financial statements.

This summarized financial information represents the joint venture's financial statements prepared in accordance with IFRS under the Company's accounting policies:

	As at September 30, 2026	As at March 31, 2026
Current assets	**61,468**	69,777
Non-current assets	**189,387**	184,225
Total assets	**250,855**	254,002
Current liabilities	**55,992**	61,089
Non-current liabilities	**41**	41
Total liabilities	**56,033**	61,130
Net assets	**194,822**	192,872
Assets above include:		
Cash	**7,958**	11,209
Current restricted cash	**53,337**	56,097

	Three Months Ended September 30,		**Six Months Ended September 30,**	
	2026	2025	**2026**	2025
Depreciation	**(10)**	—	**(20)**	—
General and administrative expenses	**(1,070)**	—	**(2,089)**	—
Sustainability and other community expenses	**—**	—	**(20)**	—
Innovation and growth initiatives	**(220)**	—	**(400)**	—
Operating expenses	**(1,300)**	—	**(2,529)**	—
Net finance income	**57**	—	**129**	—
Net loss	**(1,243)**	—	**(2,400)**	—
Champion's share of loss	**(634)**	—	**(1,224)**	—

Reconciliation of the above amounts with the carrying amount of the Company's investment recognized in the consolidated statements of financial position is presented below:

	As at September 30, 2026	As at March 31, 2026
Champion's interest	**51 %**	51 %
Joint venture's net assets (100%)	**194,822**	192,872
Champion's proportionate ownership	**99,359**	98,365
Elimination of fair value adjustments attributable to Champion	**(26,678)**	(26,678)
	72,681	71,687
Transaction costs incurred	**1,437**	1,437
Carrying value of Champion's investment in a joint venture	**74,118**	73,124

The joint venture does not have any future minimum payments of commitments as at September 30, 2026.

The Kami Partnership will be subject to the payment of a gross sales royalty on iron ore concentrate, refined copper, fine gold bullion, silver bullion, and other refined products; and an education and training fund for local communities.

22. Related Parties

Joint venture

Balances and transactions with the Kami Partnership, accounted for using the equity method, are summarized below:

		As at September 30,	As at March 31,
	Notes	2026	2026
Investment in a joint venture	21	**74,118**	73,124
Joint venture's contribution note	10	**53,227**	55,446
Other receivables (from a joint venture)		**430**	1,047

During the three and six-month periods ended September 30, 2026, Champion invoiced management fees and other services to the Kami Partnership totalling $1,218 and $2,477, respectively, and recognized interest income of $348 and $706, respectively, on restricted cash held within the joint venture for the Company's benefit.

Key management personnel

No significant changes occurred in connection with key management personnel during the three and six-month periods ended September 30, 2026.

23. Commitments and Contingencies

The Company's future minimum payments of commitments as at September 30, 2026, are as follows:

	Less than a year	1 to 5 years	More than 5 years	Total
Impact and Benefits Agreement with the Innu community	**7,759**	**33,270**	**92,592**	**133,621**
Take-or-pay fees related to the Port Agreement	**8,641**	**33,493**	**64,374**	**106,508**
Capital expenditure obligations	**22,418**	**2,411**	**—**	**24,829**
Other obligations	**60,738**	**200**	**100**	**61,038**
	99,556	**69,374**	**157,066**	**325,996**

The Company has obligations for services related to fixed charges for the use of infrastructure over a defined contractual period of time. Such service commitments are excluded from the above figure as the services are expected to be used by the Company. To the extent that this changes, the commitment amount may change.

In September 2025, the Company and the Partners entered into a definitive partnership agreement, as a result of which the Partners made initial cash contributions in the Kami Partnership of $68,600 and committed to further contribute $176,400. Subsequent cash contributions of the Partners are subject to the completion of a definitive feasibility study, Champion and the Partners proceeding with positive interim investment elections to pursue work towards a final investment decision, as well as other customary closing conditions. Until a final investment decision is made, the Partners have different options to exit the Kami Partnership by requiring Champion to acquire their interests. The Partners are expected to make further contributions on a pro-rata basis for expenses necessary to advance the Kami Project towards a potential interim investment decision and, ultimately, a potential final investment decision.

Contingent upon the Kami Project advancing to commercial production, the Company will be subject to a fixed production payment on future tonnes sold. The Company is also subject to limited production payments on its Consolidated Fire Lake North, Lac Lamêlée, Moiré Lake, O'Keefe-Purdy and Harvey-Tuttle properties.

24. Financial Information Included in the Consolidated Statements of Cash Flows

a) Changes in non-cash operating working capital

	Three Months Ended September 30,		Six Months Ended September 30,	
	2026	2025	**2026**	2025

Ending balance - Long-Term Debt	**1,292,434**	977,569	**1,292,434**	977,569

	Three Months Ended September 30,		Six Months Ended September 30,	
	2026	2025	**2026**	2025
Opening balance - Lease Liabilities	**161,679**	107,020	**117,761**	92,335
Cash from (used in) financing activities				
Capital payments	**(10,626)**	(5,742)	**(21,045)**	(10,479)
Interest expense (i)	**2,468**	1,540	**4,969**	2,988
Non-cash changes				
Business combination	**—**	—	**48,511**	—
New lease liabilities	**5,042**	4,799	**7,248**	30,374
Lease modification	**—**	—	**373**	(3,652)
Foreign exchange movement	**1,148**	1,651	**1,894**	(2,298)
Ending balance - Lease Liabilities	**159,711**	109,268	**159,711**	109,268

(i) The interest expense on lease liabilities for the three and six-month periods ended September 30, 2026, differs from the amount presented in note 17 — Net Finance Costs , as it includes $168 and $350, respectively, capitalized to property, plant and equipment.

25. Segmented Information

As at September 30, 2026, and 2025, the Company conducted mining operations and exploration and evaluation activities in Canada through Bloom Lake Mine. Following the acquisition of Rana Gruber on April 10, 2026, the Company also conducts mining operations in Norway. As such, the Company reviewed its segmented information and determined that it has two reportable segments related to iron ore concentrate production, reflecting their different geographical locations and regulatory environments. Exploration and Evaluation and Corporate are presented as separate segments due to their distinct nature.

The operating segments reflect the management structure of the Company and are consistent with the internal reports reviewed by the Company's chief operating decision-maker in assessing the business performance and making strategic decisions. The Company evaluates the performance of its operating segments primarily based on segment operating income, as defined below.

Three Months Ended September 30, 2026	**Bloom Lake Mining Operations**	**Rana Gruber Mining Operations**	**Exploration and Evaluation**	**Corporate**	**Total**
